

Stan Adachi

Director – Supplier Quality Process Integration

Integrated Defense Systems

Mr. Stan Adachi is currently the Director of Supplier Quality, Process Integration. The Process Integration organization works to integrate, develop, and deploy best practices, systems, processes, and tools across IDS Supplier Quality.

In addition to the IDS integration, this group is responsible for the overall integration with Boeing's Commercial Supplier Quality organization, Procurement Quality Assurance.

Mr. Adachi began his career at Boeing 20 years ago and has worked in many different capacities including leading Supplier Management and Procurement for Boeing Integrated Defense Systems, Huntington Beach, the Project Management Office for Boeing Advanced Airlift and Tankers business segment and C-17 program, negotiating the USAF C-17 Follow-on buy contract, and managing the C-17 Full Scale Qualification tests.

Mr. Adachi is a graduate of the University of California, Berkeley with a B.S. and M.S. in Structural Mechanics engineering, and the University of California, Los Angeles with an MBA.
