

RMC Auditor Sub-team Report

March 8, 2006
Phoenix, Arizona

Contents

- **Sub-Team Members**
- **Sub-Team Mandate**
- **Report**
- **Recommendations**

Sub-Team Members

- **The current Sub-team members are:**
 - **Luiz Brandao, Embraer**
 - **Colin Clarke, Bombardier Aerospace**
 - **Rick Downs, Cessna-Textron**
 - **Michael Gallagher, Lockheed Martin**
 - **Vince May, Honeywell**
 - **Will Tate, Vought**

Sub-Team Mandate

This sub-team is responsible for:

- **Recognition of Accreditation Bodies (AB), Certification/Registration Bodies (CRB), trainers for Aerospace Quality Management Standards (AQMS), auditor competency training and auditor approvals for all of the Aerospace AQMS i.e. AS 9100, AS 9110, AS 9120.**

Report

- The sub-team continues to work well. Since September our team has reviewed 69 auditor applications and two CRB applications. Ave processing time was 16 business days with a min of 1 day and maximum of 125 days.
- Work experience in applications is becoming more difficult to evaluate.
- Continue to see the need to define what constitutes work experience for AEAs approved through competency course and witness audits. Proposal of 2 years in last 15 years forwarded to the AS9014 writing team.

Report (cont'd)

- **AS9110 applications have been a struggle. Main issue is the 2/4 years of repair and overhaul experience.**
 - **Resolution – If 2/4 cannot be shown the AS9110 competency course is required.**

Report (cont'd)

- **Review of competency courses is a challenge.**
 - **Very time consuming**
 - **During the review we raised the question of how are courses kept current?**

Recommendations

- **Proposal for all AAQG ABs to use the SCC developed auditor application form to help ensure applicants show how work experience requirements are met.**
- **Competency courses should be taught as complete classes for AS9100/AS9120 and for AS9110.**
