

New! SAE's Virtual Conference Center

*If you can't attend in-person—
attend "virtually" at your convenience.*

The Virtual Conference Center is the latest technical information resource developed by SAE with your needs in mind. With the availability of this online tool, never again will you miss out on the experience of "sitting in" on a live SAE event.

SAE 2009 World Congress theater sessions will be available on the Virtual Conference Center beginning May 1, 2009. Four packages that capture insightful executive management presentations and panels for purchase include:

- Powertrain Executive Panel Package
- Electronics Executive Panel Package
- Energy Executive Panel Package
- Strategic Leadership Panel Package

Or, you can select individual segments from any of the packages listed. Visit www.sae.org/congress to sample content or to begin building your personal video information library.

Virtual content from the SAE 2009 Hybrid Vehicle Technologies Symposium is currently available at www.sae.org/hybrid. Upcoming events selected for virtual content development include the SAE Commercial Vehicle Engineering Congress and Exhibition and the SAE AeroTech Congress and Exhibition—both scheduled for release in the Fall of 2009.
