Object Detection, Collision Warning, and Avoidance Systems

Volume 2

By Ronald K. Jurgen

This book contains 51 papers covering the past eight years (1999-2006) of research on object detection, collision warning, and collision avoidance.

432 pp., Casebound 2007.
ISBN: 978-0-7680-1810-3

SAE Member Price: \$71.96
Product Code: PT-133

Disc Brake Squeal

Mechanism, Analysis, Evaluation, and Reduction/Prevention

By Frank Chen, Chin An Tan and Ronald L. Quaglia

This publication provides an outline of the basic theories and analytical techniques covering disc brake squeal with an emphasis on application.

Casebound 2005.
ISBN: 978-0-7680-1248-4

Safety-Critical Automotive Systems

By Juan R. Pimentel

This book covers functional safety (also referred to as system safety) and the aspects of the overall safety of a vehicle that rely on the vehicle's subsystems producing correct outputs or operating correctly in response to stimuli. This book contains 40 SAE technical papers covering the last six years (2001-2006) of research on this developing subject. Focus is on the vehicle's most important subsystems: sensors, actuators, electronic control units (ECUs), communication systems, and software (application, middleware, drivers, etc.).

393 pp., Paperbound 2006.
ISBN: 978-0-7680-1243-9

Vehicle Accident Analysis and Reconstruction Methods

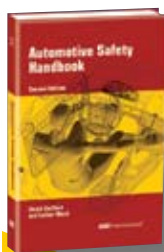

By Raymond M. Brach and Matthew Brach

Readers are guided through a multitude of practical, useful, and informative examples that show how, when, and why many problems occur - key requirements for designing safer vehicles, handling insurance claims, and litigating court cases.

350 pp., Hardbound 2005.
ISBN: 978-0-7680-0776-3

Automotive Safety Handbook

Second Edition

By Ulrich W. Seiffert and Lothar Wech

The first and only book with extensive coverage of both active and passive safety systems, this second edition of the Automotive Safety Handbook describes basic relationships and new developments related to accident avoidance (including the man/machine interface) and mitigation of injuries.

306 pp., Casebound 2007

Car Suspension and Handling

4th Edition

By Geoffrey Howard, John Peter Whitehead and Donald Bastow

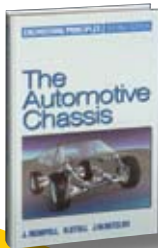

Car Suspension and Handling, 4th Edition focuses on the suspension and handling of cars, or automobiles, as opposed to those characteristics of other types of road vehicles, while always recognizing that there are differences in suspension requirements for different classes of vehicles, and in various markets of the world for a given vehicle.

The Automotive Chassis

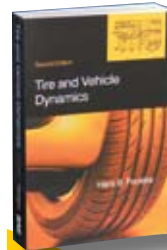

By J. Reimpell, H. Stoll, and J. W. Betzler

The second English edition of *The Automotive Chassis* provides a clearly structured overview of chassis technology and is essential reading for component and system engineers in both higher education and industry, as well as for non-specialists who seek an understanding of the field.

456 pp., Hardbound 2001
ISBN: 978-0-7680-0657-5

Tire and Vehicle Dynamics

2nd Edition

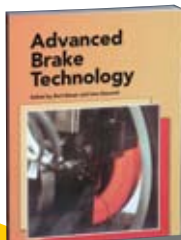

By Hans B. Pacejka

Tire and Vehicle Dynamics provides a complete reference on the mechanical behavior of pneumatic tires and their impact on vehicle performance. The comprehensive scope of the book includes developing an understanding of mathematical models of tire behavior, the incorporation of these models into vehicle models, and presenting an applied understanding of how the tire influences vehicle behavior.

Advanced Brake Technology

By Bert J. Breuer and Uwe Dausend

Access the most relevant information concerning road vehicle brakes and brake systems with *Advanced Brake Technology*, a collection of papers culled from four years of TMD Friction's μ Symposium, an annual meeting of the world's top brake engineers. Topics include anti-lock braking systems (ABS), new material technologies, brake-by-wire systems, and future brake technologies.
