Event Overview

Since 1989, the Aerospace in the News Executive Symposium has provided a forum for executive discussions on how the aerospace industry is progressing from both government and corporate perspectives. Symposium attendees will gain valuable insight from key industry leaders who will address current business and technical issues impacting the aerospace community.

Attendance at this senior management level event is limited to 110 senior government and industry executives, with no media present. The event is held under the Chatham House Rules.

When a meeting, or part thereof, is held under the Chatham House Rule, participants are free to use the information received, but neither the identity nor the affiliation of the speaker(s), nor that of any other participant, may be revealed.

This format promotes important information exchange between aerospace executives in a casual atmosphere.

Speakers have been selected based on their positions and their ability to interact with the exclusive audience that this conference provides. The speakers will provide insider perspectives on their topics.
