

## Special Events

### Technical Tour 1: **JEAN LUC LAGARDERE** Guided tour of the A380 Final Assembly Line

Monday, October 17

9:30 - 12:15

Price: \$35.00

The tour begins in the "telemetry room" with a presentation of the A380 program. You will then enter the Jean-Luc Lagardère site and see, from an observation tower, the general testing stations, the outside testing stations and an overall view of the entire site. Finally, you will board a full scale model of the A380 (a 16m section of the fuselage with fully equipped main and upper decks) and discover the interior of the double decker.

# ALL TOURS ARE SOLD OUT

### Technical Tour 2: **Panoramic tour by bus (with guide) of the A320, A330/A340, A350 Final Assembly Lines**

Monday, October 17

13:30 - 16:15

Price: \$25.00

#### **A bus tour with commentary through the Toulouse Airbus sites...**

The company headquarters, the training centre, the design offices and development center, the assembly lines (A320, A330/ A340, A350), logistics, cabin equipping, the delivery centre...a must-see covering 700 hectares.

### Technical Tour 3 : **Airbus Test Equipments (Iron Bird & simulators)**

Monday, October 17

14:30 - 16:45

Price: \$30.00

The systems integration test bench – also known as the “Iron Bird” – is a ground-based engineering tool used to incorporate, optimise and validate vital aircraft systems, including electrical and hydraulic generation, and flight controls. It is the physical integration of these systems, with each laid out in relation to the actual configuration of the aircraft, and all components installed at the same place as they would on the real airframe.

- **Please register in advance for the tours, no on-site registrations will be taken.**
- **All tour attendees will be required to present a passport the day of the tour.**
- **No one under the age of 18 will be permitted to attend the tour.**
- **No photo permitted.**
