

SAE International's **Shale Gas Impact on Vehicle Development** Symposium will bring together business leaders from the energy industry and the automotive industry in a collaborative, dynamic discussion about the prevalence of shale gas and its impact on the market for natural gas vehicles.

*Those who attend this conference will:*

- Gain an understanding of energy policy as it relates to natural gas exploration/CNG.
- Learn about infrastructure developments and the expansion of fueling stations and what this means for the energy and automotive sectors.
- Understand the impact of shale exploration and natural gas infrastructure.
- Learn about the market for NGVs in U.S. truck fleets as well as the heavy duty and passenger car sectors. What are the projections for NGV demand in the future?
- Gain an understanding of the regulatory environment pertaining to natural gas exploration and what it means for the energy and automotive sectors.

*Explore these topics and more with speakers from organizations including:*

- **Chesapeake Energy**
  - Kent Wilkinson, VP of Natural Gas Ventures
- **General Motors**
  - Joyce Mattman – Director of Commercial Product and Specialty Vehicles
- **Cummins, Inc.**
  - Roe East, General Manager- On Highway Natural Gas Business
- **Hart Energy**
  - Peggy Williams, Editorial Director
- **Natural Gas Vehicles For America (NGVAmerica)**
  - Jeffrey Clarke, General Counsel and Director of Regulatory Affairs
- **Pepper Hamilton LLP**
  - John W. Carroll, Attorney at Law
- **National Renewable Energy Laboratory**
  - Caley Johnson, Transportation Market Analyst
