LEAD COLLECTION CHOICES THAT ARE RELIABLE AND EASY TO USE

EXPOACCESS

The **ExpoAccess** is a Web enabled wireless mobile lead collection device and real-time web page lead management system. This new technology concept uses the java enabled color Blackberry platform to transfer data from an attendee's badge to an exhibitor's personal event web site. All leads can be custom qualified using the web site for personalization. Using this RCS system, exhibitors do not need to carry away a CD or memory stick or wait in line to download or "retrieve" data at the end of the event. The wireless enabled mobile unit delivers all the sales lead data in real-time to a secure exhibitor web site with online password protected access by the exhibiting company's personnel. The Web enabled ExpoAccess mobile unit provides a totally new approach to lead collection, management and follow-up. Data can be accessible at the web site for up to 90 days after the event.

The **Qualify Option** allows easy selection of qualifying criteria for each lead by use of the Blackberry mouse.

EXPOSCAN

The **ExpoScan** is the latest in improved Lead Generation Systems. ExpoScan makes it easier to collect your leads and more effectively use these leads to increase sales revenue and expand the scope of your business. ExpoScan is a compact, mobile integrated badge reader with internal memory that does not require an electrical hookup. It has the option of an external Bluetooth printer. ExpoScan stores each lead in its memory and these leads are then made available on a secure password protected web site. At the end of the show just drop off the ExpoScan unit and the data will be immediately downloaded to your secure web site for your continual use for up to 90 days after the show. No waiting to download your data on-site or having the possibility of your leads getting lost.

PRINTER

The **Printer Option** provides a thermal printer that does not require an electrical hookup and automatically produces a complete lead form which includes the ID#, name, title, company name, address, phone, fax, email, demographic codes, and the time and date visited, as well as ample room to write notes. 58mm thermal printer, prints 1000+ leads on a single charge. Bluetooth® technology.

EXPOREAD

The **ExpoRead** includes a new compact bar code badge reader that connects directly to your own laptop or desktop computer. When a badge is read the full content of the attendee record is displayed and stored. The ExpoRead can be upgraded to the ExpoSoft option.

The **ExpoSoft Upgrade** gives you the ability to use an intuitive graphic interface on your computer to easily program up to 8 customizable interactive questions (products, size of budget, follow up actions, etc.) with up to 14 answers each. The system allows for free form notes, database searching, and editing of the data. ExpoSoft generates these qualified leads in standard importing formats for easy transfer to other programs. If you have a printer attached to your computer it can be activated to produce lead forms in your booth.

QUICK CHOICE GRID
