Change The Direction? Evolving Partnerships Over Life Cycle

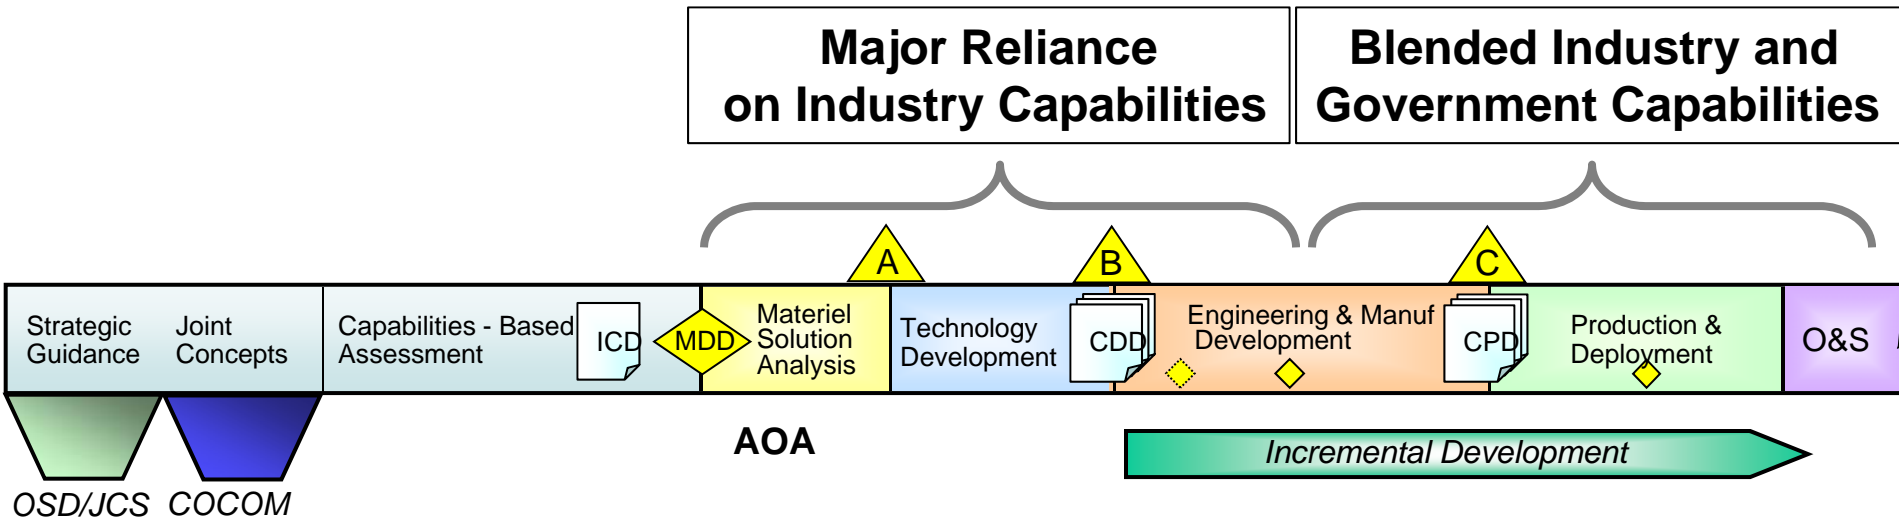

Today's Partnerships

- Partnership constructs tend to remain frozen (do not change to leverage both industry and government capabilities over the life cycle)

Future Partnerships

- Blended partnerships that leverage both industry and government capabilities over the life cycle

Evolving Relationships Throughout the Life Cycle

What Does This New Direction Mean?

U.S. AIR FORCE

- **Blended Industry and Government Capabilities**
 - **Ensures viable industrial & government base**
 - **Protects intellectual property and allows government use**
 - **Enables government to make enterprise decisions**
 - **Maintains government smart buyer competencies**
- **Blending Across All Areas of Product Support**
 - **Program Management**
 - **Engineering**
 - **Supply Chain Management and Execution**
 - **Maintenance**
- **Blended Partnerships Approach:**
 - **No ICS for sustainment; maximize investment funding**
 - **Leverage investments with 10 USC § 2474 & § 2476 at final location**
 - **Initial use of direct sales then transition to workshare construct**

Maximize Support
to the Warfighter

U.S. AIR FORCE

DoD and AF Policy Boundaries

- **DoDI 5000.02**
 - **Program Manager (PM) to use Performance Based Logistics (PBL)**
 - **Source of support may be organic, commercial, or a combination; optimize lifecycle readiness, reliability, and ownership costs**

- **AFI 63-101**
 - **PM shall use a PBL strategy for new ACAT I, IA, & II systems, unless justified by a business case analysis; PBL is preferred on new ACAT III programs**
 - **PM shall identify a product support integrator (PSI) as a single point of contact; PSI will be military/Government civilian unless otherwise approved and documented**
