

*Maximizing Logistics
Product Support*

Ready. Resourceful. Responsive!

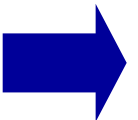

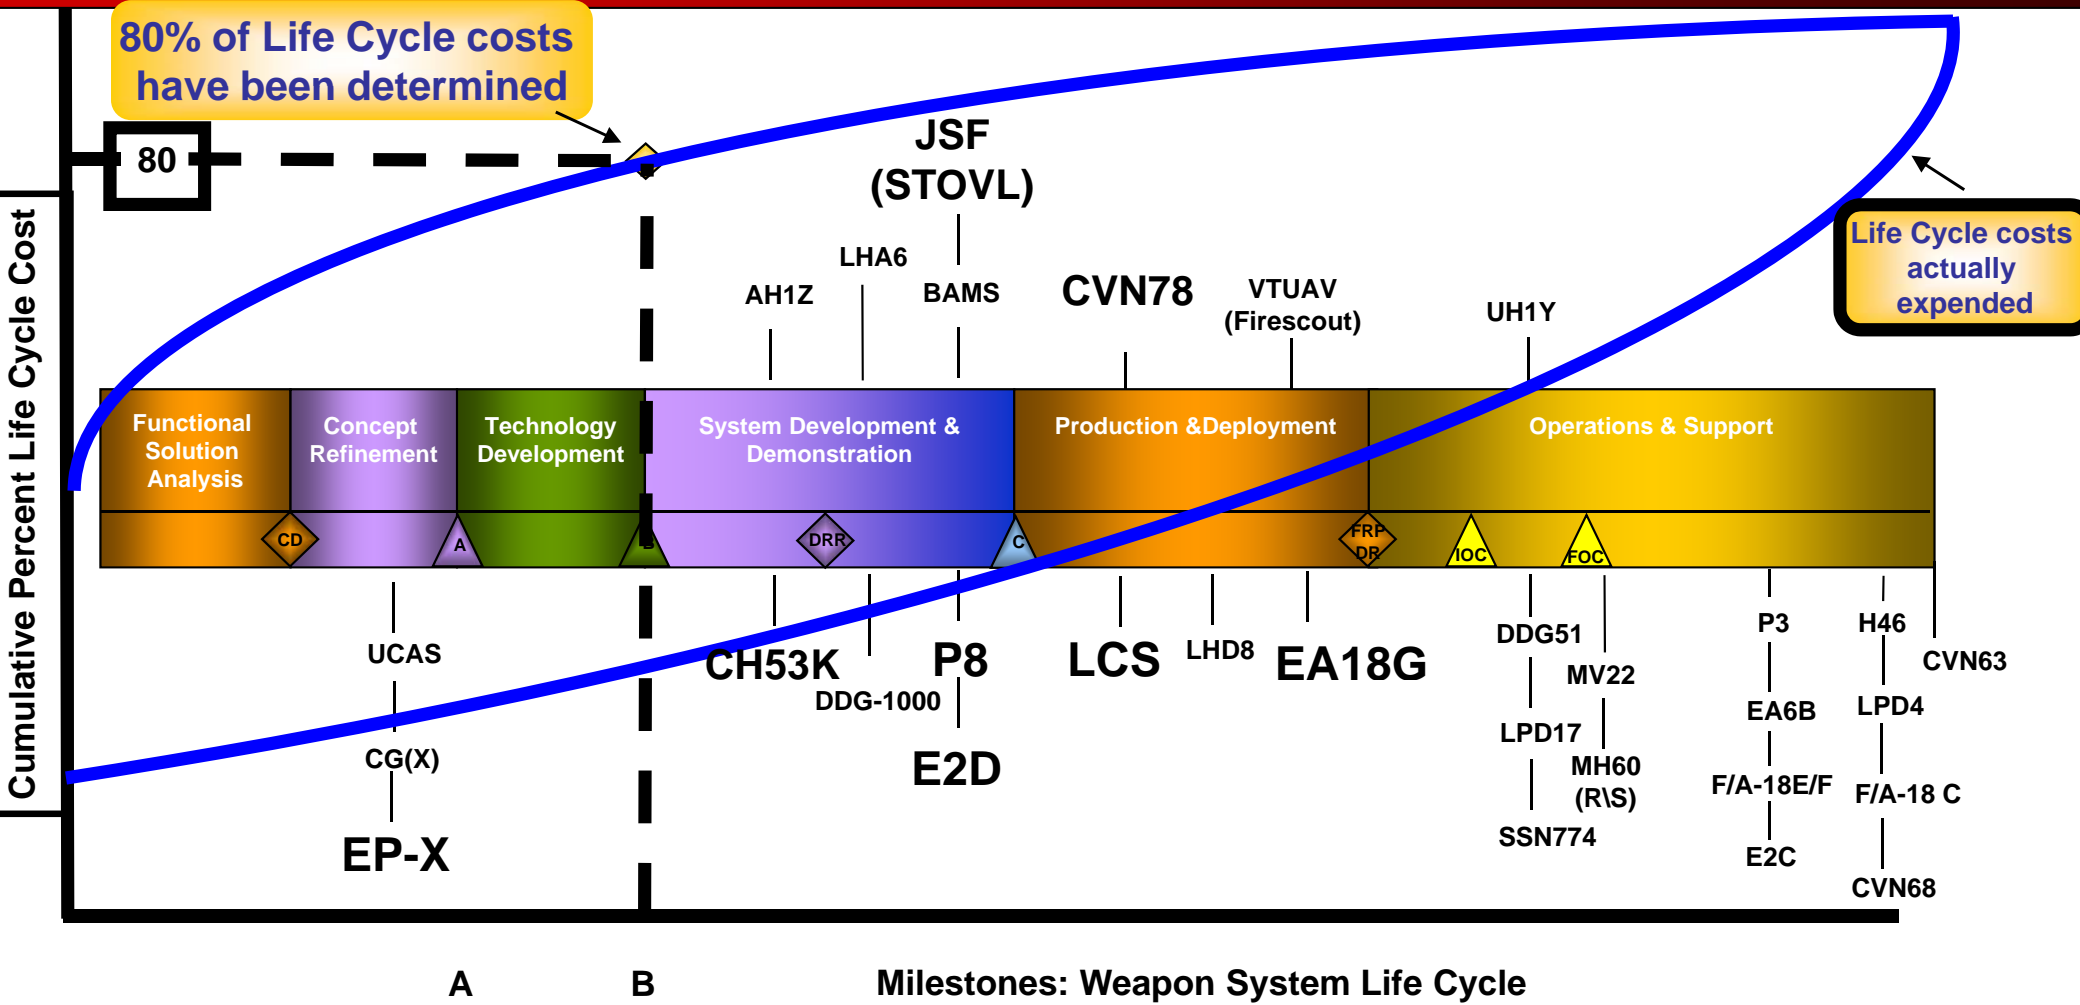

Presented at:
DoD Maintenance Symposium
27 October 2009

*RADM Ray Berube
Commander, Naval Inventory
Control Point*

Setting the Stage

- *Life cycle management responsibility in Navy resides with PEOs / PMs... NAVICP closely aligned*
- *Navy focusing on reducing total ownership costs (TOC)... budgets require optimized weapon systems*
- *Navy instituting a “Six Gate” review process... SECNAV 5000.2 / Acquisition Governance Board driving Gate Alignment ... injects TOC considerations early and throughout weapon system life cycle*

Weapon Systems Profile... Most Platforms Post-Milestone B... Significant Cost Already Locked In

PBL Responsibilities

- *PBL is fully incorporated into the Integrated Supply System... assets are reported, normal requisition processing, carcass tracking, and billing procedures apply*
- *All PBLs in compliance with Core requirements... organic depot capability and workload maintained*
- *NAVICP remains the designated Logistics Manager for all items on the PBL contract*
- *Program Manager is single “belly-button” for warfighter support*
- *PBL supports the existing maintenance concept, often three-level... existing or planned “intermediate” level maintenance capability incorporated*

*Not Contractor
Logistics
Support (CLS)*

**Program Office / Government Is the “PSM”...
PBL Contractor Is the “PSI”**

PBL Responsibilities

- *PBL must incorporate organic depot capability*
- *Strategy satisfies Title 10 USC*
- *Partnerships are an effective use of FRC / depot-level expertise combined with industry know-how*
 - *Sharing of best business practices promoted*
 - *Reliability improvements / tech insertions encouraged*
 - *Government and industry are true partners, not competitors*
 - *Improved readiness at reduced costs*
- *Ensures sustainment of organic capability and artisan expertise*

**Navy Perspective in Line with H.R 2647,
Sec. 850 Definitions of PSM / PSI**

- *Focus is on use of existing infrastructure*
- *Combines best practices of both government and industry*
- *Navy Program Manager remains the single “belly-button” for support*
- *The PBL Solution...*
 - *Integrated supply chain*
 - *Better availability... faster response*
