

## SAE 2006 General Aviation Technology Conference & Exhibition

August 29–31, 2006  
Century II Convention Center  
Wichita, Kansas, USA

Help your company reach new heights by attending one of the world's largest aviation technical forums.

**Tremendous value at no cost to you!**

This pass is valid for FREE admission to the SAE 2006 General Aviation Technology Conference & Exhibition.

Bringing together top industry decision-makers – including corporate executives, engineers, researchers and production personnel – this must-attend event will focus on the key issues facing the aviation industry, including:

- Aging Aircraft
- Composite Materials, Processing
- Personal Air Vehicles
- Special-Purpose Aircraft

You are cordially invited to be our guest at the General Aviation Technology Conference & Exhibition.

Network. Learn. Improve.  
*Soar...*

### Exhibition Hours

Wednesday, August 30:

11:00 a.m.–1:30 p.m. and 5:00–7:00 p.m.

Thursday, August 31:

11:00 a.m.–1:30 p.m. and 5:00–7:00 p.m.

### Register online...it's easy!

- Go to [www.sae.org/gatc](http://www.sae.org/gatc)
- Click on “Register”
- Click on “Attendee”
- Enter your user ID and password (if known) or click on “Need a User ID and Password to Login”
- Complete required information
- Select “Complimentary Exhibit Pass”
- Use promo code: GATC2006EP

060561

Tremendous  
value!

**ADMIT ONE**  
Complimentary Exhibit Pass

# Don't miss this chance to see the latest industry technologies at the SAE 2006 General Aviation Technology Conference & Exhibition!

## Who Should Attend

Leading representatives in the aviation industry including designers, engineers, manufacturing experts, supply chain analysts, procurement managers and top management will have the opportunity to learn about and see the latest developments that are being incorporated into the production lines of today and tomorrow.

## Top Management Panel

*Implications of Partnering and Outsourcing of Aircraft Systems on OEM Engineers*

Panel Host: David H. Riemer  
Vice President  
Product Development and Engineering  
Raytheon Aircraft Company

Wednesday, August 30 – 4:00-5:30 p.m.

The General Aviation Industry is undergoing a fundamental change to the product development process. More and more, OEMs are relying on “systems” suppliers for design, vehicle integration, development and even certification. This poses new challenges for both the OEM engineers as well as the Systems Suppliers.

The GATC 2006 Top Management Panel has been selected from a cross-section of OEMs and Tier 1 Systems Suppliers. This distinguished group will be providing insights, expectations and recommendations to the aerospace engineering community at the event.

Visit [www.sae.org/gatc](http://www.sae.org/gatc) for online registration and event updates.
