

**2007 Noise and Vibration Conference
Science Fair Call for Displays**

TO: Noise and vibration experts
From: SAE 2007 Noise and Vibration Conference
Acoustical Materials Committee
RE: Solicitation for Science Fair Displays

The SAE 2007 Noise and Vibration Conference will be held at Pheasant Run Resort in St. Charles, IL. Dates are May 14-17, 2007 and it is now time to submit proposals for the Science Fair. The 2007 theme is:

"Sound Concepts: Engineering Acoustics into the Vehicle"

The display can be hands-on, a video demonstration, or a collection of acoustical materials and testing equipment demonstrating the multitude of engineering efforts being used in the field of acoustics. The display should include as much information as possible. To insure the success of the Science Fair; submitters who displayed at past conferences are encouraged to propose displaying their displays again - since many of the attendees will be "first timers" - new to the field. Any and all displays will be beneficial to the overall atmosphere of the conference. Submissions will be subjected to a selection process. Displays will be voted on by attendees for "Best of Show" which be awarded at the Wednesday luncheon.

- **Objective:** The display is to provide a learning experience regarding acoustic material and technology. It should be directed at the Engineer or Technician level (who may be naive with respect to N&V materials) the display should be self explanatory, easy to operate and aimed at an individual or a group of 2-3 people.
- **Criteria:** The display **CAN NOT** promote a specific product or company (though sponsor's name/company is allowed). Only one display per entrant will be considered and selected based upon educational content, originality, significance and overall contribution to the conference and acoustics.
- **Themes:** Some possible appropriate themes may include:
Damping - Sound Barriers - Absorbers - Sealing - Isolation
- **Logistics:** The exhibit must be self-contained and fit on a 30" x 48" table covers and skirting will be provided. Electrical power is provided, but an extension cord provision is recommended.
- **The distribution of SAE copyrighted publications is strictly prohibited at the display location.**

Please submit your proposal no later than November 17th 2006 to:

David Reed / 2007 Science Fair Chair
C/o Janesville-Sackner Group
