Disc Brake Squeal – Mechanism, Analysis, Evaluation, and Reduction/Prevention

This publication provides an outline of the basic theories and analytical techniques covering disc brake squeal with an emphasis on application. Chapters written by professional and academic experts in the field cover:

- Analytical Modeling and Analysis
- CAE Modeling and Numerical Methods, Techniques for Dynamometer and Road Test Evaluation
- Critical Parameters that Contribute to Brake Squeal
- Robust Design Processes to Reduce/Prevent Brake Squeal via Up-front Design
- and more!

ISBN: 978-0-7680-1248-4

SAE Member: \$79.96

Non-member: \$99.95

Product Code: R-353

Advancements in Steering Systems; Braking Systems; and Advanced Chassis Control and Rollover Stability

This publication contains 12 papers that address new developments in commercial vehicle steering such as auxiliary axle and computer controlled systems, as well as studies on regenerative brake systems and a new modeling technique that examines brake configuration packages for reducing stopping distances. It also includes new information on advanced control systems for enhancing stability and safety in road vehicles, and its effect on suspension kinematic characteristics.

ISBN: 978-0-7680-2092-2

Brake Technology Handbook

In a single source, this book provides comprehensive coverage of the current state-of-the-art, as well as the future, of brakes and braking systems. Translated and completely updated from the landmark German-language work Bremsenhandbuch, it covers brake system fundamentals, requirements, design, construction, components, and subsystem functions for vehicles of all types (including passenger cars, commercial vehicles, off-road vehicles, motorcycles, racing vehicles and even aircraft).

Subjects covered include:

- mechatronics
- materials
- processes
- and more

ISBN: 978-0-7680-1787-8

SAE Member: \$95.96

Non-member: \$119.95

Product Code: R-375

Rollover of Heavy Commercial Vehicles

This Research Report takes an in-depth look at the mechanics and contributing factors to rollover accidents and helps to identify prevention strategies. Illustrated by diagrams, tables, and charts, the research presented in this book covers the following topics:

- Rollover Accidents and Vehicle Roll Stability
- The Mechanics of Static Roll Stability
- Dynamic Considerations of Rollover of Heavy Vehicles
- The Influence of Sloshing Liquids and other Moving Loads
- Rollover and the Intelligent Highway/Vehicle System

ISBN: 978-0-7680-0626-1

SAE Member: \$31.96

Non-member: \$39.95

Product Code: RR-004

SAE Seminars and e-Seminars

Commercial Vehicle Braking Systems – Product #: C0233

Also available as an e-Seminar! - Product # PD130611

SAE Members: \$1,265
Non-members: \$1,395

NEW! Fundamentals of Heavy Truck Dynamics – Product #: C0837

SAE Members: \$1,225
Non-members: \$1,355

Applied Brake Controls: ABS, TCS, and ESC – Product #: C0610

SAE Members: \$1,725
Non-members: \$1,850

SAE 2009 Commercial Vehicle Engineering Congress & Exhibition

October 6 – 8, 2009

**Donald E. Stephens Convention Center
Rosemont (Chicago), Illinois USA**

The conference of choice for the sharing of technical
knowledge and networking for the global on- and off-
road Commercial Vehicle Industry.

Heavy Duty Diesel Emissions Control Symposium

September 16 - 17, 2009

Göteborg, Sweden

Be an integral part of the solution! Join us for this two-day
information-packed event and interact with the most knowledgeable
leaders from the global heavy duty diesel powertrain industry to
discuss the pathways to emissions compliance and strategies that are
currently under investigation for the heavy truck and bus sector.

SAE J1939

Standards Collection on the Web

The Real-Time CAN Solution for Commercial Vehicle Applications

Continually updated, web-based
subscription service featuring:

- 13 Core J1939 Standards
- Related Standards and SAE Technical Papers
- J1939 Companion Spreadsheet
