International Aerospace Quality Group Aligns with Supplier Excellence Alliance

The International Aerospace Quality Group (IAQG) is pleased to announce that it has agreed to align its efforts in improving aerospace industry performance with the Supplier Excellence Alliance (SEA). The alliance between the two aerospace trade associations has been formed to focus on rapidly advancing their mutual goals of improving the industries ability to deliver aerospace products on quality, on time and on cost. The organizations will coordinate resources and activities to avoid duplication of effort and increase speed of implementation of processes used by global aerospace and defense supplier companies.

As an alliance of leading industry prime contractors, tier-ones, and suppliers, SEA's purpose is to accelerate supply chain performance by deploying a common lean business system (SEA Lean Enterprise System) throughout all member supply chains. IAQG's purpose is to implement initiatives that make significant improvements in quality and reductions in cost throughout the value stream by establishing and maintaining dynamic cooperation between international aerospace and defense companies.

IAQG and SEA share many of the same aerospace industry companies as members, and see several opportunities to work together in accelerating improvement projects being deployed by their organizations throughout the supply chain.
