

EAQG OPMT Approved Training Providers List – 27 April 2012

General:

All EAQG OPMT Approved Training Courses are approved according to the requirements of EN 9104-003. Any Training Provider wishing to apply to be approved or have the list of approved courses extended should apply to the Training Provider Approval Body (TPAB) within their national Certification Body Management Committee (CBMC).

This list of approved TPs includes information on approved training courses that relate to two different editions of the Aerospace Quality Management System (AQMS) standards:

- Approved training courses that relate to the published standards EN 9100:2009, EN 9110:2009 and EN 9120:2009 are listed in the section for each TP titled '**2009 Editions Approved Courses**'.
- A3 and A4 Industry Specific Courses are not directly based on a particular AQMS and are applicable to all editions of the AQMS standards published and are listed in the section for each TP titled '**EN 9104-3 Courses Approved**'.

Users of this list of approved TPs should take care to select a Training Provider that meets their requirements. No liability will be accepted by the EAQG or EAQG OPMT for inappropriate selections based on the contents of this list.

This list will be updated periodically.

Approved Training Providers:

There are currently no EAQG OPMT approved Training Providers (TPs) in the following European countries operating a Certification Body Management Committee (CBMC):

- Austria
- Germany
- Switzerland

The list of Training Providers approved by the national CBMC and recognised by the EAQG OPMT are detailed alphabetically within approving country on the following pages:
