

Human Factors in Traffic Safety

Second Edition

List of Chapters:

Preface

Chapter 1: Introduction

- 1.1 Human Factors
- 1.2 The Driving Task
- 1.3 System Elements
 - A. The road user
 - B. The vehicle
 - C. The road
- 1.4 The Investigation of Motor Vehicle Accidents

References

Part I: The Driver

Chapter 2: Perception and Information Processing

- 2.1 Introduction
- 2.2 Perception
 - A. Background
 - B. The eye
 - C. Photometric terms
 - D. Contrast
- 2.3 Perception of the Road
 - A. Drivers' appreciation of the roadway environment
 - B. Hazard detection and recognition
 - C. The impact of adverse weather
 - D. Nighttime conditions
- 2.4 Visual Search
 - A. Drivers' field of view
 - B. Useful field of view
- 2.5 The Perception of Speed
 - A. The role of speed in driving
 - B. How speed information is used
 - C. Speed perception and road characteristics
 - D. Speed perception and vehicle size
 - E. Speed adaptation
 - F. Motion sensitivity
- 2.6 Car Following
- 2.7 Rear-end Collisions
- 2.8 Auditory and Other Sensory Information
- 2.9 Information Processing and Accidents
- 2.10 Driver Attention and Workload
- 2.11 Steering

2.12 Positive Guidance

- A. The basic concept
- B. Task complexity
- C. Principles of information placement
- D. Expectancy

2.13 Summary

References

Chapter 3: Driver Perception-Response Time

- 3.1 Introduction
 - 3.2 Background
 - A. Definition
 - B. Stages of perception-response time
 - 3.3 Human Perception-Response Time
 - A. Background
 - B. Driver perception-response time
 - 3.4 Decision Sight Distance
 - 3.5 Overview of Research
 - 3.6 Factors Affecting Perception-Response Time
 - A. Detection
 - B. Identification
 - C. Decision
 - D. Response
 - E. Night versus day
 - F. Chemicals and driver fatigue
 - G. Age and gender
 - H. Cognitive load
 - 3.7 Special Situations
 - A. No clearly defined entry
 - B. Erroneous assumption or identification
 - 3.8 Summary and Conclusions
- References
- #### Chapter 4: Where Do Drivers Look While Driving (and for How Long)?
- 4.1 How Is Glance Behavior Described?
 - A. What are the terms used to describe glance behavior?
 - B. What are some general characteristics of driver glance behavior?
 - C. How is glance behavior measured?

Human Factors in Traffic Safety

Second Edition

- 4.2 Why Are Eye Fixations of Interest?
 - A. Does visual demand actually relate to crashes?
 - B. Does looking at an object guarantee the object is noticed?
- 4.3 What Is Typical Looking Behavior?
- 4.4 How Is Glance Behavior Affected by the Road Environment?
 - A. Where do drivers look when driving curves?
 - B. How do traffic and other external demands affect where drivers look?
 - C. How have eye fixation data been used to assess the merits of road and vehicle markings, and signs?
- 4.5 How Does Glance Behavior Change with Driver Characteristics?
 - A. How does glance behavior change with driving experience?
 - B. What is the effect of fatigue on glance behavior?
 - C. How do alcohol and other drugs affect eye movements?
- 4.6 What Is the Impact of Vehicle Characteristics on Glance Behavior?
 - A. How do eye glance patterns vary as a function of the vehicle driven?
 - B. How does scene illumination alter glance characteristics?
- 4.7 How Might In-Vehicle Devices Impact Driving?
 - A. What is typical looking behavior for in-vehicle devices?
 - B. How long can drivers look at the vehicle interior?
- 4.8 Conclusions
- 4.9 A Final Thought
- References
- Chapter 5: Individual Differences**
- 5.1 Introduction
- 5.2 Personality
- 5.3 Emotions
- 5.4 Impact on Victims and Families
- 5.5 Stress
- 5.6 Aggressive Driving and “Road Rage”
- 5.7 Motivation
- 5.8 Risk Taking
- 5.9 Self-Assessment of Driving Skills
- 5.10 Behavioral Compensation
- 5.11 Social Factors
- 5.12 Driver Attitudes
- 5.13 Gender Differences
- 5.14 Driving Experience
- 5.15 Physical Factors and Motor Skills
 - A. The role of motor control in driving
 - B. Physical disabilities
 - C. Age-related deficits
- 5.16 Conclusions
- References
- Chapter 6: Fatigue and Driving**
- 6.1 Introduction
 - A. Definitions of fatigue
 - B. Measurement of fatigue
 - C. Causes of fatigue
 - D. The extent of the fatigue problem
 - E. Fatigue and crashes
- 6.2 Long Hours
 - A. Arousal and performance
 - B. Crash risk
 - C. Summary
- 6.3 Time of day
 - A. Sleepiness
 - B. Performance
 - C. Crash risk
 - D. Summary
- 6.4 Inadequate Sleep
 - A. Performance
 - B. Crash risk
 - C. Summary
- 6.5 Countermeasures to Sleepiness
 - A. Rest breaks
 - B. Food
 - C. Caffeine
 - D. Naps
 - E. Education
 - F. ITS countermeasures
 - G. Rumble strips
 - H. Summary
- 6.6 Conclusion
- Additional Reading
- References
- Chapter 7: Alcohol and Drugs**
- 7.1 Introduction
- 7.2 Alcohol Use While Driving
- 7.3 Alcohol and Accidents
- 7.4 Single Vehicle Collisions
- 7.5 Measures of Intoxication
- 7.6 Driving Abilities Impaired by Alcohol
- 7.7 Rate of Alcohol Consumption
- 7.8 Alcohol and Fatigue

Human Factors in Traffic Safety

Second Edition

- 7.9 Alcohol and Aggression
- 7.10 Alcohol and Degree of Injury
- 7.11 Drug Effects

Endnotes

References

Chapter 8: Age Differences-Drivers Young and Old

- 8.1 Older Drivers
 - A. Introduction
 - B. Demographics of older drivers
 - C. Older driver crashes
 - D. Difficulties experienced by older drivers
 - E. Increased vulnerability of the elderly
 - F. Sensory and perceptual changes
 - G. Attention
 - H. Memory
 - I. Psychomotor performance
 - J. Stress
 - K. Improvement with training
- 8.2 Young Drivers
 - A. Introduction
 - B. Dangerous driving behaviors
 - C. Influence of young passengers
 - D. Alcohol
 - E. Perception of dangerous situations
 - F. Self perception
 - G. Motivation and emotion
 - H. Gender differences
 - I. Potential countermeasures
- 8.3 Conclusion

References

Chapter 9: Neuropsychological, Medical and Psychiatric Disorders and Motor Vehicle Operations

- 9.1 Our Right to Drive and Our Right to be Safe: Two Competing Interests
- 9.2 Regulatory and Legal Factors Relating to Disability and Automobile Driving
- 9.3 The Americans with Disability Act and Constitutional Analysis
- 9.4 Failure to Warn and the Special Relationship of Healthcare Providers
- 9.5 Risk Assessment, Risk Communication, and Risk Management
- 9.6 Accident Risk Associated With Neuropsychological and General Medical Disorders
 - A. Aging and “Full-Timing”
 - B. Traumatic brain injury
 - C. Psychiatric disorders and cultural

- trends
- D. Psychotropic medications
- E. Attention deficit disorder
- F. Road rage
- G. Cellphones
- H. Huntington’s disease
- I. Epilepsy
- J. Visual disorders
- K. Spina bifida
- L. Cardiac disorders
- M. Diabetes
- N. Conclusions on diabetes
- O. Dyssomnias
- P. Aphasia and stroke/cerebral vascular accidents

9.7 Adaptive Driving Programs And Medical Decisions

- A. Adaptive programs
- B. Simulator training

9.8 Assessment Issues

- A. The cognitive behavioral driver’s test
- B. The Neurocognitive Driving Test
- C. The Drivers’ Neuropsychological Rating Scale
- D. Working with the family unit
- E. Multi-stage decision models
- F. The “Four E’s”

9.9 Conclusions

9.10 Agencies of Interest

References

Chapter 10: Driver Distraction

- 10.1 Introduction
- 10.2 Definitions of Driver Distraction
- 10.3 What is the Scope of the Driver Distraction Problem?
 - A. The 100-Car Study of Inattention
 - B. Distraction, Crash Configurations and Environmental Conditions
- 10.4 Cell Phones and Driving
 - A. Epidemiological Studies of Cell Phone Crash Risk
 - B. Observation and Self-Report of Cell Phone Use While Driving
 - C. Driver Performance While Using Cellular Phones
 - D. Response Time
 - E. Dialing and Answering
 - F. Handheld versus Hands-free Cell Phones
 - G. Conversation

Human Factors in Traffic Safety

Second Edition

- H. Age Differences
- I. Passengers versus Cell Phone Conversation
- J. Cell Phone Case Studies
- K. Summary of Cell Phone Research
- 10.5 Other In-Vehicle Distractions
 - A. New Technologies
 - B. Radio, CD, MP3 Players
 - C. Navigation and Route Guidance Systems
 - D. DVD Players, Text Messaging & Email
 - E. Multiple Functions, Systems and Willingness to Engage
- 10.6 External Distractions
 - A. Roadside advertising
 - B. Visual clutter
- 10.7 Countermeasures for Driver Distraction
 - A. Legislation and Regulation
 - B. Corporate/Private Sector
 - C. Education and Licensing
 - D. Social Norms
 - E. Cell Phone and Telematic Design
- 10.8 Conclusions
- Acknowledgments
- References
- Chapter 11: Driver Education, Training, and Licensing**
- 11.1 Introduction
- 11.2 Background
- 11.3 Traditional Driver Education
 - A. Instructors and trainers
 - B. Trainer qualifications
- 11.4 What We Know
 - A. Early licensure
 - B. Good driver?
 - C. Skid control and advanced skill development
 - D. Simulation & computer-based training
 - E. Motivation and insight
 - F. Reasons to take driver education
 - G. Formal and informal rules
- 11.5 Perception and Cognition
 - A. Perception
 - B. Cognition
- 11.6 Language
- 11.7 Graduated Driver Licensing (GDL)
 - A. Introduction
 - B. Incentives
 - C. Embedding Driver Education in a GDL

- 11.8 Parental Involvement
- 11.9 New Directions
- 11.10 The Paradigmatic Shift
- 11.11 Conclusion
- References
- Part II: The Vehicle**
- Chapter 12: Vehicle Design**
- 12.1 Introduction
- 12.2 Requirements of the Driving Task
- 12.3 Anthropometry
- 12.4 Controls
- 12.5 Displays
- 12.6 Visibility from Within the Vehicle
- 12.7 Visibility of Other Vehicles
 - A. Daytime-running lights
 - B. Emergency vehicles
- 12.8 Trucks
- 12.9 Traffic Control Devices Relevant to Truck Operators
- 12.10 Motorcycles
- 12.11 Agricultural Vehicles
- 12.12 All-Terrain Vehicles
- 12.13 Vehicle Size and Safety
- 12.14 Safety Belts
- 12.15 Antilock Brake Systems
- 12.16 In-Vehicle Information Systems (IVIS)
- 12.17 Noise
- 12.18 Vibration
- 12.19 Older Drivers
- 12.20 Driving Vehicles of the Future
- 12.21 Conclusion
- References
- Chapter 13: Visibility with Motor Vehicle Headlamps**
- 13.1 Introduction
- 13.2 The Importance of Target Contrast
 - A. Definition
 - B. Calculating contrast
- 13.3 The Reflectivity of Objects in the Real World
- 13.4 Driver Vision at Night
 - A. Vehicle lighting systems
 - B. The visibility provided by automotive headlamps
 - C. Correction for expectancy
- 13.5 Nighttime Driving Speeds
- 13.6 Overdriving of Headlamps
- 13.7 Overview
- Endnotes
- References

Human Factors in Traffic Safety

Second Edition

Part III: The Roadway Environment

Chapter 14: Roadway Design

- 14.1 Introduction
- 14.2 Perception of the Road
- 14.3 Highway Hypnosis
- 14.4 Driver Workload and Roadway Design
- 14.5 Sight Distance
- 14.6 Roadway Width
- 14.7 Grades
- 14.8 Intersections
- 14.9 Bridges
- 14.10 Roundabouts
- 14.11 Curves
- 14.12 Rural Roads
- 14.13 Safety Countermeasures
 - A. Traffic calming
 - B. One-way streets
 - C. Other engineering solutions
- 14.14 Road Design and Accident Litigation
- 14.15 Conclusion

References

Chapter 15: Traffic Control Devices

- 15.1 Introduction
- 15.2 Criteria for Effective TCDs
 - A. Conspicuity
 - B. Legibility distance
 - C. Glance legibility
 - D. Comprehension
 - E. Response time
 - F. Other criteria
- 15.3 Problems with TCDs
- 15.4 Signs
 - A. The importance of signs
 - B. Classification of signs
 - C. Symbol signs
 - D. Word signs
 - E. Changeable message signs
 - F. Bilingual signs
- 15.5 Signals
- 15.6 Pavement Markings
- 15.7 Rumble Strips and Speed Bumps
- 15.8 Post Delineators
- 15.9 Supplemental Warning Information
- 15.10 Environmental Factors
- 15.11 Aging and TCD Effectiveness
- 15.12 Cross-Cultural Comprehension of TCDs
- 15.13 Compliance with Traffic Control Devices
- 15.14 Methods for the Evaluation of TCDs
- 15.15 Conclusion

References

Chapter 16: Visibility Under Roadway Lighting

- 16.1 Introduction
 - A. The purpose of roadway lighting
 - B. Sources of lighting
- 16.2 Definitions and Concepts
 - A. Basic lighting definitions
 - B. Lighting concepts
 - C. Visibility measures
- 16.3 Performance of Roadway Lighting
 - A. Background
 - B. Effects of roadway lighting on nighttime visibility
 - C. Effects of roadway lighting on nighttime safety
 - D. Effects of roadway lighting on nighttime traffic operations
 - E. Effects of roadway lighting on nighttime security and crime
 - F. Other effects of roadway lighting
- 16.4 History of Criteria and Standards for Roadway Lighting
 - A. History of roadway lighting standards
 - B. Other roadway lighting standards
 - C. Legal issues
- 16.5 Types of Roadway Lighting
 - A. Sources of roadway lighting
 - B. Roadway lighting geometry
 - C. Distribution of light
 - D. Other factors
- 16.6 Methods for Assessing Roadway Lighting
 - A. Introduction
 - B. Calculations and computer predictions
 - C. Measurement of roadway lighting
 - D. Field evaluations of roadway lighting
- 16.7 Summary

References

Chapter 17: Environmental Factors

- 17.1 Introduction
- 17.2 The Hours of Darkness
- 17.3 Twilight
- 17.4 Adverse Weather
- 17.5 Effects of Restricted Visibility
- 17.6 Driver Behavior in Fog
- 17.7 Conclusion

References

Human Factors in Traffic Safety

Second Edition

Chapter 18: Railroad Grade Crossing Accidents

- 18.1 Introduction
- 18.2 The Accident Picture
- 18.3 Driver Behavior at Grade Crossings
- 18.4 Driver Perception of Railroad Crossing Hazards
- 18.5 Decision Errors
- 18.6 Attempting to “Beat the Train” Across the Tracks
- 18.7 Traffic Control Devices
- 18.8 Pedestrian Safety
- 18.9 Countermeasures
- 18.10 Conclusion

References

Chapter 19: Highway Work Zones

- 19.1 Human Factors and Work Zones
- 19.2 Accidents in Work Zones
 - A. Problems with accident data
 - B. The accident picture
- 19.3 Driver Information in Work Zones
- 19.4 Speed Selection and Control
- 19.5 Nighttime Conditions
- 19.6 Driver Behavior and Opinions
- 19.7 Older Drivers
- 19.8 Pedestrians in Work Zones
 - A. Background
 - B. Pedestrian and worker accident problem
 - C. The pedestrian in a work zone environment
 - D. Conspicuous work zone attire
 - E. Traffic control treatments
 - F. Pedestrian safety treatments
- 19.9 Trucks in Work Zones
- 19.10 Lane and Shoulder Width
- 19.11 Traffic Control Devices
- 19.12 ITS Applications in Work Zones
 - A. National ITS Architecture
 - B. Objectives and benefits of ITS work zone applications
 - C. Case studies and evaluations of ITS work zone applications
 - D. Summary of ITS work zone applications
- 19.13 Safety Countermeasures
- 19.14 Conclusions

References

Part IV: Accident Causation and Remediation

Chapter 20: Pedestrians and Bicyclists

- 20.1 Pedestrian Safety
- 20.2 The Pedestrian’s Task
- 20.3 Pedestrian Accidents
- 20.4 Driver and Pedestrian Behavior
- 20.5 Distracted Pedestrians
- 20.6 Alcohol Use
- 20.7 Left-turning Accidents
- 20.8 Walking Speed
- 20.9 Disabled Pedestrians
- 20.10 Older Pedestrians
- 20.11 Child Pedestrians
- 20.12 Nighttime Conditions
- 20.13 Winter Conditions
- 20.14 Social Factors
- 20.15 Roadway Design
- 20.16 Pedestrian Signs, Signals, and Markings
- 20.17 Intelligent Transportation Systems and Pedestrian Safety
- 20.18 Safety Countermeasures
- 20.19 Bicycle Safety
- 20.20 Cyclists’ Perception of Risk
- 20.21 Cyclists’ Behavior
- 20.22 Older Cyclists
- 20.23 Road and Environment Factors
- 20.24 ITS and Bicycle Safety
- 20.25 Other Non-motorized Transportation Modes
 - A. In-line skates
 - B. Heelys
 - C. Skateboards
 - D. Scooters
 - E. Segways
- 20.26 Conclusion

References

Chapter 21: Left-Turn and Gap Acceptance Crashes

- 21.1 Introduction
- 21.2 Definitions and Task Analysis
- 21.3 Left-turn Crash Patterns
- 21.4 Gap Acceptance Crash Patterns
- 21.5 Motorcycles, Small Vehicles, Bicycles, and Pedestrians
- 21.6 Age Differences in Left-turn and Gap Acceptance Crashes
- 21.7 Driver Citations and Error
- 21.8 Left Turn Driving Simulation and Field Studies
- 21.9 Gap Acceptance Studies

Human Factors in Traffic Safety

Second Edition

21.10 Perception of Oncoming and Cross Traffic

21.11 Signals and Intersection Design

21.12 Conclusions

Acknowledgments

Endnotes

References

Chapter 22: Single-Vehicle Accidents

22.1 Introduction

22.2 Characteristics

22.3 Suicide?

22.4 Remedial Measures

22.5 Summary

References

Chapter 23: Eyewitnesses to Accidents: The Factors that Determine Accuracy

23.1 Introduction

23.2 Observing and Encoding Events into Memory

A. Observational point of view and perceptual adequacy

B. Allocation of attention

C. Involuntary focus of attention

D. Knowledge, familiarity and expertise with the content of the event

E. Witness expectations and interpretation of the event

F. Alcohol and encoding

23.3 Retaining the Memory for Observed Events

A. The inevitably wrong focus of autobiographical memory

B. Systematic changes in the content of memory with each repetition

C. Post-event information can create new (and potentially false) memories

23.4 Forgetting of Memory

A. Without the proper retrieval cues, recall may fail

B. Memory failures can result from psychogenic memory blocks

C. Memory failures can result from physical trauma

23.5 How to Improve Recall

A. Additional retrieval cues improve recall

B. Psychotherapy, relaxation and hypnosis improve recall

C. Healing with time normally reduces amnesia following head injury

23.6 Memory for Everyday and Unusual Events Differs in Accuracy

23.7 Do Some People Have Better Memories than Others?

A. Mnemonic systems and training to improve memory

B. Individual differences in suggestibility

C. The memory of children

D. Aging and memory

23.8 The Surprising Lack of a Relationship between Confidence and Accuracy

23.9 When Are Two Witnesses Better than One?

23.10 Summary

References

Endnotes

Chapter 24: Human Factors in Traffic Accident Litigation

24.1 Introduction

24.2 The Profession

24.3 Hazards in Vehicle Operation

24.4 Designing for Whom?

24.5 Admissibility of Evidence from a Human Factors Expert

24.6 What the Human Factors Expert has to Offer the Lawyer

24.7 Locating Suitably Qualified Human Factors Experts
