

Table of Contents

Introduction	xi
---------------------------	-----------

William Messner

1. Sensors	1
-------------------------	----------

Greg Kogut

1.1 Introduction	1
1.2 The History of Automotive Sensors	2
1.3 Proprioceptive Sensors	3
1.3.1 Speed and Position Sensors	3
1.3.2 Accelerometers	4
1.3.3 Yaw-Rate Sensors (Gyroscopic)	4
1.4 Exteroceptive Sensors	5
1.4.1 Vision Sensors	6
1.5 Sensor Fusion	11
1.6 Sensor Processing	12
1.7 Conclusion	13
1.8 References	13

2. Automated Driving: For Real This Time?	15
--	-----------

Richard Bishop

2.1 Introduction	15
2.2 History: The Long Quest for the Self-Driving Car	16
2.3 Terminology	19
2.4 Industry Motivation	20
2.5 Technology Basis	21
2.5.1 Camera Sensors	21
2.5.2 Radar Sensors	23
2.5.3 Camera-Radar Sensor Fusion	23
2.5.4 Laser Scanners	24
2.5.5 Low-Latency Vehicle Communications (V2X)	24
2.5.6 Mapping	25
2.6 Operational Scenarios and Functional Requirements	25
2.6.1 Operating Scenarios	25
2.6.2 Functional Requirements	26
2.7 Industry Activity	26
2.7.1 Highway Driving	27
2.7.2 City Street Driving	30

2.7.3	Automated Valet Parking.....	32
2.7.4	Automated Operation on Unimproved Roads	32
2.7.5	Commentary	33
2.8	Government Stance.....	33
2.8.1	Asia.....	33
2.8.2	Europe.....	34
2.8.3	United States	35
2.8.4	Collaborative Efforts.....	35
2.9	Engineering and Human Factors Considerations.....	36
2.9.1	Situational Awareness	36
2.9.2	Automated Vehicle Behavior in Traffic	36
2.9.3	Test Methods.....	37
2.9.4	Exceeding Human Performance	37
2.9.5	Driver Monitoring.....	38
2.9.6	Effective Driver-Vehicle Interaction.....	39
2.10	Deployment Challenges.....	40
2.10.1	U.S. Legal Situation.....	40
2.10.2	European Legal Situation.....	41
2.10.3	Market Dynamics	41
2.11	Looking Down the Road.....	42
2.11.1	Considerations.....	42
2.11.2	Rollout.....	43
2.11.3	Infrastructure and the Public Sector Role.....	43
2.11.4	Cross-Industry Collaboration.....	44
2.12	Conclusion	44
2.13	References	45

3. Cargo and Freight 53

Dan Williams

3.1	Introduction.....	53
3.2	Technologies	56
3.2.1	Longitudinal Control Technologies	56
3.2.2	Lateral Control Technologies.....	58
3.2.3	Advanced Communication Technologies.....	61
3.3	Vehicle Applications.....	62
3.3.1	Automated Docking.....	62
3.3.2	Higher-Speed Headway Control and Platooning	63
3.3.3	An Incrementally Adopted Integrated Future.....	64
3.4	Summary.....	65
3.5	References	66

4. Agriculture Applications 69

Marcel Bergerman, John Billingsley, Eldert J. van Henten, Frits K. van Evert,
Bradley Hamner, John. F. Reid, Sanjiv Singh, and Stewart Moorhead

- 4.1 Introduction69
- 4.2 Agricultural Robotics70
 - 4.2.1 Challenges in Meeting Global Food Demand70
 - 4.2.2 From Mechanization to Autonomous Cyber-Physical Systems71
 - 4.2.3 Challenges for Robotics and Automation to Drive Mechanization
Toward Increased Productivity72
 - 4.2.4 Opportunities Ahead for Robotic Systems73
- 4.3 Autonomous Vehicles in Agriculture.....73
 - 4.3.1 Arable Farming.....73
 - 4.3.2 Fruit Production74
 - 4.3.3 Protected Cultivation.....77
 - 4.3.4 Pasture Management80
- 4.4 The Next Ten Years84
- 4.5 2020 and Beyond85
- 4.6 References86

5. Beyond Rosey: Consumer Robots in the 21st Century 89

Brian Yamauchi

- 5.1 Chapter Summary.....89
- 5.2 Introduction90
- 5.3 Indoor Home Robots91
- 5.4 Outdoor Home and Yard Robots.....93
- 5.5 Telepresence Robots.....94
- 5.6 Assistive Robots for the Elderly and Handicapped.....97
- 5.7 Humanoid Robots.....97
- 5.8 The Next Ten Years98
- 5.9 2020 and Beyond99
- 5.10 Conclusion100
- 5.11 References100

6. Landscaping Applications..... 101

Alex D. Foessel-Bunting and Justin A. Kraft

- 6.1 Chapter Summary.....101
- 6.2 Introduction102
 - 6.2.1 Autonomous Lawn Mowing102
 - 6.2.2 Trends Driving Technology Adoption.....103
 - 6.2.3 Value Proposition–Homeowner Customer104

6.2.4	Value Proposition–Commercial Customer	104
6.3	Requirements and Technologies	105
6.3.1	Environmental Requirements.....	105
6.3.2	Scheduling and Workflow.....	105
6.3.3	Functional Requirements	106
6.3.4	Positioning Technologies.....	107
6.3.5	Technology Scouting Opportunities.....	109
6.4	Selected Autonomous Landscaping Applications	110
6.4.1	Lawn Mowing Home Gardens.....	110
6.4.2	Mowing Large Turf and Sports Fields.....	111
6.4.3	Precise Stadium Mowing	112
6.4.4	Golf Course Maintenance.....	113
6.4.5	Advertisement and Art on the Turf	114
6.5	Commercialization Considerations.....	115
6.5.1	Balancing Technology and Service	115
6.6	2020 and Beyond: Commercial Opportunities	117
6.7	Conclusions.....	120
6.8	References	120

7. Unmanned Maritime Vehicles: New Options for Ocean Operations 123

Justin Manley and Thomas Altshuler

7.1	Introduction: Unmanned Maritime Vehicles	123
7.2	Remotely Operated Vehicles	125
7.3	Autonomous Underwater Vehicles	126
7.4	Autonomous Surface Vehicles	129
7.5	Rules of the Road	130
7.6	UMVs in Practice: Increasing Return on Investment in Ocean Operations	131
7.7	Today’s UMVs: A Stand-Alone Solution	132
7.7.1	Survey	132
7.7.2	Inspection	133
7.7.3	Observing	135
7.7.4	Connectivity	135
7.7.5	Today’s UMVs: A Glimpse of the Potential.....	135
7.8	The Future: Networked UMVs	136
7.8.1	Survey	137
7.8.2	Inspection	137
7.8.3	Observing	137
7.8.4	Connectivity.....	137
7.8.5	Apps for Ocean Operations	137

7.9 Conclusion	138
7.10 References	138

8. Unmanned Aircraft Systems in Environmental Monitoring Applications 139

Everett A. Hinkley, Vincent G. Ambrosia, and Steven S. Wegener

8.1 Chapter Summary.....	139
8.2 Introduction.....	140
8.3 Classification of UAS Platforms.....	141
8.4 Flight Regulations.....	143
8.4.1 Current Considerations in the United States	143
8.4.2 Looking Ahead to Future Regulations	144
8.5 UAS Applications in Environmental Monitoring	144
8.5.1 Wildfire Applications.....	145
8.5.2 Forest Health Monitoring.....	146
8.5.3 Wildlife Surveys	147
8.5.4 Air Quality Monitoring	148
8.5.5 Agriculture and Crop Monitoring	149
8.5.6 Water Science	149
8.5.7 Disaster Event Monitoring.....	150
8.6 Engineering Challenges	152
8.6.1 Safety – “Sense and Avoid”	152
8.6.2 Communications	152
8.7 The Next Ten Years	153
8.8 Conclusion	154
8.9 References	155

9. Privacy 157

Brett Davis

9.1 None of Your Business: Unmanned Systems and Privacy.....	157
9.1.1 Addressing Concerns.....	158
9.1.2 Proactive Guidelines	159
9.1.3 Privacy Legislation.....	161
9.1.4 Driverless Cars.....	162
9.1.5 Privacy Law for All Technologies	165
9.2 References	167

10. Conclusion 169

William Messner
