## 1. EXECUTIVE SUMMARY AND CONCLUSIONS

1.1. The value market for electric vehicles EVs of all types .................................................. 1
1.2. Profits ................................................................................................................................. 3
1.3. League table of largest EV manufacturers ...................................................................... 4
1.4. Market sectors and technology trends .............................................................................. 5
1.5. Small and Medium Enterprises SME come to the fore ..................................................... 8
1.6. Numbers of manufacturers ............................................................................................... 27
1.7. Stronger value growth, hybrids gain value share ............................................................... 27
1.8. Mark ups through the value chain .................................................................................... 29
1.9. Electric cars – the most unpredictable market ................................................................. 31
1.9.1. Pure electric cars ........................................................................................................... 32
1.9.2. Car-like vehicles not homologated as cars ................................................................. 32
1.9.3. The most unpredictable market ................................................................................... 35
1.9.4. Market drivers .............................................................................................................. 36
1.10. Market by territory ......................................................................................................... 40
1.10.1. Global ......................................................................................................................... 40
1.10.2. China .......................................................................................................................... 41
1.10.3. Pure electric vehicles in Europe .................................................................................. 43
1.10.4. USA ............................................................................................................................ 45
1.11. Lessons from three EV events in late 2013 .................................................................... 48

## 2. INTRODUCTION

2.1. Definitions and scope of this report .................................................................................. 53
2.1.1. Organisations involved in the EV industry value chain ............................................... 53
2.1.2. Commonality ................................................................................................................. 54
2.1.3. Key components and systems ..................................................................................... 55
2.2. Pure vs hybrid; on-road economics .................................................................................. 55
2.3. Hybrid electric vehicles .................................................................................................... 57
2.3.1. Here come range extenders ......................................................................................... 58
2.3.2. Hybrids at no price penalty ........................................................................................ 59
2.3.3. Born electric – in-wheel electric motors ...................................................................... 59
2.4. Born electric – smart skin, structural components ............................................................ 60
2.4.1. Smart skin .................................................................................................................... 60
2.4.2. Structural components ............................................................................................... 61
2.5. Objectives ........................................................................................................................ 62
2.6. Benefits ............................................................................................................................ 62
2.7. Electric vehicles become less poisonous ........................................................................... 63
2.7.1. How green are electric vehicles really? ....................................................................... 65
2.7.2. Contrast global automotive production 2012: major polluter ....................................... 68
## HEAVY INDUSTRIAL EVS

### What is included

### Challenges

### Listing of manufacturers

#### Statistics for all types of industrial lift truck

#### Manufacturers of heavy industrial EVs

### Market size

### Market forecasts 2013-2024

## LIGHT INDUSTRIAL, BUSES AND OTHER COMMERCIAL EVS

### What is included

#### Sub categories

#### Buses

#### Vans, pick-up trucks and larger on-road trucks

### Market drivers

#### Governments get involved

### Important initiatives

### EVs for local services

### Airport EVs: Ground Support Equipment GSE

### Small people-movers

### Light industrial aids

### Listing of manufacturers

### Market forecasts 2013-2024

## MOBILITY FOR THE DISABLED

### Compelling and enduring need

### The demographic time-bomb

#### Ageing population, obesity and the dependent elderly

#### Laws make mobility easier

### Types of mobility vehicle

#### Growth by new market segments

#### Interchina Industry Group China

### Market drivers

#### Geographical distribution

#### Needs creating new segments

#### What is driving regional differences?

#### Pride Mobility, USA

### Listing of manufacturers

### Market forecasts 2013-2024

#### Growth by creating new markets
6. TWO WHEELED EVS AND ALLIED VEHICLES

6.1. What is included
6.1.1. China - unprecedented growth of electric two wheelers
6.1.2. Other countries
6.2. Prices and performances compared
6.2.2. Hybrid motorcycles
6.3. Market drivers
6.3.1. Bicycles and electric bicycles
6.3.2. The big winners in western markets
6.4. Statistics for all bicycles
6.5. Listing of manufacturers
6.5.1. China
6.6. Market forecasts 2013-2024

7. CAR-LIKE VEHICLES NOT HOMOLOGATED AS CARS: MICROEV, QUADRICYCLE, E-TRIKE, NEV, GOLF CAR

7.1. Many names, common factors
7.2. Car-like vehicles that evade restrictions, taxes and other costs
7.3. Estrima Birò MicroEV Quadricycle removable battery
7.4. Philippines: big new commitments to e-trikes
7.5. Listing of manufacturers beyond golf cars
7.6. Golf cars
7.6.1. What is included
7.6.2. Market drivers
7.6.3. Prices and profits
7.6.4. Listing of manufacturers
7.6.5. Market forecasts 2013-2024

8. CARS

8.1. Adoption of electric cars
8.2. Rapid increase in number of manufacturers
8.3. Providing charging infrastructure
8.3.1. Recharging points
8.3.2. Battery changing points
8.3.3. Can the grid cope?
8.4. Market 2013-2024
8.5. National targets for plug-in (PHEV, BEV) on road vehicle sales 2010-2020
8.5.1. United Kingdom

9. PURE ELECTRIC CARS

9.1. Déjà Vu
9.1.1. Pure electric cars are a necessary part of the range?
### 9.2. Examples of pure EV cars

<table>
<thead>
<tr>
<th>9.2.1.</th>
<th>Renault-Nissan Alliance France, Japan</th>
</tr>
</thead>
<tbody>
<tr>
<td>9.2.2.</td>
<td>China</td>
</tr>
<tr>
<td>9.2.3.</td>
<td>High performance pure EVs – Tesla USA</td>
</tr>
<tr>
<td>9.2.4.</td>
<td>Pininfarina Bolloré Bluecar France, Italy</td>
</tr>
<tr>
<td>9.2.5.</td>
<td>REVA India</td>
</tr>
<tr>
<td>9.2.6.</td>
<td>Club Car USA</td>
</tr>
<tr>
<td>9.2.7.</td>
<td>Toyota Japan</td>
</tr>
</tbody>
</table>

### 10. HYBRID CARS

| 10.1. | Construction and advantages of hybrids |
| 10.2. | Evolution |
| 10.3. | Chevrolet Volt USA | 170 |
| 10.4. | Ford hybrids USA |
| 10.5. | Market drivers |
| 10.5.1. | Leading indicators |
| 10.6. | History of hybrids and planned models |

### 11. MILITARY

| 11.1. | Examples of military EVs |
| 11.1.1. | Hummer USA / China | 182 |
| 11.1.2. | Quantum Technologies USA Aggressor AMV |
| 11.1.3. | US Army trucks etc – ZAP, Columbia ParCar USA |
| 11.1.4. | Oshkosh Truck Corp USA |
| 11.1.5. | Plug-in trucks – BAE Systems UK |
| 11.1.6. | Electric robot vehicles USA |
| 11.1.7. | UQM unmanned combat vehicle USA |
| 11.1.8. | Balqon Corporation |
| 11.2. | Electric Unmanned Aerial Vehicles (UAVs) |
| 11.2.1. | Small electrical UAVs |
| 11.2.2. | SUAV batteries |
| 11.2.3. | The most successful electric UAV |
| 11.2.4. | Micro nano air vehicles |
| 11.2.5. | Large electrical UAVs |
| 11.2.6. | COM-BAT robot bat USA |
| 11.3. | Examples of military EVs – in the water |
| 11.3.1. | US Naval Undersea Warfare Center |
| 11.4. | Manufacturers of military EVs |
| 11.5. | Market forecasts 2013-2024 |

### 12. MARINE

| 12.1.1. | Hybrid and pure electric tugboats |
