

SupplierBusiness

The Automotive Seating Systems Report

2013 Edition

CONTENTS

Executive Summary/Overview	6
Introduction	6
Definitions	6
Global Market Overview	7
Global.....	7
Increasing fitment of value-added features to seats.....	7
Global fitment of key technologies	8
Suppliers for comfort and convenience features	8
Changes are appearing in the nature of OEM supplier relationships	8
Comfort and convenience are increasingly important.....	8
Slim seats designed to provide the maximum interior space are attracting significant interest	9
Lightweight materials are much in demand	9
Eco friendly materials more commonplace	9
The Global Seat Market.....	10
Market Structure Overview	10
Europe	11
In-house seat manufacture in Germany	12
Seat development and manufacture at the vehicle companies.....	12
The Industry View – Keynote Interview with Johnson Controls and an overview of the design development process at Fiat	14
Fiat – The seat design development process.....	19
Main factors in seat design.....	19
The cost of the interior is significant.....	20
Comfort, safety, perceived quality and usability are all prime purchase considerations	20
In summary.....	21
Seat developments – designing for, space, comfort and safety, lightweight and flexibility.....	22
Seat design	22
Johnson Controls ComfortThin seat.....	22
Faurecia’s Urban Rhythm Seat	23
Materials.....	23
Polyurethane (PU) foams.....	24
Bio based foams	25
Polymers replace foam.....	25
BASF	25
Weight reduction.....	26
Faurecia’s generic seat process - Apollo and Dragon seats.....	26
Faurecia and the Volkswagen Up!.....	27

Johnson Controls has also developed lightweight front seats	27
Recycled Materials	28
Ford uses recycled materials in its seats where possible	28
Ford is actively researching and developing renewable materials.....	31
Seats designed for working and relaxing	31
Vehicle Company Seat developments.....	33
Introduction	33
Audi puts seat comfort high on the agenda	33
Pull out thigh support	34
BMW focuses on weight savings	34
Ford features All Belts to Seat system and inflatable seatbelts.....	34
GM’s Cadillac brand introduces Safety Alert seat	36
Mercedes develops active seat-belt buckle for rear seats.....	38
Volkswagen has looked to lightweight innovation for small vehicles.....	40
Japanese vehicle manufacturers developing anti-whiplash and fatigue free seats	41
Nissan is developing "fatigue-free" seats	41
Toyota has developed the Whiplash Injury Lessening (WIL) Concept Seat	42
Company Profiles.....	43
Alfmeier.....	43
Brose.....	44
Camaco	48
Car Trim	50
CRH	51
Dura Automotive	53
F S Fehrer	55
Faurecia.....	57
FXI.....	64
Grammer	65
Grupo Antolin.....	68
Johnson Controls	71
Kongsberg Automotive.....	78
Lear	80
Magna	84
NHK Spring.....	92
Recitel.....	94
Sitech.....	97
Tachi-S	98
Toyota Boshoku	100
Trim Masters.....	102
TS Tech	103
Woodbridge	105
