Introduction

xiii

OVERALL DESIGN METHODOLOGY

CHAPTER 1

Investigation of Multi-Disciplinary Optimisation for Aircraft Preliminary Design 1

Introduction 2

Multidisciplinary Preliminary Design Capability Approach 3

Multidisciplinary Trade-Off Studies 6

Enablers for Multidisciplinary Trade-Off Studies 7

Product & Simulation Lifecycle Management (PLM/SLM) 7

System Engineering Approach 7

Multi-Layer Approach 8

Integration Framework 8

Modelling and Simulation 8

Multidisciplinary Design Analysis & Optimization (MDA/MDO) 9

Enablers for MDA/MDO 10

MDO Problem Decomposition 10

Meta-Modelling 12

Application Of MDA/MDO Strategies and Processes 13

Artemis - A Multilevel MDO Based Design Process 13

Context 13

A Coherent Multilevel Multifidelity Process 13

Global Aircraft Process (GAP) 14

Bi-Disciplinary Process (BDP) 16

Structural Optimization Loop 17

Loads Tool 18

Bi-Level Structural Optimization 19

Aerodynamic Optimization Loop 21

Coupling between GAP and BDP 22

| | |
|---|-----------|
| Digital Aircraft - Toward Aircraft Design on Computers | 23 |
| Introduction | 23 |
| Parametric Data Modelling | 24 |
| Domain Tools Integration | 25 |
| <i>Aerodynamics for Performance</i> | 25 |
| <i>Aerodynamics for Loads</i> | 26 |
| <i>Loads to Weight</i> | 28 |
| <i>Multi-Disciplinary Analysis</i> | 30 |
| Framework | 32 |
| Optimization Tools | 32 |
| Summary/Conclusions | 33 |
| Contact Information | 33 |
| Acknowledgments | 34 |
| References | 34 |

WEIGHT ANALYSIS

CHAPTER 2

| | |
|--|-----------|
| Refined Preliminary Weight Estimation Tool for Airplane Wing and Tail | 37 |
| Introduction | 38 |
| Development of a New Class II and 1/2 Weight Estimation Method | 40 |
| Lifting Surfaces Weight Decomposition | 40 |
| Sizing Load Calculation | 41 |
| The Primary Weight Estimation Process | 41 |
| Software Implementation of the Proposed Method | 45 |
| Input Parameters | 45 |
| Geometry Generator | 46 |
| Load Calculator | 47 |
| Weight Calculator | 47 |
| Preliminary Validation | 48 |
| Case Studies | 48 |
| Winglet Weight | 48 |
| Bending Moment Efficiency Factor | 48 |
| Wing Lift Distribution | 49 |
| Conclusion | 49 |
| Acknowledgment | 50 |
| Definitions/Abbreviations | 50 |
| References | 50 |

STRUCTURAL ANALYSIS

CHAPTER 3

| | |
|---|-----------|
| Static/Fatigue Structural Behaviour of Damaged Stiffened Composite Plates for UAS Applications | 53 |
| Introduction | 54 |
| Preliminary Static Analysis of Damage Effect in Stiffened Panel | 54 |
| Static Behavior Summary | 54 |
| Experimental Static Results | 58 |
| Fatigue Results | 62 |
| Conclusions | 64 |
| References | 65 |

AERODYNAMIC ANALYSIS

CHAPTER 4

| | |
|---|-----------|
| Development of Variable Camber Continuous Trailing Edge Flap for Performance Adaptive Aeroelastic Wing | 67 |
| Introduction | 68 |
| VCCTEF Concept | 69 |
| 2D CFD Simulations | 73 |
| Adaptive Aeroelastic Wing Shaping Control | 77 |
| Wind Tunnel Tests | 83 |
| Cruise Configuration Test | 83 |
| High-Lift Configuration Test | 90 |
| Flutter Analysis and Suppression Control | 100 |
| Flutter Analysis | 100 |
| Adaptive Flutter Suppression Control | 103 |
| Multi-Objective Flight Control for Adaptive Wing Technology | 111 |
| Conclusion | 119 |
| References | 120 |

THERMAL ANALYSIS**CHAPTER 5**

| | |
|--|------------|
| Heat Pipe Embedded Carbon Fiber Reinforced Polymer Composite Enclosures for Avionics Thermal Management | 123 |
| Introduction | 124 |
| Design | 124 |
| Analysis | 126 |
| Fabrication | 128 |
| Results | 130 |
| Summary/Conclusions | 133 |
| Contact Information | 134 |
| Acknowledgments | 135 |
| Definitions/Abbreviations | 135 |
| References | 135 |

ACOUSTIC ANALYSIS**CHAPTER 6**

| | |
|---|------------|
| Uncertainty Modeling for Aircraft Interior Noise—Composites Transmission Loss Optimization | 137 |
| Introduction | 139 |
| Test Case Description | 139 |
| Reliability Problem Statement | 141 |
| The Reliability-Based Design Optimization Model | 142 |
| Performance Measure Approach | 143 |
| Design of Experiments and Response Surfaces | 144 |
| Analysis Case Implementation | 146 |
| Results | 147 |
| Conclusion | 148 |
| References | 149 |

LIGHTENING ANALYSIS

CHAPTER 7

| | |
|--|------------|
| More about Lightning Induced Effects on Systems in a Composite Aircraft | 151 |
| Introduction | 152 |
| Lightning Interaction with Metallic Aircraft | 153 |
| Lightning Interaction with Composite Aircraft | 155 |
| Lightning Induced Effects on Composite and Metallic Aircraft | 156 |
| Spectral Comparison of Emissions due to Harnesses on Board Aircraft | 159 |
| Cable Emissions on Composite Aircraft | 159 |
| Cable Emissions on Metallic Aircraft | 161 |
| Comparison of Cable Emissions on Composite Versus Metallic Aircraft | 161 |
| Conclusion | 162 |
| Contact Information | 162 |
| Acknowledgments | 162 |
| References | 162 |

FIRE ANALYSIS

CHAPTER 8

| | |
|--|------------|
| Fire Resistant Composites | 163 |
| Introduction | 163 |
| Main Section | 164 |
| Experimental | 164 |
| Resin Synthesis | 168 |
| Materials and Methods | 169 |
| Materials | 169 |
| Fabrication of Laminates | 169 |
| Mechanical Testing and Physical Properties | 170 |
| Tensile Strength and Modulus | 170 |
| Flexural Strength | 170 |
| Interlaminar Shear Strength | 170 |

| | |
|--|------------|
| <i>Resin Content</i> | 170 |
| <i>Void Content</i> | 170 |
| Burn Tests | 170 |
| Results and Discussion | 170 |
| Contribution of Polymer and Additives to Char Stabilization | 171 |
| Analysis of Mechanical Behavior | 174 |
| Conclusions | 177 |
| References | 177 |

RELIABILITY ANALYSIS

CHAPTER 9

| | |
|---|------------|
| Reliability Analysis of Composite Inflatable Space Structures Considering Fracture Failure | 179 |
| Introduction | 180 |
| Method of Approach | 180 |
| Geometry | 180 |
| Loads | 180 |
| Debris | 181 |
| Failure Criteria | 182 |
| Hole Edge Crack | 182 |
| Through Crack | 183 |
| Semielliptical Surface Crack | 184 |
| Monte-Carlo Simulation | 184 |
| Results and Discussion | 185 |
| Inflatable Space Habitat | 185 |
| Material | 185 |
| Deterministic Approach | 186 |
| Probabilistic Approach | 186 |
| Conclusions | 187 |
| Acknowledgments | 187 |
| Definitions/Abbreviations | 187 |
| References | 188 |

SUSTAINABILITY ANALYSIS**CHAPTER 10**

| | |
|--|------------|
| A Conceptual Framework for Value Chain Analysis of End of Life Aircraft Treatment in the Context of Sustainable Development | 189 |
| Introduction | 190 |
| Background | 191 |
| The Sustainability Paradigm in Aviation Industry | 191 |
| Aircraft at the End of Life | 192 |
| Manufacturer's Responsibility | 192 |
| Value Creation in Sustainability Context | 193 |
| Sustainable Value Chain | 195 |
| Theoretical Basis | 195 |
| Conceptual Framework | 197 |
| Application in Aircraft Recycling | 197 |
| Step 1: Value Chain Framework & Problem Context | 197 |
| Definition of Service and Value Chain of Recycling | 198 |
| The Geographical Definition and the Length of Value Chain | 199 |
| Step 2: Sustainability Analysis & Value Creation | 199 |
| Step 3: Players, Policy and Governance | 201 |
| Players and Interaction | 201 |
| Policy Framework and Governance | 201 |
| Step 4: Performance Measurement | 204 |
| Effectiveness, Efficiency and Stability Measurement | 204 |
| Conclusion | 206 |
| Acknowledgments | 206 |
| References | 206 |
