

Vehicular Engine Design

List of Chapters

1 The internal-combustion engine: an introduction

- 1.1 Heat engines and internal combustion engines
- 1.2 The reciprocating piston engine
- 1.3 Engine operating cycles
- 1.4 Supercharging and turbocharging
- 1.5 Production engine examples
- 1.6 Basic measures
- 1.7 Recommendations for further reading

2 Engine maps, customers, and markets

- 2.1 Engine mapping
- 2.2 Automobile, motorcycle, and light-truck applications
- 2.3 Heavy-truck applications
- 2.4 Off-highway applications
- 2.5 Recommendations for further reading

3 Engine validation and durability

- 3.1 Developing a durable engine
- 3.2 Fatigue analysis
- 3.3 Friction, lubrication, and wear
- 3.4 Further wear and failure mechanisms
- 3.5 Recommendations for further reading

4 Engine development process

5 Determining displacement

- 5.1 The engine as an air pump
- 5.2 Estimating displacement
- 5.3 Engine uprating and critical dimensions

6 Engine configuration and balance

- 6.1 Determining the number and layout of cylinders
- 6.2 Vibration fundamentals reviewed
- 6.3 Rotating forces and dynamic couples
- 6.4 Reciprocating forces
- 6.5 Balancing the forces in multicylinder engines
- 6.6 Gas pressure forces
- 6.7 Bore-to-stroke ratio optimization
- 6.8 Recommendation for further reading

7 Cylinder block and head materials and manufacturing

- 7.1 Block and head materials
- 7.2 Block and head casting processes
- 7.3 A look at block and head casting
- 7.4 Block and head machining processes
- 7.5 Recommendations for further reading

8 Block layout and design decisions

- 8.1 Initial block layout
- 8.2 Crankcase design decisions
- 8.3 Cylinder design decisions
- 8.4 Camshaft placement decisions

9 Cylinder head layout design

- 9.1 Initial head layout
- 9.2 Combustion chamber design decisions
- 9.3 Valve, port, and manifold design
- 9.4 Head casting layout
- 9.5 Cylinder head cooling
- 9.6 Oil deck design

10 Block and head development

- 10.1 Durability validation
- 10.2 High-cycle loading and the cylinder block
- 10.3 Modal analysis and noise
- 10.4 Low-cycle mechanical loads
- 10.5 Block and head mating and the head gasket
- 10.6 Cylinder head loading
- 10.7 Thermal loads and analysis
- 10.8 Recommendations for further reading

11 Engine bearing design

- 11.1 Hydrodynamic bearing operation
- 11.2 Split-bearing design and lubrication
- 11.3 Bearing loads
- 11.4 Classical bearing sizing
- 11.5 Dynamic bearing sizing
- 11.6 Bearing material selection
- 11.7 Bearing system validation
- 11.8 Recommendations for further reading

Vehicular Engine Design

12 Engine lubrication

- 12.1 Engine lubricants
- 12.2 Lubrication circuits and systems
- 12.3 Oil pumps
- 12.4 Oil pans, sumps, and windage
- 12.5 Filtration and cooling
- 12.6 Lubrication system performance analysis
- 12.7 Recommendations for further reading

13 Engine cooling

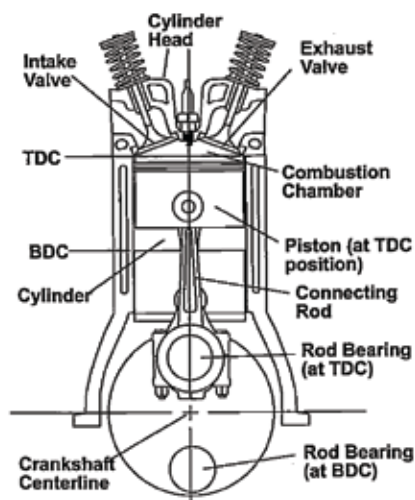

- 13.1 Engine cooling circuits
- 13.2 Cooling-jacket optimization
- 13.3 Water pump design
- 13.4 The cooling system
- 13.5 Venting and deaeration
- 13.6 Recommendations for further reading

14 Gaskets and seals

- 14.1 Gasketed-joint fundamentals
- 14.2 Engine cover design
- 14.3 Clamping load parameters
- 14.4 Bolt torque and sealing load control
- 14.5 Shaft seal design
- 14.6 Recommendations for further reading

15 Pistons and rings

- 15.1 Piston construction
- 15.2 Piston crown and ring land development
- 15.3 Piston pin boss development
- 15.4 Piston skirt development
- 15.5 Piston ring construction
- 15.6 Dynamic operation of the piston rings
- 15.7 Cylinder wall machining
- 15.8 Recommendations for further reading

16 Crankshafts and connecting rods

- 16.1 Crankshaft construction and manufacturing
- 16.2 Crankshaft fillet development
- 16.3 Torsional vibration and dampeners
- 16.4 Crankshaft nose development
- 16.5 Crankshaft flange and flywheel development
- 16.6 Connecting-rod construction and development
- 16.7 Recommendations for further reading

17 Camshafts and the valve train

- 17.1 Valve train overview
- 17.2 Dynamic system evaluation and cam lobe development
- 17.3 Camshaft durability
- 17.4 Valve train development
- 17.5 Drive system development
- 17.6 Future trends in valve train design
- 17.7 Recommendations for further reading
