Foreword	<u>xiv</u>
Preface	<u>xvii</u>
Acronyms	<u>xix</u>

CHAPTER 1

The Future of Public Transportation Globally	<u>1</u>
Public Transport Is an Investment Not a Cost	<u>4</u>

PART I – PEOPLE

CHAPTER 2

The Future of Customer Experience	<u>13</u>
Transit Testimonials	<u>14</u>
Veronica	<u>14</u>
Chai	<u>15</u>
Jim	<u>17</u>
Cass	<u>18</u>
Tiana	<u>19</u>
Veronica	<u>21</u>
Chai	<u>21</u>
Jim	<u>22</u>
Cass	<u>23</u>
Tiana	<u>24</u>
Conclusion	<u>25</u>

CHAPTER 3

The Future of Transportation Leadership	<u>27</u>
History and Context	<u>28</u>
Five Traits of the Future Transportation Leader	<u>29</u>
Conclusion	<u>37</u>

CHAPTER 4

The Future of Workforce Shortages, Mental Health, Assault, and Rebuilding Ridership	<u>39</u>
Cybersecurity	<u>39</u>
Workforce Shortage	<u>42</u>
Operator Mental Health	<u>44</u>
Rebuilding Ridership	<u>46</u>
Assault	<u>49</u>

CHAPTER 5

The Future of Labor Shortages and Succession Planning	<u>53</u>
The COVID Pandemic	<u>54</u>
Sector Wars	<u>54</u>
Workforce Dynamics	<u>55</u>

PART II – MODAL FUTURES

CHAPTER 6

The Future of Bus Transportation	<u>61</u>
Zero-Emissions Transition	<u>63</u>
AVs	<u>65</u>
Mobility as a Service (MaaS) and Shared Mobility	<u>65</u>
Smart Infrastructure	<u>66</u>

Commercial Driver's License (CDL) Reform	<u>66</u>
Transit Technology	<u>67</u>
The Workforce	<u>67</u>

CHAPTER 7

The Future of AVs	<u>71</u>
Advancement of Transportation Technology	<u>72</u>
Ultimate Urban Circulator (U ² C) Program	<u>74</u>
Challenges and Special Considerations	<u>75</u>
Conclusion	<u>78</u>

CHAPTER 8

The Future of High-Speed Rail	<u>81</u>
Overview of High-Speed Rail and Intercity Travel	<u>82</u>
Environmental and Economic Benefits of High-Speed Rail	<u>85</u>
High-Speed Rail in the US	<u>85</u>

CHAPTER 9

The Future of Public Transportation Contracting	<u>91</u>
A Changing World	<u>91</u>
We Need to Constantly Innovate and Adapt	<u>93</u>
We Need to Invest Heavily in Diversity, Equity, and Inclusion	<u>94</u>
We Need to Share and Deliver on Zero-Emissions Expertise	<u>95</u>
We Need to Encourage Ridership to CO ₂ L* the Planet (Become *CO ₂ Light)	<u>96</u>

CHAPTER 10

The Future of Integrated Mobility	<u>99</u>
Integrated Mobility Systems	<u>99</u>
Improving Customer Experience	<u>102</u>
Conclusion	<u>103</u>

CHAPTER 11

The Future of Paratransit	<u>105</u>
How Paratransit Came to Be	<u>106</u>
Change Came Slowly, but It Came	<u>109</u>
Where Next on Paratransit?	<u>110</u>
From Yes or No, to When?	<u>110</u>
From Advanced Reservations to Trips On-Demand	<u>111</u>
From “One Size Fits Most” to a More Customized Approach	<u>115</u>
From a Stand-Alone Mode to an Integrated Service	<u>117</u>
From an ADA Checklist to an Equity Lens	<u>118</u>
What about Autonomous Paratransit?	<u>120</u>
From ADA Compliance to Service Equity	<u>122</u>

CHAPTER 12

The Future Transit Safety	<u>125</u>
Public Transportation Safety and Security	<u>126</u>
Conclusion	<u>132</u>

CHAPTER 13

The Future of Smart Infrastructure Asset Management	<u>135</u>
Today’s Transit Yard: Current Challenges	<u>137</u>
Vehicle Intake: Entering the Yard	<u>137</u>
Service Line Work and Walking the Yard	<u>137</u>
Yard Management: Real-Time Vehicle-Locating System	<u>139</u>
Vehicle Entry and Routing	<u>139</u>
Automatically Detecting Vehicle Servicing	<u>140</u>
Charging and Fueling Management	<u>140</u>
Integrating into Your Central EAM System	<u>141</u>
Benefits of the Automated Maintenance Yard	<u>142</u>

CHAPTER 14

The Future of Rail Fleet Maintenance	<u>145</u>
In-House Maintenance Versus Outside Service Providers	<u>145</u>
Moving Away from a 10- or 20-Year Overhaul to a 30-Year Lifecycle That Is More Reliable	<u>147</u>
The Rail Maintenance Industry Needs Leaders Not Just Managers	<u>149</u>

CHAPTER 15

The Future of Automation in Heavy Rail	<u>155</u>
Advantages of Automated Systems	<u>157</u>
Points to Consider When Implementing Automated Passenger Train Systems	<u>158</u>
Success of Automated Passenger Train Systems across the Globe	<u>160</u>
Conclusion	<u>162</u>

CHAPTER 16

The Future of Mobility as a Service	<u>165</u>
Simplifying the Digital Experience	<u>165</u>
So What Is MaaS?	<u>166</u>
Tech to Unlock Societal Goals	<u>168</u>
Try UM First	<u>169</u>
Investing in Your People and Services	<u>170</u>
UM Extends Your Digital Brand	<u>171</u>
Policy Management at the Decision Point	<u>172</u>
Applying Subsidy to Your Mobility Marketplace	<u>173</u>
Fostering Regional and Rural Mobility	<u>173</u>
Enabling Next-Gen Autonomous Cities	<u>174</u>
MaaS Is Alive	<u>176</u>

PART III — ZERO-EMISSIONS VEHICLES

CHAPTER 17

The Future of Zero-Emission Transformation [179](#)

Why Prioritize People [180](#)

Take a Holistic Approach [181](#)

Start with the Enablers [181](#)

Plan with Some Basic Principles [185](#)

Chart the Technical Pathways to Delivery [187](#)

It Comes Down to People [190](#)

CHAPTER 18

The Future of ZEB and Hydrogen-Fueled Buses [191](#)

EcoLiners [193](#)

Hydrogen-Fueled Cell Bus [195](#)

What about Hydrogen? [197](#)

Key Learnings [198](#)

Conclusion [199](#)

CHAPTER 19

The Future of How Hydrogen-Fueled Buses Work [201](#)

Storage [202](#)

Safety [203](#)

Buildings [203](#)

Fueling Infrastructure [204](#)

H₂ Generation vs Delivery [204](#)

Fueling Speed [205](#)

Biden's H₂ Earth Shot [205](#)

CHAPTER 20

The Future of EVs	<u>207</u>
Emissions from Transportation	<u>208</u>
Challenges and Advantages	<u>208</u>
Transition to ZEVs	<u>212</u>

CHAPTER 21

The Future of Equity, Climate Change, and EVs	<u>213</u>
Transition to EVs	<u>213</u>
Equity	<u>215</u>
Conclusion	<u>218</u>

PART IV – DATA**CHAPTER 22**

The Future of Contactless Payments and Big Data	<u>221</u>
What Does the Future Look Like for Transport?	<u>222</u>
Autonomy	<u>223</u>
Customer Information	<u>224</u>
Apps vs Data	<u>224</u>
And What about the Apps Themselves	<u>225</u>
Transport Planning	<u>226</u>
Payments	<u>227</u>
Conclusion	<u>229</u>

CHAPTER 23

The Future of Data and AI	<u>231</u>
Background	<u>231</u>
Successful Agencies are Integrating Their Data	<u>233</u>

Current AI Applications in the Industry	<u>234</u>
Advanced AI Example in the Industry	<u>236</u>
Future Advancements of AI in the Industry	<u>238</u>
Generative AI System Policy and Cautions	<u>240</u>
Conclusion: Way Forward	<u>241</u>

CHAPTER 24

The Future of Cybersecurity of Vehicles and Infrastructure	<u>245</u>
Guarding against Cyberattacks	<u>246</u>
Improving Transportation Industry Security	<u>249</u>
Conclusion	<u>251</u>

PART V — FUNDING AND FARING

CHAPTER 25

The Future of Transit Funding	<u>255</u>
Congestion Pricing and Tolling	<u>258</u>
Tolling	<u>259</u>
Other Potential Funding Sources	<u>260</u>
Conclusion	<u>261</u>

CHAPTER 26

The Future of Zero Fares	<u>263</u>
Free Fares in the Merrimack Valley—How We Got Here	<u>264</u>
Finance	<u>265</u>
Operations	<u>268</u>
Performance	<u>268</u>
Rider Experience	<u>269</u>
Workforce	<u>272</u>
Societal Benefit	<u>273</u>
The Future of Fare-Free Transit	<u>275</u>

CHAPTER 27

The Future of Faring	279
Revenue Used to Replace Fares Should Be Used to Expand Service	280
The Money Just Is Not There to Remove Fares	281
Transit Can Address Equity without Removing Fares	282
Do Not Sacrifice Fare Revenue for Outdated Practices	283
The Best Systems around the World Collect Fares	284
A Community-Based Approach to Fares	285

PART VI — GEOGRAPHIC FUTURES**CHAPTER 28**

The Future of Rural/Tribal Transportation	289
Future of Public Transportation	290
Conclusion	297

CHAPTER 29

The Future of Transportation in Brisbane, Australia	299
Brisbane's New Metro	300

CHAPTER 30

The Past, Present, and Future of US Federal Transportation Funding	303
Epilogue—July 2023	313
Infrastructure Investment and Jobs Act (IIJA)	314
Transportation Appropriations Acts (THUD)	315
Public Transit Agencies Face Severe Fiscal Cliff <i>June 2023</i>	317
Index	319
About the Author	327
