

This is my SAE!

Enhance your professional relevance ---
through SAE International,
your professional membership society.

SAE International™

Make it **your** SAE:

Membership Resources and Opportunities
for the Mobility Engineering Professional

It takes more than excelling in your job to demonstrate your value. One key to ensure your value — your professional relevance — is contributing not only to your company, but to the industry as a whole. Contribute by sharing your expertise on the latest technology. Contribute by volunteering your time to the future generation of engineers. There are many more ways SAE can help contribute to your success.

Membership in SAE provides the path to enhance your career and perhaps **LAND** your next promotion:

- **L**earn more about the newest technological developments.
- **A**chieve formal industry recognition for your accomplishments.
- **N**etwork with other technical professionals.
- **D**evelop and demonstrate your leadership capabilities.

SAE can help you advance on all of these fronts with a wealth of resources and opportunities. It's never too early or too late to begin your SAE journey.

Technology Resources

To progress in your career, continuous learning is vital. Find out what the leading research and product development professionals are working on through SAE conferences, technical papers, magazines, technical standards and books. This family of technical resources is designed to be as broad as it is deep, giving you **everything from the latest news to in-depth information** on a particular technology.

Has anyone ever told you that you know so much about a topic that you could teach a course or write a book? SAE can provide you with the opportunity to do just that. You can author a technical paper, instruct one of its many professional development seminars, or write a book. These opportunities require a short-term commitment, but provide you with long-term value.

SAE members receive:

- FREE SAE magazine subscription.
- FREE admission* to their SAE Congress of choice.
- 20% off most SAE papers, standards and other publications.
- Savings on all SAE conferences, seminars and other learning programs

*Requires event pre-registration

Industry Leadership Opportunities

Proving yourself as a leader in the industry can be a daunting task.

SAE provides you with the forum to showcase your expertise and develop your leadership capabilities on an industry stage. Expand your network and your knowledge in ways you cannot do within your company or supply chain.

Volunteering with SAE develops the individuals, enhances the cooperative work at hand and improves industry. Your volunteer work with SAE will clearly establish you as a leader.

Become a better you. Volunteer.

Visit <http://volunteers.sae.org>.

Professional Development

Advance your work and your capabilities at all stages of your career through SAE professional development programs. From fundamental courses for the early professional to management courses for the experienced professional, SAE provides you with the knowledge needed to help you excel in your current position or prepare you for your next career move.

SAE offers an on-line Learning Center that enables you to quickly locate learning solutions, browse upcoming events, and manage your experience.

Recognition

Being recognized within your organization is great --- being recognized by industry is an honor. Recognition for contributing to your industry demonstrates leadership and can lead to new opportunities.

Take advantage of the opportunity to recognize one of your colleagues deserving of recognition. Enjoy the satisfaction of seeing a well-deserving friend gain the recognition they have earned.

Visit MyLearn.sae.org and see how it can be your one-stop shop for your ongoing professional development needs!

SAE members receive reduced rates on seminars and e-learning products.

SAE Awards and Recognition Program : recognizing engineering excellence for more than 100 years.

Network Expansion and Career Enhancement

How do you add 121,000 mobility industry professionals around the world to your network in just minutes? It's simple: being a member of SAE gives you access to the SAE network.

SAE conferences are a primary avenue for growing your circle. Here, you can make those vital connections in a technical session, at a networking break, in a committee meeting, or in the exhibit hall. Where else can you meet and talk with competitors, suppliers, government representatives, all in a neutral forum.

SAE Members have access to the online Career Center plus exclusive benefits including email job alerts and confidential resume posting. SAE member resumes appear first in employer searches. Post your resume, review job postings, and create your own search agent.

Visit www.saecareercenter.org.

In today's tough economic times, your SAE connection is more important than ever. That's why SAE **offers reduced member dues** for unemployed professional members. A reduced retiree rate is also available.

You can access the membership roster at www.sae.org/membership.

Community Responsibility

SAE learning programs help unlock the potential of millions of students around the world and you can help do so in your community.

The award-winning program, *A World In Motion*® (AWIM), promotes K-12 science, technology, engineering, and mathematics (STEM) education through a teacher-administered, practitioner-assisted program. As in-classroom resource for teachers, AWIM volunteer-practitioners have the opportunity to influence and enhance the ways in which youth are prepared to meet the future. A short-term commitment, you will help make learning fun, help young students discover the exciting application of science principles, and share information about rewarding careers in your chosen profession.

The faculty-administered SAE Collegiate Design Series (CDS) is a worldwide hands-on team design competition and workforce simulation for the pre-practitioner. Like AWIM, CDS relies on the volunteer efforts of experienced mobility industry professionals and both are funded through the SAE Foundation.

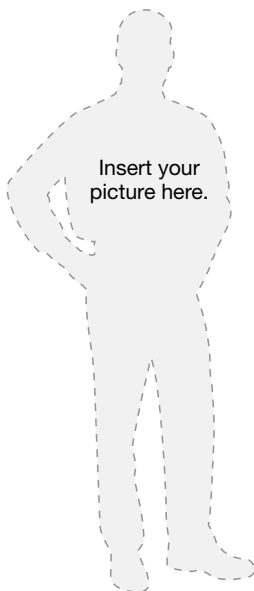

Learn more about how you can get involved at www.awim.org and for CDS at www.students.sae.org.

“Volunteers do not necessarily have the time;
they just have the heart.”

- Elizabeth Andrew
