

CALL FOR PRESENTATIONS

SAE 2018 Thermal Management Systems Symposium (TMSS)
San Diego Marriott Mission Valley, San Diego,
California (USA)
October 9 – 11, 2018

Critical Deadlines:

Abstracts due for consideration:	April 20, 2018
Initial draft program posted to website:	May 15, 2018
Draft PowerPoint Presentations due:	June 29, 2018
Organizer Feedback (Approvals/Disapprovals) on Presentations:	July 31, 2018
Technical Program Finalized:	August 7, 2018
Final Presentations due:	September 26, 2018

You are invited to submit a presentation for the SAE 2018 Thermal Management Systems Symposium. Please submit abstracts of approximately 300 words, including title and author contact information by April 20, 2018. Visit <https://www.sae.org/attend/thermal/> for further details.

The 2018 Thermal Management Systems Symposium serves as a discussion focal setting and meeting ground for thermal systems professionals from around the globe. Deliberation centering on emissions and fuel efficiency regulatory issues is more important than ever and thermal issues provide increasingly significant and important aspects. This symposium represents a valuable opportunity to interact and network with other MAC and thermal system professionals from OEMs, suppliers, academia, chemical companies and more.

Help shape the discussion by submitting a presentation on a relevant mobile air conditioning, refrigerant, or vehicle thermal management topic.

Abstracts are being solicited in the following technology areas covering both light and commercial vehicles:

- Autonomous and Connected Vehicle Thermal Management
- Alternative Refrigerants
 - New developments in R744, R1234yf, blend refrigerants and other alternative refrigerant systems
- Human Factors including Thermal Comfort and Cabin Air Quality
- Powertrain Energy Management
- Thermal System and Components
- Thermal Systems for Hybrid and Electric Vehicles
- Thermal Systems for Commercial and Off-Road Vehicles
- Thermal Simulation/Analysis/Modeling
- Regulatory Topics
- Vehicle Climate Control & Cabin Comfort
- Vehicle Underhood Thermal Management
- Waste Heat Recovery

Authors are invited to submit abstracts including the title and author's contact information by April 20, 2018. No written papers will be published as part of the event. Presentation acceptance will be based on organizer moderated peer review of the PowerPoint presentation.
