

Health of the Defense Industrial Base
18 December 2018

Department of Defense Maintenance Symposium

Shape the DIB to a dynamic future

Challenges

Rapid Technology Development

Lack of supply chain visibility

Increased obsolescence cycle

Risk management versus mitigation

Addressing Industrial Base equities up front

Current State = Reactive

Answering the Challenge

Transparency in the Supply Chain

Identifying Critical Supply Chain Nodes
(Intellectual Property, technology, companies)

Invest and modernize the Organic Industrial
Base

Cohesive Strategy for the Organic and
Commercial Industrial Bases

Design for Supportability

Future State = Proactive

Ensure the DIB is capable of sustaining and winning the fight.
