Battery Recycling & Reuse Summit 2023

As the ground vehicle industry continues its massive shift to electric vehicles (EVs), it will continue to search for increasingly efficient and inexpensive means of battery production and materials sourcing, including recycling and reuse. While there are many promising strategies for recycling batteries, there are numerous technical, economic, logistic, and regulatory barriers to resolve.

SAE International debuts its inaugural Battery Recycling & Reuse Summit 2023, an SAE Sustainability event, with a very clear purpose: helping companies that are building the future of mobility create an actionable roadmap to success.

A partnership between SAE’s Sustainable Mobility Solutions initiative and Battery & Electrification Technology magazine, this fully virtual event will explore the latest issues related to the environmental and economic impacts and opportunities that arise when a battery reaches the end of its life, particularly as related to EVs.

Why Sponsor?
This event is the perfect platform to position your organization as a thought leader and resource for companies that rely on next-generation batteries within the mobility industry.

During the event, you’ll connect with mobility executives, R&D staff, and engineers as we convene to navigate the current and future battery markets. These attendees are looking for actionable solutions and we’ll help you highlight your capabilities and track record to help them along the path to profitability.

AUDIENCE OVERVIEW

Battery Recycling & Reuse is targeted to R&D professionals, managers, and executives who use or source batteries and power products. Past battery-focused webinars and summits have attracted registrants from leading companies in aerospace, automotive, and defense including:

- American Honda
- Amphenol Aerospace
- ArcelorMittal
- BAE Systems
- BASF Corp.
- Boeing
- BorgWarner
- Caterpillar
- Chevron
- Collins Aerospace
- Cummins Power
- Systems
- Daimler AG
- Dow Chemical
- DuPont
- Eaton
- Embraer
- General Atomics
- General Motors
- Gulfstream Aerospace
- John Deere
- Kia Motors America
- Lockheed Martin
- MAHLE Engine Components Inc
- Mercedes Benz
- Mitsubishi Motors
- Moog Inc.
- NASA
- Northrop Grumman
- Oak Ridge National Laboratory
- Oshkosh Defense
- PACCAR
- Panasonic Avionics
- Peterbilt Motors
- Polaris Inc
- Pratt and Whitney
- Raytheon
- Rolls-Royce
- Shell
- Siemens Aerospace
- Stellantis
- Subaru R&D
- Tesla
- The Lubrizol Corporation
- Toyota
- UPS
- Valeo
- Vitesco
- Volkswagen Group
- Volvo Group North America

www.sae.org/battery-summit
During the event, you'll get the latest updates on key market topics including the state of global battery recycling, energy storage, second life of reused batteries, government incentives, closed-loop recycling, recovery, and more.

**TUESDAY, JUNE 6, 2023**  (ALL TIMES EASTERN)

**CONFIRMED SPEAKERS**

**SAM ABUELSAMID**  
Principal Research Analyst, Mobility Ecosystem, Guidehouse Insights

**RENATA ARSENAULT**  
Technical Expert, Advanced Battery Recycling, Ford

**JULIA BUSH**  
Industry Analyst, Center for Automotive Research and Naseeb Souweidane, Center for Automotive Research

**BOB GALYEN**  
Owner, Galeyn Energy, LLC

**ALEXIS GEORGESON**  
Vice President, Government Relations, Communications, & Consumer Recycling Programs, Redwood Materials

**JEFF SPANGENBERG**  
Group Leader, Materials Recycling, Argonne National Lab
