SCHOLARLY JOURNALS
NEW JOURNALS. NEW PROGRAM.
NEW WAY TO ACCESS.
NEW JOURNALS. NEW PROGRAM. NEW WAY TO ACCESS.

SAE International is making significant changes to its scholarly journals program by adding new titles, improving submission processes, and enhancing overall quality with rigorous peer review. Journals will be available on our new, user-focused platform that makes exploring, searching, and accessing articles and issues easier than ever.

WHAT'S NEXT?
• Transportation Cybersecurity and Privacy: An SAE International Journal
• Automated and Connected Vehicles and Drones: An SAE International Journal

Prepublication issues will be available later in 2017, with full launches of the quarterly journals in 2018. All content will be new and original, created outside of SAE events.

Peer-Review Process
SAE follows a double-blind peer-review process and has selected Editorial Manager, from Aries Corp., as its new peer-review system for journal submissions. This new system is familiar to authors and user-friendly and makes the submission process much easier.

HOW TO ACCESS
New in 2017! All SAE Scholarly Journals will be accessed through the SAE MOBILUS™ platform beginning in April 2017. Find the content and research you need on this enhanced platform that enables users to explore, download instantly, and annotate. Content will be available through volumes, issues, and individual articles.

OPEN ACCESS is now available for authors and institutions through SAE—$600 article publication charge.

SUBSCRIPTION NEWS
• Run on calendar-year basis
• Print issues are printed and mailed when ready vs. waiting until the end of the year
• Perpetual access to purchased annual subscriptions
