Call for Reviewers

The SAE International Journal of Sustainable Transportation, Energy, Environment, and Policy is accepting applications for the position of reviewer for the following topics:

**Sustainable Transportation**
- Sustainable transportation and subsystems efficiency
- Auto-associated infrastructure (built)
- Traditional and emerging vehicles

**Sustainable Energy**
- Renewable energy: resources, storage, conversion, transmission
- Sustainable engineering
- Sustainable manufacturing
- Sustainable and advanced materials
- Efficiency enhancing mechanisms: optimization, combustion, lightweighting

**Sustainable Environment**
- Built environment
- Lifecycle assessment
- Lifecycle cost modeling, assessment, and analysis
- Carbon and water footprint
- Eco-labels

**Policy**
- Public policy
- Transportation policies
- Energy policies
- Social perspectives
- Economic perspectives

**Duties**
1. Read the manuscript thoroughly.
2. Make comments and critiques about the research. Reviews without comments are unacceptable.
3. Make suggestions for improvement, if appropriate.
4. Submit the review with a grading in the areas requested in the system and a recommendation for rejection, revision, or acceptance.

**Requirements**

Becoming a reviewer requires proficient knowledge in the subject area and the ability to provide constructive criticism to the author and editors. SAE does require previous experience as a peer reviewer or completion of a training program, such as available through the Web of Science. The most important requirement for being a reviewer is that you can devote enough time to give a professional and useful review within the time frame given for a review, usually within one month maximum from the date of acceptance.

**Interested?**

If you are interested in being included as a reviewer, please email managingeditor@sae.org and include a brief CV (three-page max) that includes recent publications.
