

Reduce Maintenance Requirements

Major Robert Charlton, HQMC, DC I&L

22 Sep 2008

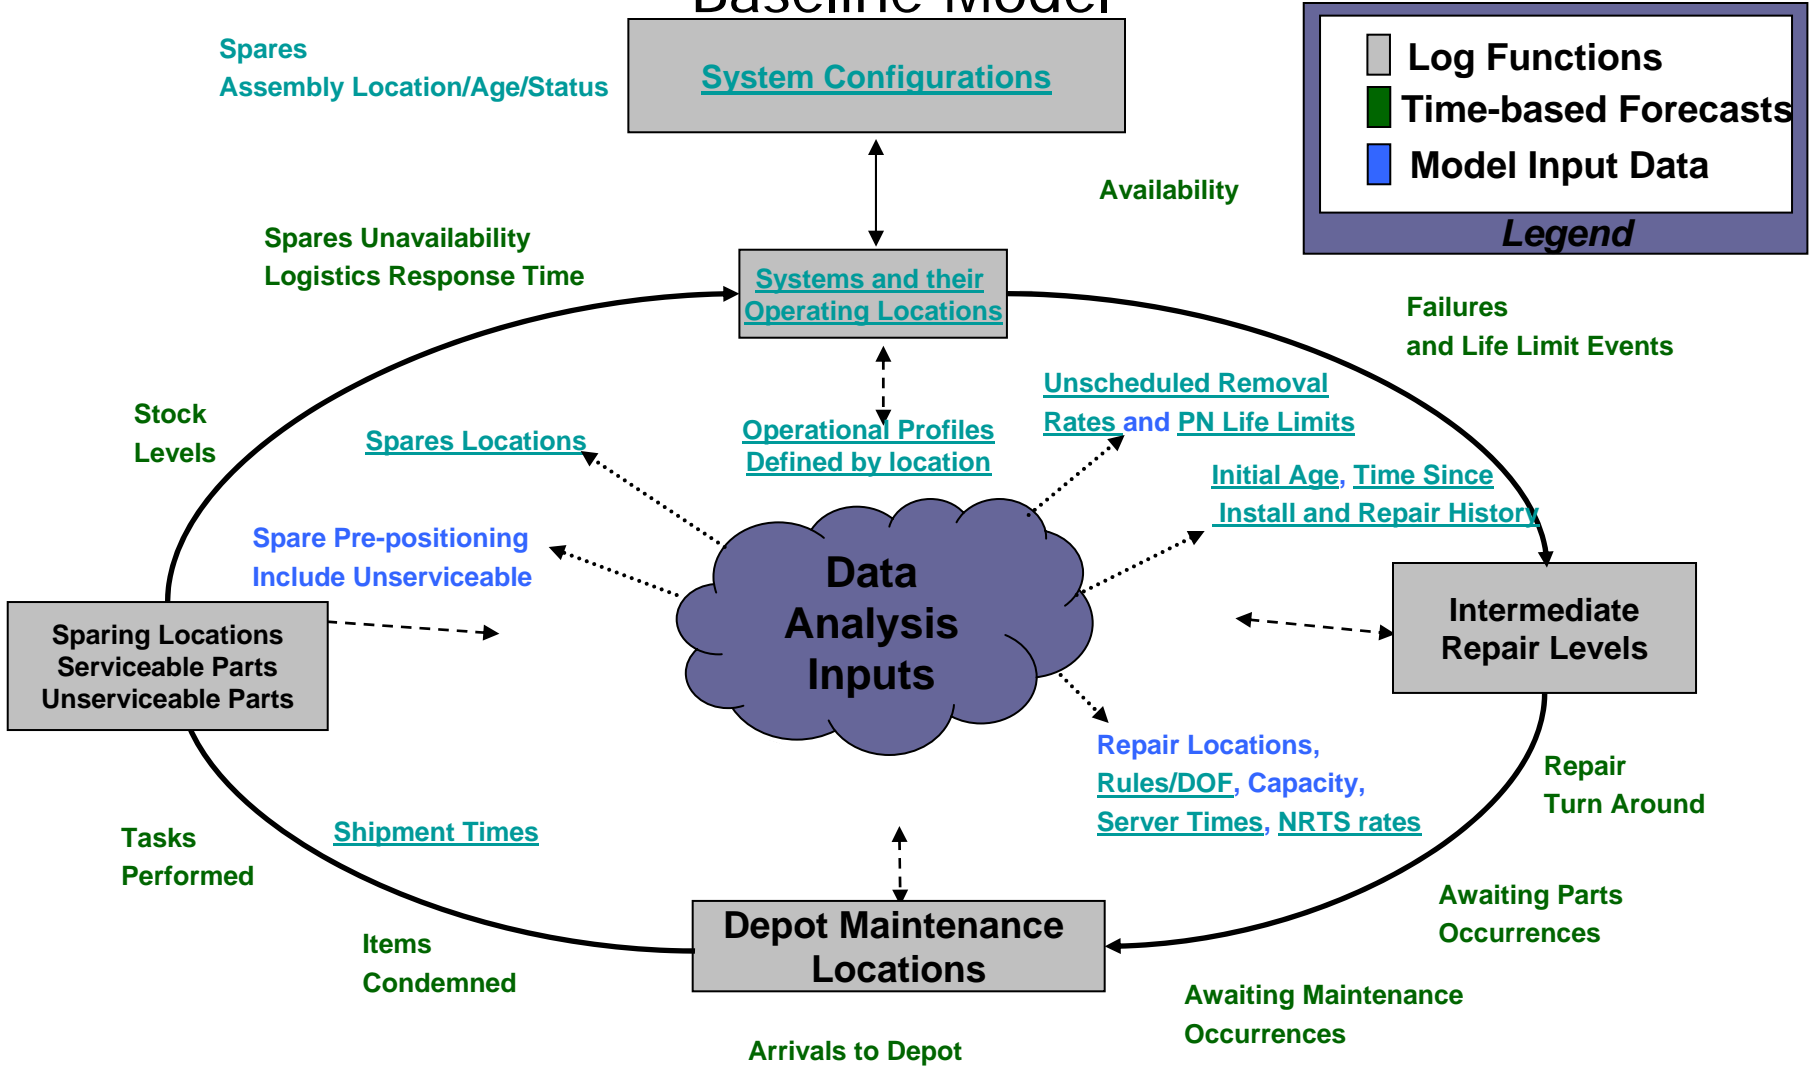

Reduced Maintenance Through Improved Reliability

- Use modeling and simulation
- Align the right maintenance to the right activity
- Align the supply chain to the maintenance plan
- Grow to a improved diagnostic and prognostics

Baseline Model

Cost model Incorporates all aspects of the Life Cycle

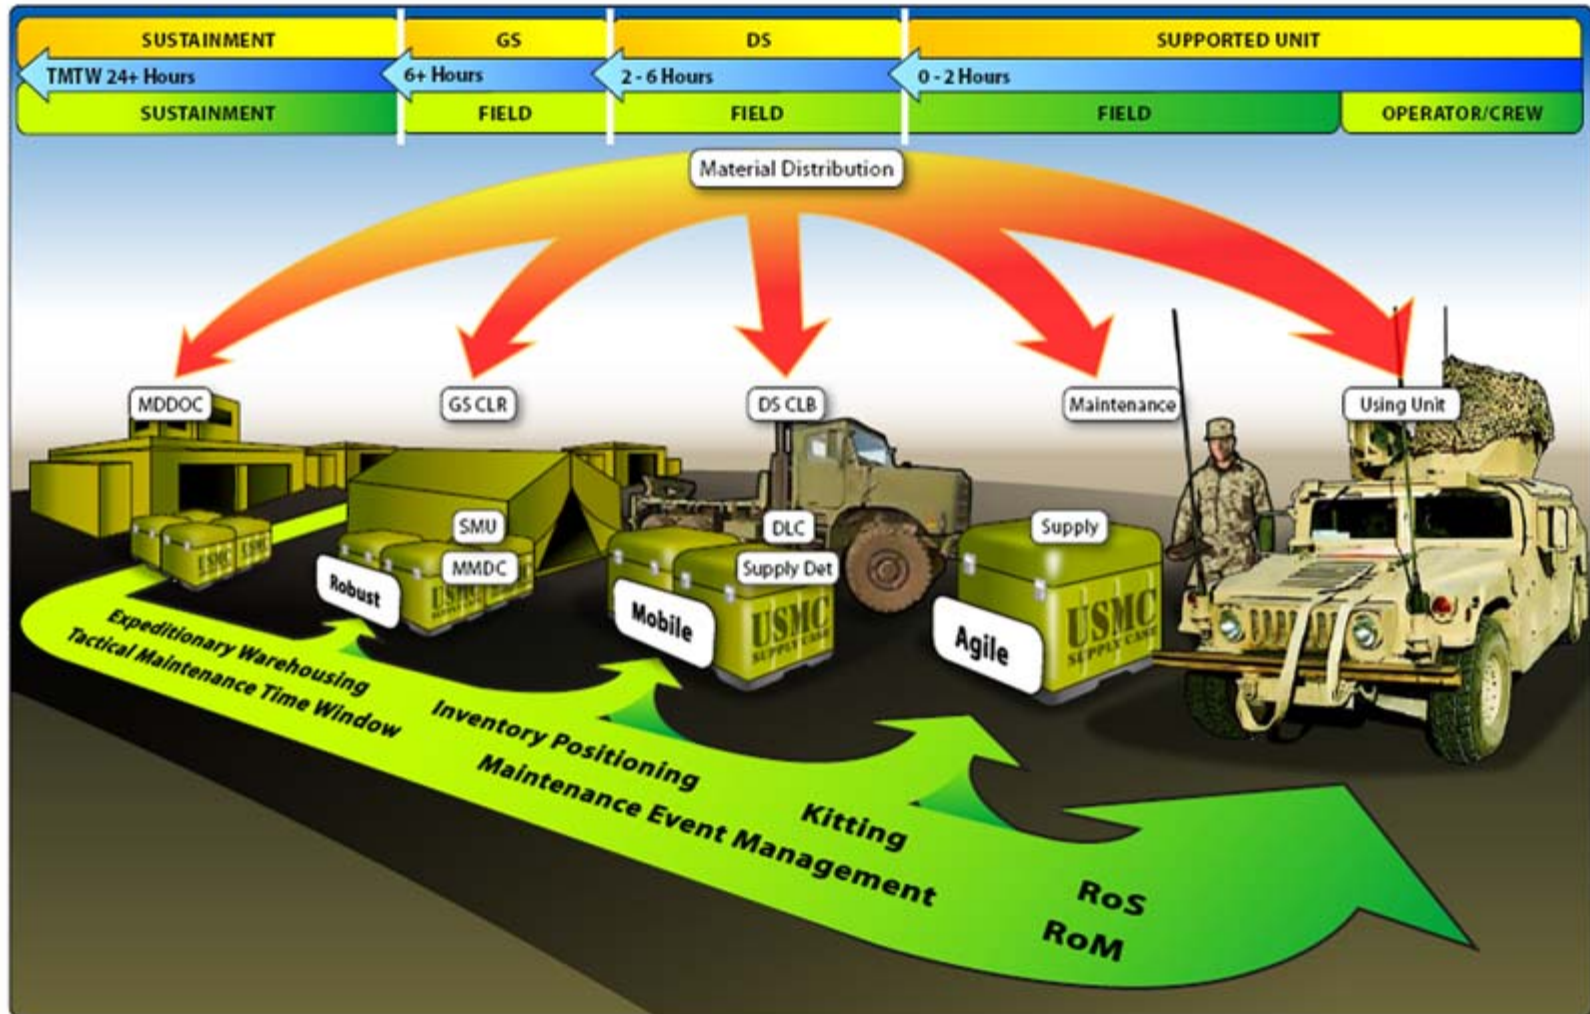

Specialized Overhaul and Repair

- SOAR Defined
 - SOAR is not just reducing RCT.
 - Right sizing the scope.
 - Right repairs, right cost, right RCT.
 - LEAN
- IROAN – Inspect and Repair Only As Necessary
- SOAR Reduction of cycle time goal
 - from 120 days to 60 days
- SOAR Cost avoidance on 185 Vehicles per year \$32.5 M

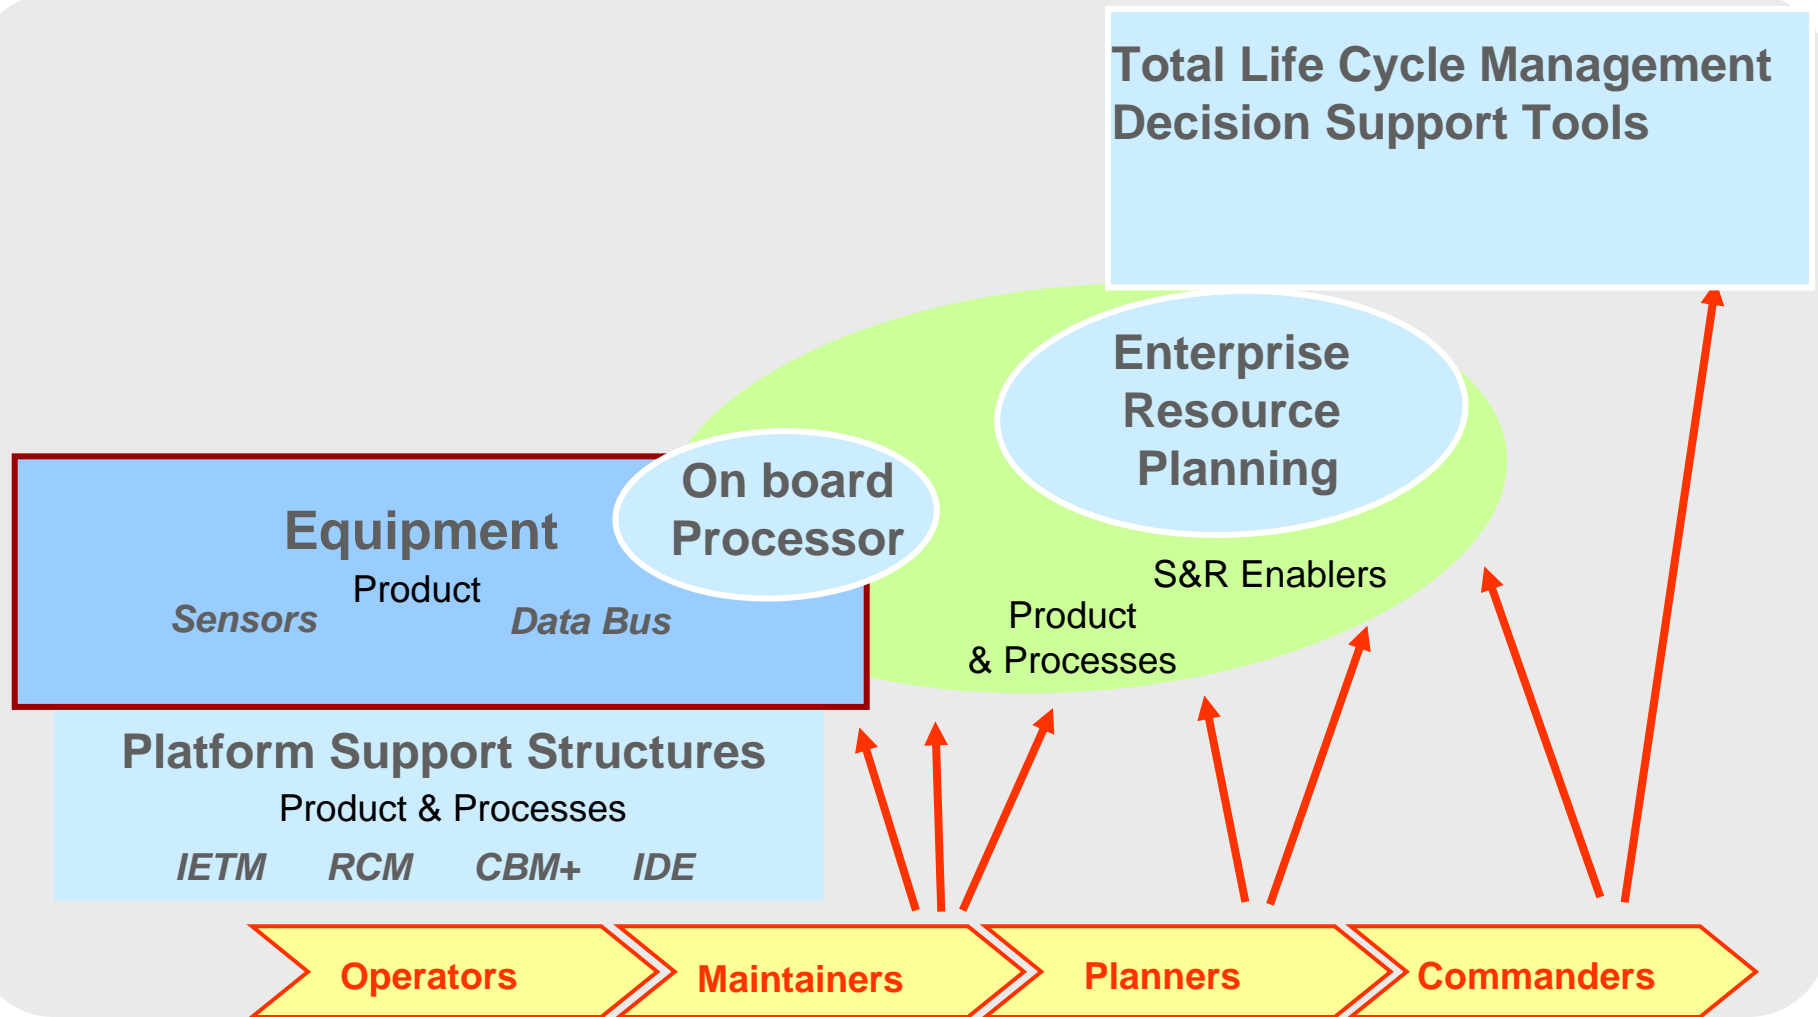

LOGMOD Integration

THE SENSE & RESPOND FOUNDATION IS THE "SMART" PLATFORM
