

2009 DoD Weapon System Product Support Assessment

**Breakout Session | Next Generation Life Cycle Product
Support Strategies**

**DoD Maintenance Symposium
Phoenix, Arizona
October 27, 2009**

Next Generation Life Cycle Product Support Strategies

“...we must reform how and what we buy, meaning a fundamental overhaul of our approach to procurement, acquisition, and contracting...”

*Secretary of Defense Gates
Defense Budget Statement
April 6, 2009*

Panel Introductions

- **J8/Warfighter Requirements** – **Col Mark LaViolette**
Acquisition Capabilities and
Division, Joint Staff J-8
- **Services** – **Mr. Larry Hill**,
Director, Logistics Policy,
Office of the Assistant Secretary of the Army (ALT)
- **Industry** – **Mr. Lou Kratz**
Vice President, Logistics and Sustainment
Lockheed Martin Corporation
- **Product Support Consultant** – **RADM (Ret.) Mike Finley**
Director, PRTM
- **Moderator** – **Mr. Randy Fowler**,
Defense Assistant Deputy Under Secretary Of
(Materiel Readiness)

Product Support Journey

Concept

Policy

Adoption

NextGen

Section 912, 1998 NDAA: DoD to report to Congress on Product Support Reengineering

F-117, APU PBLs

1998

Product Support Reengineering Report to Congress

30 RTOC Pilot Programs

1999

DoD QDR mandates "PBL" – First official Use of Term

Program Managers Guidebook published

2001

DoD 5000 policy updated: PBL is "preferred" Support Strategy

ACAT 1 & 2 to use PBL or justify non-use

2003

OSD PBL Policy memos: BCA's used to evaluate transition to PBL

DAU PBL Course Launched

2004

Over 200 current or planned PBL Programs

Contractors PBL Course Launched

2006

Revised DoDI 5000.2 Issued

Product Support Assessment Team Launched

2008

DoD Weapon System Product Support Assessment Report

DoD WSPSA Implementation

2009 >

DoD Product Support Assessment Team (PSAT) Review & Report

1999

2009

DoD Weapon System Product Support Assessment Purpose

- **Recommends to senior leadership improvement of existing weapon system sustainment strategy**
- **Encompasses operational, acquisition, and sustainment communities**
- **Complements the Weapon System Acquisition Reform Act initiatives with perspectives attentive to life cycle management and sustainment**
- **Provides recommendations to improve weapon system readiness and control product life cycle cost**
 - Current status of product support implementation
 - Areas for improvement to policies, procedures and practices
 - Way forward for performance based life cycle product support

DoD WSPSA Recommendations

Product Support Business Model:

Provide Program Managers a model template for a weapon system support strategy that drives cost-effective performance and capability for the Warfighter across the weapon system life cycle and enables most advantageous use of an integrated defense industrial base

Industrial Integration Strategy:

Align and expand the collaboration between Government & Industry that produces best value partnering practices

Governance:

Strengthen and develop organization and mgmt processes to deliver the right sustainment information to decision-makers

Metrics:

Use existing metrics to catalyze sustainment strategies and trigger continuous supportability analysis

O&S Costs:

Improve O&S cost visibility and influence

Supply Chain Operational Strategy:

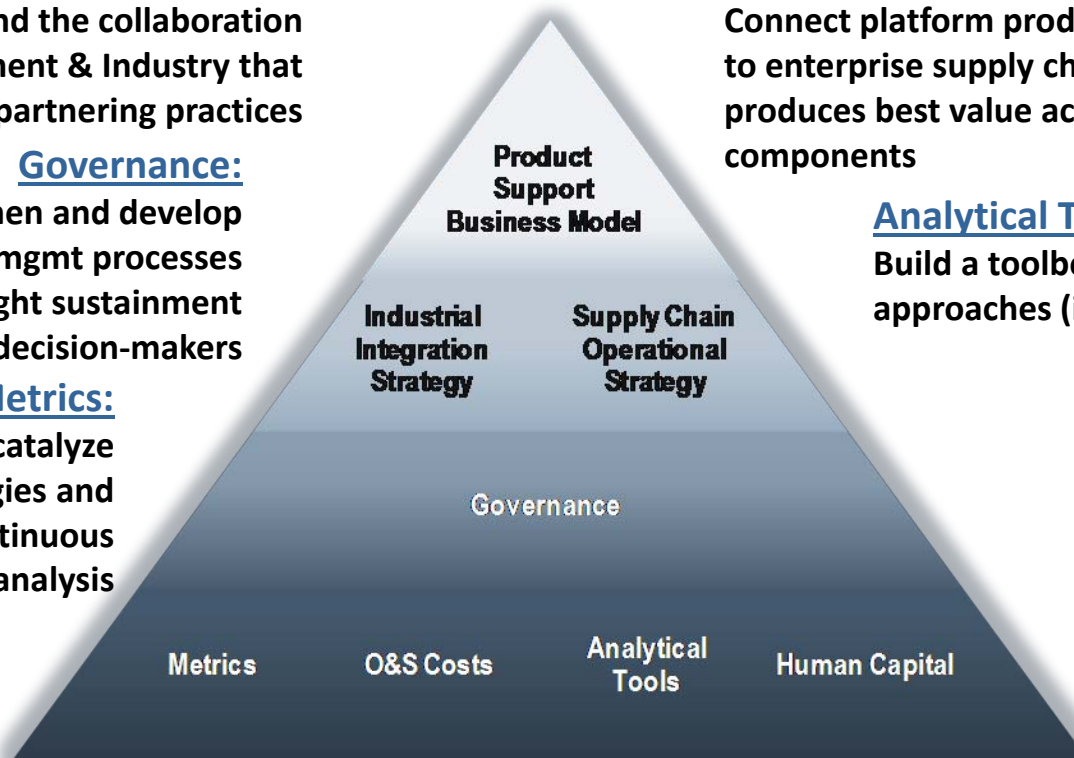

Connect platform product support strategies to enterprise supply chain approaches that produces best value across the DoD components

Analytical Tools:

Build a toolbox of analytical approaches (including BCA)

Human Capital:

Integrate Product Support competencies across the Logistics and Acquisition workforce domain to institutionalize successful traits of an outcome-based culture

Weapons System Data:

Define, collect, report, and manage the data we need to drive effective Life Cycle Product Support

Back Ups

Definition and Context

- **Product Support** – the package of support functions required to field and maintain the readiness and operational capability of weapon systems, subsystems, and support systems
 - **Performance-Based Logistics (PBL)** – An outcome based support concept that plans and delivers an integrated, affordable, performance package designed to optimize system readiness and meet performance goals for a weapon system through long-term support arrangements with clear lines of authority and responsibility
-
- Product support objective is to achieve materiel readiness in the most life cycle cost-effective manner
 - PBL strategies deliver outcomes, (i.e. improved readiness, improved cycle times), not transactions
 - About 200 +/- PBL applications, 20% of all weapon systems
 - PBL-type strategies employed for 25+ years in commercial business, e.g., power-by-the-hour©
 - OUSD(AT&L) Annual PBL Awards recognize top performers
