List of Chapters:

Dedication
Acknowledgement
Preface
Introduction

**Part I: Forensic Engineering**
- Reconstruction of Motorcycle Accidents

**Chapter 1: Understanding Motorcycles**
1.1 Definition
1.2 Steering
1.3 Countersteering
1.4 Handling
1.5 Articulated?
1.6 Brakes
1.7 Acceleration
1.8 Transmissions and Drive Lines
1.9 Engines
1.10 Tires and Wheels
1.11 Controls
1.12 Weather
1.13 Life Expectancy
1.14 Sidestands
1.15 Modifications

**Chapter 2: Braking**
2.1 General Considerations
2.2 Integrated Brakes
2.3 Anti-Skid Brake System (ABS)
2.4 Braking on Curves
2.5 Failures

**Chapter 3: Tires and Wheels**
3.1 General Principles
3.2 Front
3.3 Rear
3.4 New Tires
3.5 Flats
3.6 Tube versus Tubeless
3.7 Rain Grooves
3.8 Hydroplaning and Wet Traction
3.9 Wheels
3.10 Traction

**Chapter 4: Highway Factors**
4.1 Pavement Marking
4.2 Blocked Visibility
4.3 Invisibility
4.4 Ruts and Expansion Joints
4.5 Rails
4.6 Edge of Pavement Steps
4.7 Grooves and Gratings
4.8 Guardrails
4.9 Posts
4.10 Debris
4.11 Steel
4.12 Gates
4.13 Animals
4.14 Animal Waste
4.15 Intersections

**Chapter 5: Conspicuity**
5.1 Exhaust Pipes
5.2 Horns
5.3 Lights and Coloration
5.4 Psychology
5.5 Clothing
5.6 Riding Behavior

**Chapter 6: Rider Factors**
6.1 Experience
6.2 Beginners
6.3 Maturity
6.4 Training
6.5 Drugs
6.6 Choice of Bike
6.7 Rider Behavior
   - A. Lane splitting
   - B. Curb sneaking
   - C. Lane sharing
   - D. Lane position
   - E. Moving up on traffic
   - F. Aggressively defensive
6.8 Rider Performance
   - A. Reaction time
   - B. Braking
   - C. Steering
6.9 Wobbles
6.10 Passengers

Chapter 7: Rider Protection
7.1 The Best Rider Crash Protection
7.2 Helmets
7.3 Crash Bars
7.4 Eye Protection
7.5 Seat Belts!
7.6 Air Bags
7.7 Roll Bars
7.8 Weather
7.9 Clothing

Chapter 8: Wobbles and Weaves
8.1 Types
  A. Simple wheel wobble
  B. Front-end wobble
  C. High-speed weave
  D. “Flopping”
  E. Induced wobble
  F. High-side
8.2 Geometry
8.3 Causes
8.4 Evidence

Chapter 9: Evasive Action
9.1 Lay It Down
9.2 Lane Change
9.3 Leading the Target
9.4 Countersteering
9.5 Slam on the Brakes
9.6 Swerve, then Brake
9.7 Brake First, then Swerve
9.8 Brake and Swerve Simultaneously
9.9 Jumping
9.10 Pick a Soft Place to Crash

Chapter 10: Quasi-Motorcycles
10.1 Mopeds and Motorized Bicycles
10.2 Motor-Driven Cycle (“No- Ped”)
10.3 Scooters
10.4 Minibikes
10.5 Mini Scooters
10.6 Oddball Scooters
10.7 Multi-Wheel Cycles
10.8 Trikes
10.9 ATCs
10.10 Sidecars
10.11 Trailers
10.12 Three-Wheel Cars (e.g., Morgan and Trihawk)

Chapter 11: Inquiries
11.1 Identification of Vehicle Make and Model
11.2 Photographs
11.3 Injuries
11.4 Headlights
11.5 Perceptions
11.6 Clothing
11.7 Mechanical
  A. Gearshift
  B. Brakes
  C. Tires
  D. Sidestands
  E. Modifications
11.8 Experience
11.9 How-To
11.10 Road Conditions
11.11 Witnesses
11.12 Publications
11.13 More on Photographs

Chapter 12: Methods
12.1 Speed Estimates
12.2 Speed from Skid
12.3 Uncertainty Cuts Both Ways
12.4 Speeds from Scraps and Gouges
12.5 Speed from Flight
12.6 Speed from Momentum
12.7 Speed from Rotation of Car
12.8 Speed from Damage
12.9 Speed from Frame Damage
12.10 Speed from Radius
12.11 Relative Speed from Tire Markings
12.12 Injuries
12.13 Speed from Acceleration

Chapter 13: Safety, or Why the Blank Do
People Ride Those Blankety-Blank Things?
13.1 The Attraction
13.2 Visceral Involvement
13.3 Comparison
13.4 Public Attitude
13.5 Dearth of Statistics
13.6 Why Not?

Chapter 14: Visual Perception and
Motorcyclists’ Conspicuity
14.1 Introduction
14.2 Accident Statistics
14.3 Conspicuity Is a Significant Factor
14.4 Human Factors: How the Eyes Work
14.5 Dynamic Visual Acuity Is Related to Driving
14.6 Daytime versus Nighttime Vision
14.7 Glare
14.8 Contrast Sensitivity
14.9 Human Factors: The Brain Is in Charge
14.10 Human Factors: Response to a Crisis Takes Time
14.11 Back to Conspicuity
14.12 Studies of Conspicuity
14.13 Ways to Increase Conspicuity
14.14 Eye Protection Is Vital
14.15 Helmets from the Vision Perspective

Endnotes

Chapter 15: Anatomy of a Well-Managed, Well-Funded Case and Things That Happen Way Too Often
15.1 Getting Retained
15.2 The History
15.3 Investigation
15.4 Personalities
15.5 Preparation
15.6 Deposition
15.7 Trial

Chapter 16: Motorcycle Steering Revisited (Because Not All Is As It Seems)
16.1 Introduction
16.2 Riding Categories
16.3 Motorcycle Steering
16.4 Conclusion

Chapter 17: Primary versus Secondary Safety
17.1 Introduction
17.2 Secondary Safety
17.3 The BMW C 1
17.4 Primary Safety
17.5 Conclusion

Chapter 18: Motorcycle Accident Injury Biomechanics
18.1 It’s Not the Fall that Hurts; It’s the Landing!
A. Newton’s Laws applied
18.2 Soft Tissue versus Hard Tissue Injuries
18.3 Helmets and Head Injury
A. Hematomas
B. Epidural Hematoma
C. Subdural Hematoma
D. Subarachnoid Hematoma
E. Intracerebral Hematoma
F. Coup-Contra Coup Injuries
G. Linear Acceleration and the Head Impact Criteria (HIC)

18.4 Helmets
A. Increase the stopping distance
B. The shell
C. The chin-bar
D. Chin-strap, comfort liner, and face-shield
E. Orthopaedic injuries

Chapter 19: Engineering Analysis Reports
Part II: Legal Analysis

Chapter 20: Introduction
20.1 Declining Accident Rate
20.2 How This Section Was Researched and Written
20.3 Purpose and Suggested Use
20.4 Preliminary Considerations in Evaluating a Case

Chapter 21: Helmets: Compulsory Use
21.1 Background
21.2 Federal Intervention
21.3 Current Helmet Laws State-by-State
21.4 Helmet Litigation State-by-State
A. Background
B. State Litigation

Chapter 22: Helmets: Negligence for Not Wearing
22.1 Background
22.2 Litigation
22.3 Concluding Thoughts

Chapter 23: Intersection Collisions
23.1 Introduction and Statutory Background
23.2 Research Methodology
23.3 Driver Turning Left in Front of Motorcycle
23.4 Motorcyclist Turning Left
23.5 Other Intersection Cases

Chapter 24: Motorcycle or Driver Overtaking
24.1 Introduction and Statutory Background
24.2 Overtaking Cases

Chapter 25: Collision with Backing, Parked, Stalled, Disabled, or Slow Vehicle
25.1 Introduction and Statutory Background
25.2 Cases
