Preface xiii

Introduction 1

1 Comparing productivity of the Japanese and US automobile industries 8

2 The internationalization of the Japanese automotive industry and local production overseas 57

3 The recovery of European and US auto makers, and relocating and changing lean production 83

4 Early 1990s – the Japanese automotive industry loses international competitiveness, and the development of restructuring strategies 92

5 The restructuring of the global automotive and auto-parts industries 135

6 The restructuring of the world’s auto-parts industry and the transfiguration of the keiretsu parts transaction 167

7 Global M&A and the future of the global auto industry – the light and dark sides of merger and re-alignment 203

8 The Asian and ASEAN automotive industries in the global era 230
9  China’s automotive industry in the global era, Japanese auto makers, and their China strategies  260

10  Conclusion – the global automotive industry’s perspective on the twenty-first century and tasks for the Japanese automotive industry  294

Epilogue  314

Index  317
Figures

1.1 Comparison of two companies each for Japan and US for value added page 13
1.2 Labor equipment rate (trend for two companies each for US and Japan) 19
1.3 Trends for the two companies each of the US and Japan for production equipment and tangible fixed assets 22
1.4 Comparison of two companies each in the US and Japan for trends in per head wages 23
1.5 Trends in production volume and labor productivity of the Japanese automobile industry; amount of labor input manpower distribution 27
1.6a Changing standards in productivity, labor input quantity, and process-wise required labor hours of the Japanese automobile industry (1975–1978) 28
1.6b Changes in productivity, labor input quantity, distribution of labor, and labor productivity in the Japanese automobile industry (1975–1978) 29
1.7 Progress rate of process-wise productivity of small passenger car factory (yearly rate) 30
1.8 Ratio of investment occupied by short-term equipment investment (die, tools) 38
1.9 Ratio of long-term investment as per sales (equipment investment other than die, tools) 38
4.1 Number of base models and variations of domestically produced vehicles 101
4.2 Number of named cars by country 101
4.3 Simultaneous engineering 107
4.4 Nissan revival plan – cost-reduction effect: ¥1 trillion 117
4.5 NPR recap: consolidated profits 118
4.6 Factors affecting 2001 ordinary profits 118

# Tables

1.1 Productivity-related indices for two US and two Japanese automobile makers

1.2 Trends for the two companies each of US and Japan for production equipment, tangible fixed assets

1.3 Trends in average monthly wages of eleven automobile makers in the US and Japan

1.4 Trends in wages of UAW standard union members

1.5 Trends in US-Japan labor and capital distribution rate

1.6 Japan-US comparison of wage labor productivity

1.7 Labor time required per vehicle as per direct and indirect departments

1.8 Labor time required per vehicle as per small car automobile and department (direct departments)

1.9 Labor time required per vehicle as per model and production process (direct departments)

1.10 Labor time required per small vehicle as per process (indirect departments)

1.11 Input, output, productivity ratio, related to transportation equipment (1967 = 100.0)

1.12 Calculation of US and Japanese labor costs for a subcompact vehicle

1.13 Estimated per-vehicle employee costs for Ford and Toyo Kogyo in 1979

1.14a Quality comparison of US automobiles versus certain imports

1.14b Ratings of body and mechanical repair

1.14c Customer loyalty – percentage who would buy same model again

1.15 Seven factors affecting productivity – comparison of technology, management, and organization

4.2 Factors for increase and decrease in profits for Japanese auto makers in fiscal year 1993
4.3 Major business indicators of Honda
5.1 Component procurement strategies (Big Three)
5.2 Worldwide sales ranking of automobile component manufacturers, 1995–1997
5.3 M&A of the automobile component industry, 1995–1997
6.1 Classification of parts and suppliers
6.2 The contents of related special functions in the main category for parts
6.3 GM, Ford, Daimler-Chrysler’s strategies for suppliers
6.4 Two strategic alternatives
6.5 Business climate of the main parts of production in-house/outourcing of European auto makers
6.6 Parts-procurement policies among European auto makers
6.7 Names of plants and countries of supplier parks in Eastern Europe
7.1 Ranking of ability of ten leading auto makers (2001)
7.2 Sales of the best ten auto-parts makers in the world
8.1 Automobile market in thirteen Asian countries
8.2 Comparison of BBC and AICO plans
8.3 Summary of parts production capability of each country (1990–1996)
8.4 Summary of intensive production prospects
8.5 Trends of Japanese automobile manufacturers after the currency crisis
8.6 A list of export destinations of Thai Toyota
8.7 Thai Toyota – outline of IMV project
8.8 Thai Toyota – contents of IMV project
8.9 Thai Toyota – self-support project (a part of IMV project)
9.1 China’s leading groups of companies around 1993 – the main data of the automotive industry and the data after that
9.2 Automotive-related parts of investment incentive
9.3 Production models and number of the leading foreign-affiliated automobile makers
9.4 List of auto parts which are mainly supported
9.5 Demand forecast for China’s automotive market in 2015 (10,000)
