Preface	<i>xvii</i>
<b>PART I</b>	
Introduction	1
<b>CHAPTER 1</b>	
Engineering in the Wireless World	3
1.1 Moving to the Wireless World	3
1.1.1 Wireless Markets and Needs	3
1.1.2 Living in the Wireless World	6
1.2 Understanding Wireless-Based Application Systems	8
1.2.1 Basic Definitions	8
1.2.2 Basic Components	8
1.2.3 Special Features and Properties	10
1.2.4 Essential Requirements and Expectations	11
1.2.5 Benefits, Issues, Challenges, and Limitations	12
1.2.6 Classification of Wireless-Based Application Systems	13
1.3 Engineering Wireless-Based Application Systems	14
1.3.1 Engineering Perspectives	16
1.3.2 Engineering Issues, Challenges, and Needs	17
1.4 Summary	20
References	21
<b>PART II</b>	
Mobile Technologies and Operation Environments	23
<b>CHAPTER 2</b>	
Mobile Devices and Operating Systems	25
2.1 An Overview of Mobile Devices	26
2.1.1 Limitations	26
2.1.2 Evolution and Integration	30
2.2 Mobile Operating Systems	35
2.2.1 Symbian OS	39
2.2.2 Windows CE/Mobile	41
2.2.3 Embedded Linux (Mobile Linux)	44
2.3 Mobile Application Platforms	45

2.3.1	Java Platform	46
2.3.2	BREW	48
2.4	Summary	51
	References	51

### CHAPTER 3

	Wireless Application Protocols and Technology	53
3.1	Introduction to WAP	53
3.1.1	Brief History	53
3.1.2	WAP Background	55
3.2	Overview of WAP Architecture and Protocols	56
3.2.1	WAP Programming Model	56
3.2.2	WAP Protocol Stack	57
3.2.3	WAP Service Architecture	59
3.2.4	From Web Proxy to WAP Proxy Gateway	62
3.2.5	WAP Push Mechanism	66
3.3	WAE	68
3.3.1	WML	68
3.3.2	WMLScript	70
3.3.3	UAProf	71
3.4	WAP and Messaging Services	72
3.4.1	SMS	72
3.4.2	MMS	74
3.4.3	MMS Works Together with WAP and SMS	74
3.5	Future of WAP—OMA	75
3.5.1	Converging to WAP 2	75
3.5.2	OMA	76
3.6	Summary	78
	References	79

### CHAPTER 4

	Technologies for Mobile Client Software	81
4.1	XML-Based Technologies	81
4.1.1	XML Syntax	82
4.1.2	XML Validation: Document Type Definition/Schema	83
4.1.3	XML Styling: Cascading Style Sheets and Extensible Stylesheet Language	86
4.1.4	XML-Based Markup Languages	89
4.2	Mobile Web Client	90
4.2.1	XHTML Basic	90
4.2.2	The XHTML Mobile Profile	92
4.3	Java Mobile Client	94
4.3.1	CLDC Connection Framework	94
4.3.2	MIDP Development	95
4.4	i-mode	98
4.4.1	i-mode Infrastructure	98

4.4.2	i-mode Client Technology	99
4.4.3	Server-Side Technologies	100
4.5	Summary	104
	References	104

## CHAPTER 5

	Wireless Multimedia Technologies	107
5.1	Multimedia Streaming	108
5.1.1	Interactive Mobile Services	109
5.1.2	Extensible Markup Language	109
5.1.3	SMIL	110
5.1.4	Mobile Streaming Architecture	110
5.1.5	Backend Server	111
5.1.6	Streaming Client	116
5.1.7	Solution Providers	118
5.2	Wireless Network Technologies	119
5.2.1	Network Protocols	119
5.2.2	QoS and Scalability	121
5.2.3	Proxy Requirement	121
5.2.4	Unicast Versus Multicast	122
5.2.5	Wireless Multimedia Streaming Standards	122
5.3	Codec	123
5.3.1	MPEG	123
5.3.2	MPEG-4 Architecture	123
5.3.3	MPEG-4 Visual Profiles	124
5.3.4	MPEG-4 Encoding and Decoding	124
5.3.5	MPEG-4 File Format	124
5.3.6	Audio Compression Standard	124
5.4	Conclusion	125
	References	125
	Selected Bibliography	126

## PART III

	Wireless Networks	129
--	-------------------	-----

## CHAPTER 6

	Wireless Local Area Networks	131
6.1	Wireless LAN Protocols	131
6.2	Wireless LAN Standards	132
6.2.1	The 802.11 Physical Layer	133
6.2.2	The 802.11 MAC Sublayer	137
6.3	Wireless LAN Infrastructures	142
6.3.1	Basic Service Areas	142
6.3.2	Extended Service Areas	143
6.3.3	Mobility	144
6.4	Future for Wireless LAN Networks	144
6.4.1	Bluetooth	145

6.4.2	Ultrawideband	145
6.4.3	IEEE 802.16 Broadband Wireless	146
6.4.4	3G Cellular Networks	147
6.4.5	Discussions	147
6.5	Summary	147
	References	148
	Selected Bibliography	148

## CHAPTER 7

	Wireless Wide Area Networks	149
7.1	Wireless WAN Overview	149
7.1.1	Common Wireless WAN Architecture	149
7.1.2	Mobility Management	151
7.1.3	Communication Background	153
7.2	Cellular Mobile Networks—Up to 2.5G	155
7.2.1	1G Networks: AMPS	156
7.2.2	2G Networks: D-AMPS, GSM, cdmaOne, and More	157
7.2.3	2.5G Networks: General Packet Radio System and Enhanced Data Rates for Global/GSM Evolution	160
7.3	Cellular Mobile Networks—3G and Beyond	162
7.3.1	3G Networks: CDMA2000 and WCDMA	163
7.3.2	4G Networks and Beyond	165
7.3.3	Standardization Organizations	167
7.4	Summary	168
	References	169

## CHAPTER 8

	Wireless Personal Area Networks	171
8.1	Wireless PAN Overview	171
8.1.1	IEEE 802.15	172
8.1.2	Near-Field Communication	174
8.2	Bluetooth	175
8.2.1	Introduction	175
8.2.2	Protocol Layers	177
8.2.3	States and Operations	181
8.2.4	Application Profiles	183
8.3	Device Coordination (Wireless Access Protocol)	188
8.3.1	Jini	188
8.3.2	Universal Plug-and-Play	191
8.3.3	Home Service Gateway	193
8.4	Summary	194
	References	195

## PART IV

	Engineering Wireless-Based Application Systems	197
--	--	-----

**CHAPTER 9**

System Requirements Engineering, Analysis, and Modeling	199
9.1 Understanding the Wireless Application Domain	199
9.2 Engineering System Requirements	200
9.2.1 Requirements Engineering Process	200
9.2.2 Requirements Elicitation for Wireless-Based Software Systems	202
9.3 System Analysis and Modeling	207
9.3.1 System Infrastructure and Connectivity Modeling	208
9.3.2 System User Analysis and Modeling	209
9.3.3 System Function Analysis and Modeling	211
9.3.4 System Data and Object Analysis and Modeling	212
9.3.5 System Dynamic Behavior Analysis and Modeling	220
9.4 Summary	225
References	226

**CHAPTER 10**

System Architectures for Wireless-Based Application Systems	227
10.1 Basic Concepts About System and Software Architectures	227
10.1.1 What Is System Architecture?	227
10.1.2 What Is Software Architecture?	230
10.1.3 Why Is Software Architecture Important?	230
10.1.4 Software Architecture Presentation and Specification	231
10.1.5 Architecture Design Process	231
10.1.6 Quality Factors in Architectural Design	233
10.2 The Network-Based System Infrastructure Classification	234
10.2.1 Application Systems Based on Wireless LAN Networks	234
10.2.2 Wireless Personal Network-Based Application Systems	234
10.2.3 Application Systems Based on Wide Area Networks	235
10.2.4 Wireless Application Systems Based on Heterogeneous Networks	237
10.2.5 Mobile Commerce Application Systems Based on Sensor Networks	238
10.3 Wireless Internet-Based Application System Architectures	239
10.3.1 The i-mode Application System Architecture	239
10.3.2 Mobile-Aware Application Architecture	242
10.3.3 Mobile-Transparent Application Architecture	244
10.3.4 Mobile-Interactive Application Architecture	245
10.3.5 Advantages and Limitations of Different Architectures	246
10.3.6 Comparison of Different Wireless Internet Application Architectures	247
10.4 Smart Mobile Application Architectures	249
10.4.1 Advantages and Limitations of Smart Mobile Application Systems	250
10.5 Wireless Enterprise Application Architectures	251
10.5.1 Wireless Enterprise Application Architecture Based on Microsoft Mobile Technology	252
10.5.2 Java-Based Wireless Enterprise Application Architectures	253

10.6	Summary	257
	References	258
<b>CHAPTER 11</b>		
	Wireless Security: Introduction	259
11.1	Secret Key Cryptography	260
	11.1.1 Basic Operations	260
	11.1.2 Block Cipher Standards	263
	11.1.3 Stream Cipher and RC4	267
	11.1.4 Confidentiality	268
	11.1.5 Authentication	268
	11.1.6 Data Integrity	269
11.2	Public Key Cryptography	270
	11.2.1 The RSA Algorithm	271
	11.2.2 Confidentiality	273
	11.2.3 Authentication	274
	11.2.4 Data Integrity	275
11.3	Wireless Security Attacks	275
	11.3.1 Attacks Against Confidentiality	276
	11.3.2 Attacks Against Authentication	277
	11.3.3 Attacks Against Data Integrity	279
	11.3.4 Attacks Against Availability	280
11.4	Summary	281
	References	282
<b>CHAPTER 12</b>		
	Wireless Security Solutions	285
12.1	Security Threats and Solutions for Wireless LANs	285
	12.1.1 Overview of IEEE 802.11 WEP Standard	285
	12.1.2 Security Threats for Wireless LANs	286
	12.1.3 Security Countermeasures for Wireless LANs	288
	12.1.4 IEEE 802.11i Security Standard	289
12.2	Security Threats and Solutions for Wireless PANs	293
	12.2.1 Overview of Bluetooth Security Mechanisms	293
	12.2.2 Security Threats for Bluetooth-Based Wireless PANs	296
	12.2.3 Security Countermeasures for Bluetooth-Based Wireless PANs	298
12.3	Security Threats and Solutions for Cellular Networks	299
	12.3.1 Overview of Security Mechanisms in GSM Cellular Networks	300
	12.3.2 Security Threats for GSM Cellular Networks	303
	12.3.3 Security Solutions in 3G Cellular Networks	305
12.4	Summary	307
	References	308
<b>CHAPTER 13</b>		
	Design of Mobile Client Software	311
13.1	Developing Mobile Client Software on Mobile Devices	311

13.1.1	Understanding Mobile Accesses and Mobile Users' Expectations	312
13.1.2	Enable Mobile Technologies	312
13.1.3	Design Issues and Challenges	313
13.2	Classification of Mobile Clients and Architecture Styles	314
13.2.1	Classification of Mobile Clients	314
13.2.2	Unimodal Versus Multimodal Mobile User Interfaces	318
13.3	Design for Mobile Client Software	320
13.3.1	Mobile Client Development Process and Methods	321
13.3.2	Design Principles, Guidelines, and Tips	322
13.4	Mobile Client Design Issues and Solutions	325
13.4.1	Design for Reliable Mobile Client Software	325
13.4.2	Design Unified Mobile Client Interfaces	328
13.4.3	Adding Mobile Links to Online Systems	330
13.5	Application Examples of Mobile Client Software Design	333
13.6	Summary	337
	References	339

## **PART V**

Mobile Commerce Systems	341
-------------------------	-----

### **CHAPTER 14**

Introduction to Mobile Commerce Systems	343	
14.1	M-Commerce Versus E-Commerce	344
14.2	Wireless Device Constraints, Application Usability, and Interface Issues	345
14.2.1	Device Constraints	346
14.2.2	Mobile Application Usability	347
14.2.3	User Interface Issues for M-Commerce	348
	References	350
	Selected Bibliography	350

### **CHAPTER 15**

Multimedia Messaging Service	351	
15.1	MMS Overview	351
15.1.1	MMS Protocol	352
15.1.2	Message Types	353
15.1.3	Message Format	353
15.1.4	Addressing Model	354
15.2	Multimedia Presentation in MMS	354
15.2.1	WML	355
15.2.2	SMIL	355
15.2.3	XHTML	356
15.3	MMS Client	356
15.4	MMS Content Delivery	357
15.5	Client State Diagram	358
15.6	MMS Server	359

15.7	Server State Diagram	360
15.8	Case Study: Nokia	360
15.9	Case Study: Alcatel and Intel	361
15.10	Comparison	362
15.11	Conclusion	363
	References	363
	Selected Bibliography	363

## CHAPTER 16

	Wireless Advertising and Marketing Systems	365
16.1	Understanding Wireless Advertising and Marketing	366
16.1.1	Wireless Ads	366
16.1.2	Business Models	369
16.1.3	Business Issues and Technical Challenges	370
16.2	Engineering Wireless Advertising Solutions	373
16.2.1	Enterprise Processes and Workflows in Wireless Advertising	373
16.2.2	Wireless Ad Targeting	377
16.2.3	Wireless Ad Delivery	378
16.2.4	Wireless Advertisement Tracking	378
16.2.5	Wireless Advertising Payment	380
16.2.6	Performance Measurement in Wireless Advertising	381
16.3	Major Players and Their Solutions	381
16.3.1	SkyGo	381
16.3.2	AvantGo	382
16.3.3	Vindigo	383
16.3.4	Avesair	384
16.4	Summary	384
	References	384

## CHAPTER 17

	Mobile Payment Systems	387
17.1	Wireless Payment	387
17.1.1	Basic Requirements of Wireless-Based Payment Systems	388
17.1.2	Payment Schemes	389
17.1.3	Mobile Payment Process	390
17.1.4	Security Solutions for M-Payment Systems	390
17.2	Different Types of Wireless-Based Payment Systems	391
17.2.1	Account-Based Payment Systems	391
17.2.2	Mobile Wallets	393
17.2.3	SET-Based Mobile Wallet	393
17.3	Major Players in Wireless Payment Systems	394
17.3.1	Paybox	394
17.3.2	Ultra's M-Pay	394
17.3.3	Encorus PaymentWorks	395
17.3.4	SNAZ	395
17.4	Payment Models, Challenges, and Issues	396
17.4.1	Business Challenges	396

---

17.4.2	Technical Challenges	396
17.4.3	Interoperability Challenges	397
17.5	Conclusion	398
	References	398
	Selected Bibliography	399
	About the Authors	401
	Index	403
