

The logo features a stylized globe with latitude and longitude lines, partially obscured by the text 'GNSS'.

**GNSS** TECHNOLOGY AND APPLICATIONS SERIES

**AHMED EL-RABBANY**

**INTRODUCTION TO**

**GPS**

**THE GLOBAL POSITIONING SYSTEM**

**SECOND EDITION**

# Contents

	<b>Preface</b>	<b><i>xiii</i></b>
	Acknowledgments	<i>xiv</i>
<b>1</b>	<b>Introduction to GPS</b>	<b>1</b>
1.1	Overview of GPS	2
1.2	GPS Segments	3
1.3	GPS Satellite Generations	4
1.4	Current GPS Satellite Constellation	6
1.5	Control Sites	7
1.6	GPS: The Basic Idea	8
1.7	GPS Levels of Service	10
1.8	Why Use GPS?	11
	References	11
<b>2</b>	<b>GPS Details</b>	<b>13</b>
2.1	GPS Signal Structure	13
2.2	GPS Modernization	16

---

2.3	GPS Receiver Types	18
2.4	Time Systems	20
2.5	Pseudorange Measurements	21
2.6	Carrier Phase Measurements	22
2.7	Doppler Measurements	24
2.8	Cycle Slips	25
2.9	Linear Combinations of GPS Observables	26
	References	27
<b>3</b>	<b>GPS Satellite Orbit</b>	<b>29</b>
3.1	Motion of Space Objects	29
3.2	Types of Orbits	32
3.3	Ideal (Keplerian) Satellite Orbit	33
3.4	Perturbed Satellite Orbit	35
3.5	GPS Broadcast Orbit	36
3.6	GPS Almanac	39
3.7	Satellite Visibility	40
	References	42
<b>4</b>	<b>GPS Errors and Biases</b>	<b>43</b>
4.1	GPS Ephemeris Errors	44
4.2	Selective Availability	45
4.3	Satellite and Receiver Clock Errors	47
4.4	Multipath Error	48
4.5	Antenna Phase Center Variation	49
4.6	Receiver Measurement Noise	50
4.7	Ionospheric Delay	51
4.8	Tropospheric Delay	55

---

4.9	Other Errors and Biases	56
4.10	Satellite Geometry Measures	57
4.11	User Equivalent Range Error	60
	References	61
<b>5</b>	<b>GPS Positioning Modes</b>	<b>65</b>
5.1	GPS Point Positioning: The Classical Approach	66
5.2	GPS PPP	68
5.3	GPS Relative Positioning	70
5.4	Static GPS Surveying	71
5.5	Fast (Rapid) Static	73
5.6	Stop-and-Go GPS Surveying	74
5.7	RTK GPS	76
5.8	Real-Time Differential GPS	77
5.9	Real Time Versus Postprocessing	79
5.10	Communication (Radio) Link	80
	References	82
<b>6</b>	<b>Ambiguity Resolution Techniques</b>	<b>83</b>
6.1	Antenna Swap Method	85
6.2	OTF Ambiguity Resolution	86
	References	88
<b>7</b>	<b>GPS Data, Products, and Correction Services</b>	<b>89</b>
7.1	GPS Data and Product Services	91
7.2	Maritime DGPS Service	93
7.3	WADGPS Systems	95
7.4	Multisite RTK System	98
	References	99

<b>8</b>	<b>GPS Standard Formats</b>	<b>103</b>
8.1	RINEX Format	104
8.2	SP3 Format	109
8.3	RTCM SC-104 Standards for DGPS Services	112
8.4	NMEA 0183 Format	118
	References	121
<b>9</b>	<b>GPS Integration</b>	<b>123</b>
9.1	GPS/Loran-C Integration	123
9.2	GPS/LRF Integration	127
9.3	GPS/Dead Reckoning Integration	128
9.4	GPS/INS Integration	130
9.5	GPS/Pseudolite Integration	132
9.6	GPS/Cellular Integration	134
	References	136
<b>10</b>	<b>GPS Applications</b>	<b>139</b>
10.1	GPS for the Utility Industry	139
10.2	GPS for Forestry and Natural Resource	141
10.3	GPS for Precision Farming	142
10.4	GPS for Civil Engineering Applications	144
10.5	GPS for Monitoring Structural Deformations	145
10.6	GPS for Open-Pit Mining	146
10.7	GPS for Land Seismic Surveying	148
10.8	GPS for Marine Seismic Surveying	149
10.9	GPS for Airborne Mapping	151
10.10	GPS for Seafloor Mapping	152
10.11	GPS for Vehicle Navigation	154

---

10.12	GPS for Transit Systems	156
10.13	GPS for the Retail Industry	157
10.14	GPS for Cadastral Surveying	159
10.15	Waypoint Navigation (GPS Stakeout)	160
	References	161
<b>11</b>	<b>Other Satellite Navigation Systems</b>	<b>163</b>
11.1	The GLONASS System	163
11.2	Galileo—The European Global Satellite Navigation System	167
11.3	Chinese Regional Satellite Navigation System (Beidou System)	170
11.4	The Japanese QZSS Satellite Navigation System	172
	References	173
	<b>Appendix A: Geodetic Principles—Datums, Coordinate Systems, and Map Projections</b>	<b>175</b>
A.1	What Is a Datum?	175
A.2	Geodetic Coordinate System	177
A.2.1	Conventional Terrestrial Reference System	179
A.2.2	The WGS 84 and NAD 83 Systems	180
A.3	What Coordinates Are Obtained with GPS?	181
A.4	Datum Transformations	182
A.5	Map Projections	183
A.5.1	Transverse Mercator Projection	184
A.5.2	Universal Transverse Mercator	185
A.5.3	Modified Transverse Mercator	187
A.5.4	Lambert Conical Projection	188
A.5.5	Stereographic Double Projection	189
A.6	Local Arbitrary Mapping Systems	190

A.7	Height Systems	191
	References	193
	<b>Appendix B:</b>	
	<b>GPS Accuracy and Precision Measures</b>	<b>195</b>
	Reference	196
	<b>Appendix C:</b>	
	<b>Useful Web Sites</b>	<b>197</b>
C.1	GPS/Glonass/Galileo Information and Data	197
C.2	Some GPS Manufacturers	199
	<b>About the Author</b>	<b>201</b>
	<b>Index</b>	<b>203</b>
