# **WORKFLOW MODELING**

---

**TOOLS  
FOR  
PROCESS  
IMPROVEMENT  
AND  
APPLICATION  
DEVELOPMENT**

**SECOND EDITION** by Alec Sharp

# Contents

Preface	xv
<b>PART I</b>	
Background, Principles, Overview	1
<b>CHAPTER 1</b>	
Business Processes—More Important Than Ever	3
Fosdick’s Thesis	3
And Now?	4
The Need for Practical Guidance	5
Building Methods to Meet the Need	8
What to Expect	9
Who Are “You”?	9
References	10
<b>CHAPTER 2</b>	
A Brief History—How the Enterprise Came to Be Process Oriented	13
Learning from the Past	13
The Multiskilled Craftworker	14
The Advent of the Specialist	15
The Rise of Functional Specialties	16
Function and Organization—What’s the Difference?	17
Losing the Process in the Functions	17
Enter Reengineering: 1990–1993	19
Exit Reengineering: 1994–1995	20
The Wonder Years: 1996–2000	21
Business Process Rides Again!: 2000–Present	22
From Fad to Business as Usual	23
Process-Oriented Products	24
Process Frameworks	24
Less Polarization	25
A Predictable Complaint	26
Process Orientation—The Best of All Worlds?	28
References	28

**CHAPTER 3**

Business Processes—What <i>Are</i> They, Anyway?	31
The Trouble with “Process”—Why We Need a Clear Definition	31
No Definitions, but Lots of Opinions	31
Is “Business Process” an Arbitrary Concept?	32
Does It Matter?	32
Trouble Controlling Scope and Producing Useful Deliverables	33
Problems Caused by Improperly Defined Processes	34
Your Scope Will Often Be Smaller Than a Business Process	35
Hasn’t This Problem Been Solved Already?	36
What Do Books in the “Business Process” Field Say?	36
What Does the Dictionary Say?	37
What Do Information Systems Dictionaries Say?	37
So What, Finally, <i>Is</i> a Business Process?	38
The Approach We’ll Take	39
Defining “Process” in General	39
Defining <i>Business</i> Process in Particular	46
A Test for Business Processes Boundaries	49
Applying the Guideline	53
So What?	55
Is Everything a Process?	55
Can All Processes Be Modeled?	56
Summary	56
Criteria for Business Processes	56
Other Business Process Characteristics	59
Measurable	59
Automation	59
Levels of Detail	60
Customers: Internal and External	60
Closing Advice	61
Processes Are Hidden	62
They’re Bigger Than You Think	62
Hidden Issues	63
What’s Next?	64
References	64

**CHAPTER 4**

The Approach in a Nutshell	65
This Chapter and Beyond...	65
Why It Works	66
Whom It’s For	67
Processes—Results, Not Work	67
Frameworks in General	68
A Framework for Process Enablers	69
A Framework for Putting Processes and Systems in Context	72
One Person’s Mission Is Another Person’s Objective	72
Expanding the Framework	73

A Closer Look at the Three-Tier Architecture	74
Presentation Services	74
Business Services	75
Data Management	76
Models in General	76
The Modeling Techniques We Employ	77
Business Process: Process Workflow Models	77
Presentation Services: Use Cases and Use Case Scenarios	81
Business Services: Service Specification and Supporting Techniques	82
Data Management: Data Models	82
Five-Tier Thinking	82
A Workflow-Driven Methodology—The Process of Studying Processes	83
Establish Process Context, Scope, and Goals	84
Understand the As-Is Process	85
Design the To-Be Process	85
After the Three-Phase Method	87
Applications of the Approach	88
<b>PART II</b>	
Phase 1: Establish Process Context, Scope, and Goals	91
<b>CHAPTER 5</b>	
Discover Business Processes	93
Process Discovery—What, Why, and How	93
The Goal: An Overall Process Map	95
The Approach	97
Questions You’ll Probably Have	99
Step 1: Get Started	101
Gathering Background Information	101
Meeting with the Sponsor	105
Step 2: Conduct Pre-Session Interviews	110
Step 3: Prepare for First Session	114
Step 4: Initiate First Session	118
Step 5: Analyze Terms and Find the Nouns	123
Step 6: Identify Activities	127
Step 7: Link the Activities and Determine Business Processes	129
Naming the Business Processes	132
Choose the First Process Project	133
Divine Intervention	134
Analytic Approach	135
References	136
<b>CHAPTER 6</b>	
Establish Process Scope and Contents	137
Goals	137
Overview	137
How Specifically Do Scope and Contents Help?	139

Step 1: Identify Triggering Event(s)	139
Step 2: Identify Result for Each Stakeholder	142
Step 3: Identify Subprocesses	146
Step 4: Identify Cases	147
Step 5: Identify Participating Organizations	149
Step 6: Identify Individual Actors and Main Responsibilities	149
Step 7: Identify Supporting Mechanisms	149
Step 8: Identify Process Measures (Optional)	150
<b>CHAPTER 7</b>	
Conduct Initial As-Is Process Assessment	151
Establishing Rationale and Direction	151
The Process Case for Action and Process Vision	153
Why Bother? Doesn't Everyone Know This Already?	153
The Case for Action	154
Step 1: Stakeholder Assessment	154
Step 2: Context	155
Step 3: Consequences of Inaction	156
A Note on the Simplified Framework	156
The Vision	157
An Example	158
A Closer Look at Assessment by Stakeholder	159
Everyone's a Critic...	159
Don't Guess—Ask!	160
The Customer	161
The Performers	163
Owners and Managers	164
Suppliers	165
Other Groups	165
Process Differentiator	166
What Is a Differentiator, Improvement Dimension, or Strategic Discipline?	166
A Common Misconception	168
Differentiators in Action	169
The Relevance of the Concept	170
Faster, Cheaper, Better, or What?	172
Common Questions	173
Look at the Process in Terms of Enablers	174
Workflow Design	175
Information Systems	176
Motivation and Measurement	178
Human Resources	179
Policies and Rules	181
Facilities	182
All Enablers Matter	182
The Environment in Which the Process Operates	182
An Example	183

Topics in “the Environment”	184
Beliefs, Culture, and Management Style	185
Everything Stems from Beliefs	186
Other Cultural Traits	186
Core Competencies	188
What Are We Really Good At?	188
Measures	189
How Many?	190
Got the Time?	190
Who’s Involved?	192
Efficiency	192
Cost	193
Summary of Measures	193
Potential Improvements	194
One Poster Is Worth a Thousand Words	195
Summarizing Findings	195
It Matters!	195
References	197

### **PART III**

Phase 2: Understand the As-Is Process	199
---------------------------------------	-----

### **CHAPTER 8**

Process Workflow Models: The Essentials	201
Overview	201
The <i>Real</i> Purpose of This Section	201
The Practical Side	201
Swimlane Diagrams—What and Why	202
What’s the Attraction?	202
What Are They?	202
Example 1: The Essence of Workflow Modeling	205
Example 2: Getting to the Essence Without Diving into Detail	205
Question 1: “Who Gets the Work Next?”	207
Question 2: “How Does It Get There?”	209
Question 3: “Who <i>Really</i> Gets the Work Next?”	210
What Did We Learn from This Example?	211
Example 3: “How Do I Depict...?”	213
Customer Service...	213
Repair Service...	214
Service Analysis...	214
Telemarketing...	214
Market Database Research...	215
RB Tel—Questions Raised	215
Essential Elements of a Swimlane Diagram	216
The Details	216
Actors and Roles	216
Steps and Decisions	219

Flow	223
What's Next?	231
<b>CHAPTER 9</b>	
Process Workflow Models—Managing Progressive Detail	233
The Curse of Detail	233
What's the Problem?	233
Achieving a Controlled Descent	234
Three Levels of Workflow Diagrams	234
Level 1: The Handoff Diagram	235
Issues and Observations with the Handoff Diagram	237
Recap	239
Level 2: The Service Diagram	240
Level 3: The Task Diagram	243
Closing Thoughts	244
<b>CHAPTER 10</b>	
Process Workflow Models—The Finer Points	245
Introduction	245
Actors and Other Characters	245
Every Actor? Really?	246
Jobs, Roles, and Committees	247
Systems as Actors	248
Passive Actors	252
Processes as Actors	254
Steps and Types of Steps	255
What Makes It Go? Flow!	255
Dealing with Complexity	258
Flowing On	261
<b>CHAPTER 11</b>	
Develop As-Is Process Workflow Model	263
Introduction	263
Dealing with Resistance to As-Is Modeling	265
Assembling the Team	267
Management and Front-Line Participants?	267
Front-Line Workers or Representatives?	268
IT and Other Supporting Players?	268
External Participants	269
Preparing for the Modeling Session	269
Scheduling	269
The Kickoff	273
Approach	273
Question 1: What Are We Doing?	274
Question 2: Which Process Are We Modeling?	275
Building the Handoff-Level Diagram	275
The Mechanics and the Methods	275

Option 1—Trace the Flow (The Three Questions Approach)	276
Option 2—Bottom Up (Gather Activities, Then Assemble)	280
Refining the Initial Model—The Five Key Questions	281
“Can We Stop Now?”	284
Producing the Service Diagram	288
Issues During As-Is Modeling	290
Misapplying Workflow Modeling	290
Modeling Different Versions of the Same Process	292
Inability to Model a Particular Situation	293
Facilitation Issues	294
Dealing with Disagreement	296
Conclusion	297
<b>PART IV</b>	
Phase 3: Design the To-Be Process	299
<b>CHAPTER 12</b>	
Conduct Final As-Is Process Assessment	301
Introduction	301
Getting Ready	303
Confirm Initial Assessment and Goals	303
Capture First Impressions	304
Identify Leverage Points	304
Assessment by Enablers	306
Workflow Design	307
Information Systems	309
Motivation and Measurement	310
Human Resources	314
Policies and Rules	317
Facilities	317
Other Factors	318
Assess Individual Steps	319
Consolidate Improvement Ideas	320
Decide on Approach	320
References	321
<b>CHAPTER 13</b>	
Determine To-Be Process Characteristics and Workflow	323
Look Before You Leap!	323
Goals	324
Philosophy/Approach	324
Post and Review Key Materials from Previous Phases	326
Collect Ideas—Getting Started	327
Build on Ideas Generated During Assessment	327
Generate Ideas That Specifically Address the “Leverage Points”	328
Steal Ideas by Reviewing “Best Practices”	328
“Best Practices” in General	328

Workflow Design	329
Information Systems	330
Motivation and Measurement (“Reward and Punishment” Schemes)	331
Human Resources	332
Policies and Rules	333
Facilities Design (or Other Factors)	334
Brainstorming Additional Suggestions	334
Apply the Challenge Process	335
Assess Ideas in Context and Select	337
Develop Ideal To-Be Workflow	340
Develop To-Be Workflow	343
Road Trip	344
References	347
<b>PART V</b>	
Related Requirements Definition Techniques	349
<b>CHAPTER 14</b>	
Business-Oriented Data Modeling	351
Data Modeling—What It Is, What It Isn’t	351
Basic Terms and Concepts	352
A Simple Example	353
The Narrative Component—the Entity Definitions	353
The Graphic Component—the Entity-Relationship Diagram	355
Levels of Detail	359
Contextual Data Model	362
Conceptual Data Model	362
Logical Data Model	363
The Components—Further Guidelines and Pitfalls	363
Entities	364
Attributes	366
Relationships	367
Starting Your Data Model	369
Starting Covertly	369
Starting Overtly	370
Starting by Reverse Engineering	372
From Conceptual to Logical	373
References	373
<b>CHAPTER 15</b>	
Requirements Modeling with Use Cases and Services	375
From Workflow to Information System Requirements	375
A Time of Transition	375
Transition into Use Cases	376
Separation into Business Services and Use Cases	376
A Quick Example	380
Business Services—Why?	384

Disclaimer and Direction	387
The Approach and How It's Different	387
Business Services in General	390
Services and Events—A Point of Confusion	390
Business Services and Business Events	391
What Is an Event?	391
Types of Events	392
Services—Granularity	393
A Few More Guidelines	394
Want More?	395
Use Case Concepts	395
Use Cases in General	395
Extensions and Scenarios	396
The Methodology	397
Seven Steps to Success	397
Using Facilitated Sessions	398
Step 1: Identify Services (Scope) and Complete Initial Service Specifications (Concept)	399
Choose Your Primary Approach	399
Brainstorm for Events or Services	400
Refine the List of Events or Services	401
Finalize the Scope-Level List of Services	402
Describe Business Services	403
Confirm Business Services	404
Step 2: Identify Use Cases (Scope) and Complete Initial Use Case Descriptions (Concept)	404
Discover Use Cases	404
Describe the Use Cases	406
Step 3: Complete Final Service Specifications (Detail)	409
Step 4: Begin Final Use Case Descriptions (First Pass at Detail)	412
Create Use Case Dialogues	412
Step 5: Refine Final Use Case Descriptions (Final Pass at Detail)	415
Step 6: Identify and Describe Use Case Scenarios (Conditions and Outcomes)	418
Establish Use Case Scenarios	419
Step 7: Complete Use Case Scenario Descriptions (Dialogues); Refine Use Cases As Necessary	420
Closing Thoughts	420
More Uses of Use Cases	420
But Why Do They Work So Well?	422
Reference	422
Appendix	423
About the Authors	435
Index	437
