Foreword	vii
Preface to the Fourth Edition	ix
Preface to the Second Edition	xiii
Preface to the First Edition	xv
About the Editor	xvii
Chapter 1 Steel as a Material	1
1.1 Steels and Cast Irons	2
1.2 Structure	2
1.3 Crystal Structure of Iron-Based Alloys	3
1.4 Steel Characterization	4
1.5 Chemical Composition of Steels	5
Chapter 2 Processes in Steel Production	9
2.1 Reduction Processes	10
2.2 Steelmaking	14
2.3 Secondary Remelting Processes	23
Chapter 3 Introduction to Metallographic Technique	25
3.1 Grains in Metals	25
3.2 Stereology	28
Chapter 4 Metallographic Technique—Macrography	39
4.1 Sample Preparation for Macrographic Examination	39
Chapter 5 Metallographic Technique—Micrography	69
5.1 Optical Microscopy	69
Chapter 6 Metallographic Technique— Electron Microscopy and Other Advanced Techniques	85
6.1 The Scanning Electron Microscope	87
6.2 The Transmission Electron Microscope	92

6.3 Scanning Transmission Electron Microscopy	93
6.4 Atom Probe Tomography	94
6.5 Atomic Force Microscopy	96
6.6 Laser Scanning Confocal Microscopy	97
Chapter 7 Equilibrium Phases and Constituents in the Fe-C System	101
7.1 The Phases of Iron and Its Alloys	102
7.2 Ferrite	104
7.3 Austenite	106
7.4 Cementite	109
7.5 Pearlite	111
7.6 Intermediate Structures—Hypo-Eutectoid and Hyper-Eutectoid	118
Chapter 8 Solidification, Segregation, and Nonmetallic Inclusions	129
8.1 Continuous Casting and Ingot Casting	130
8.2 Solidification Shrinkage	130
8.3 Segregation	132
8.4 Microporosity	150
8.5 Segregation in Steel Products	151
8.6 Hot Cracking	158
8.7 The Structure of Castings, Ingots, and Continuous Casting Products	158
8.8 Macrosegregation	168
8.9 Monitoring the Quality of Continuous Casting Products	170
8.10 Nonmetallic Inclusions	173
Chapter 9 Conventional Heat Treatments—Usual Constituents and Their Formation	193
9.1 Austenite Decomposition	194
9.2 Austenite and the Measurement of the Austenitic Grain Size	223
9.3 Ferritic Microstructures	240
Chapter 10 Conventional Heat Treatment—Basic Concepts	273
10.1 Annealing	274
10.2 Normalizing	285
10.3 Quenching and Tempering	294
10.4 Tempering	320
10.5 Selective Quenching	332
10.6 Martempering	337
10.7 Austempering	338
10.8 Patenting	338
10.9 Thermochemical Treatments	339
Chapter 11 Hot Working	353
11.1 Hot Working and Cold Working	353
11.2 Main Effects of Hot Working	354
11.3 Forming Finished Parts	388
11.4 Defects in Hot Working	391
Chapter 12 Mechanical Work of Steels—Cold Working	403
12.1 Cold Work	403

12.2 The Effects of Subcritical Annealing in Steels for Forming	409
12.3 Crystallographic Texture	411
12.4 Following Recrystallization Using Microscopy	418
12.5 Medium-Carbon Steels	428
12.6 Electrical Steels	428
12.7 Warm Working—Working in the Intercritical Region	430
12.8 Cold Forming of Parts—Fasteners as Examples	433
12.9 Defects in Cold Forming	436
Chapter 13 Advanced Steels for Forming Operations	445
13.1 Low and Extra-Low Carbon Steels (Interstitial-Free)	447
13.2 High-Strength Low Alloy and Carbon-Manganese Structural Steels	447
13.3 Dual-Phase and Complex-Phase (or Multiphase) Steels	447
13.4 Transformation-Induced Plasticity Steels	454
13.5 Ferritic-Bainitic Steels	460
13.6 Steels Subjected to Quenching and Partitioning Heat Treatment	460
13.7 Coatings	462
Chapter 14 Structural Steels and Steels for Pressure Vessels, Piping, and Boilers	475
14.1 Fine-Grained Structural Steels	476
14.2 Quenched and Tempered Structural Steels	476
14.3 Controlled Rolled (Thermomechanical Treatment) Structural Steels	479
14.4 Steel for Concrete Reinforcement	483
14.5 Steels for High-Temperature Pressure Vessels	493
14.6 Welding of Structural Steels—Metallographic Aspects	496
Chapter 15 Engineered Special Bar Quality Steel (Engineering Steels)	519
15.1 Quenched and Tempered Steels	519
15.2 Coatings	532
15.3 Medium and High-Carbon Steels	533
Chapter 16 Stainless Steels	551
16.1 Relationships Between Chemical Composition and Structure	552
16.2 Martensitic Stainless Steels	553
16.3 Ferritic Stainless Steels	554
16.4 Austenitic Stainless Steels	557
16.5 Duplex Stainless Steels (Ferritic-Austenitic)	565
16.6 Precipitation Hardening Stainless Steels	567
16.7 Intercrystalline or Intergranular Corrosion	571
Chapter 17 Cast Irons	583
17.1 White Cast Irons and Gray Cast Irons	586
17.2 White Cast Irons	593
17.3 Gray Cast Irons	598
17.4 Mottled and Chilled Cast Irons	627
17.5 Nodular Cast Iron or Ductile Cast Iron	634
17.6 Compacted Graphite Iron (CGI) or Vermicular Graphite Iron (VG or GGV)	642
17.7 Malleable Cast Irons	645

Chapter 18	Metallographic Evaluation—Guidelines for Performing and Reporting	667
18.1	The Objectives of Metallographic Evaluation	667
18.2	The Measurement of Micro- or Macrostructural Features	668
18.3	Testing a Hypothesis	674
18.4	The Investigation	676
18.5	The Report	678
