## Basic principles

Quantities and units	22
SI units	22
Legal units	24
Further units	31
Natural constants	34
Mathematical signs and symbols	35
Greek alphabet	35
Basic principles of mechanics	36
Rectilinear and rotary motion	36
Statics	39
Calculation of strength	41
Friction	43
Vibrations and oscillations	46
Terms	46
Equations	48
Vibration reduction	49
Modal analysis	50
Acoustics	52
General terminology	52
Measured quantities for noise emissions	55
Measured quantities for noise immissions	56
Perceived sound levels	57
Optical technology	60
Electromagnetic radiation	60
Geometric optics	60
Wave optics	65
Lighting quantities	65
Laser technology	68
Optical fibers/waveguides	69
Hydrostatics	72
Density and pressure	72
Buoyancy	72
Fluid mechanics	73
Basic principles	73
Basic equations of fluid mechanics	74
Discharge from a pressure vessel	74
Resistance of bodies submerged in a fluid flow	75
Thermodynamics	76
Basic principles	76
Laws of thermodynamics	78
Equations of state	79
Changes of state	81
Cycles and technical applications	81
Heat transfer	86

Electrical engineering	92
Electromagnetic fields	92
Electric field	92
Direct current and direct voltage	94
Time-dependent current	97
Magnetic field	98
Magnetic field and electric current	102
Wave propagation	106
Electric effects in metallic conductors	109
Electronics	112
Basic principles of semiconductor technology	112
Discrete semiconductor devices	115
Monolithic integrated circuits	127
Chemistry	128
Elements	128
Chemical bonds	134
Substances	138
Substance concentrations	140
Reaction of substances	141
Electrochemistry	148
Electrolytic conduction and electrolysis	148
Applications	149

## Mathematics and methods

Mathematics	154
Numbers	154
Functions	154
Equations in the plane triangle	160
Complex numbers	160
Coordinate systems	161
Vectors	163
Differential and integral calculus	165
Linear differential equations	168
Laplace transform	169
Fourier transform	170
Finite-element method	172
Applications	172
FEM examples	175
Control engineering	180
Terms and definitions	180
Control-engineering transfer elements	181
Designing a control task	182
Adaptive controllers	184

## Materials

Materials	186
Material parameters	186
Material groups	198
Metallic materials	199
EN metallurgy standards	214
Magnetic materials	218
Nonmetallic inorganic materials	231
Composite materials	231
Plastics	234
Heat treatment of metallic materials	256
Hardness	256
Heat-treatment processes	259
Thermochemical treatment	265
Corrosion and corrosion protection	268
Corrosion processes	268
Types of corrosion	270
Corrosion testing	271
Corrosion protection	273
Deposits and coatings	276
Deposits	276
Diffusion coatings	282
Conversion coatings	282

## Operating fluids

Lubricants	284
Terms and definitions	284
Engine oils	291
Transmission oils	294
Lubricating oils	295
Lubricating greases	295
Fuels	300
Characteristics	300
Gasolines	301
Diesel fuels	305
Alternative fuels	309
Brake fluids	318
Coolants	320

## Machine parts

Springs	322
Basic principles	322
Metal springs	323
Sliding bearings	328
Features	328
Hydrodynamic sliding bearings	328
Sintered metal sliding bearings	333
Sliding-contact bearings	334
Roller bearings	337
Applications	337
General principles	337
Selection of roller bearings	338
Calculation of load capacity	340
Gears and tooth systems	342
Overview of gears	342
Starter-tooth designs	346
American gear standards	347
Calculation of load-bearing capacity	338
Gear materials	351
Belt drives	352
Friction belt drives	352
Positive belt drives	356
Chain drives	360
Overview	360
Chain designs	360
Sprockets	362
Chain-tensioning and chain-guide elements	363
<b>Joining and bonding techniques</b>	
Detachable connections	364
Positive or form-closed joints	364
Frictional joints	368
Threaded fasteners	374
Snap-on connections on plastic components	384
Permanent joints	386
Welding	386
Soldering	390
Adhesive technologies	391
Riveting	393
Penetration-clinching processes	395

<b>Internal-combustion engines</b>		
Internal-combustion engines	398	
Thermal engines	398	
Mixture formation, combustion, emissions	402	
Gasoline engine	402	
Diesel engine	412	
Mixed forms and alternative operating strategies	417	
Charge cycle and supercharging	418	
Gas exchange	418	
Variable valve timing	421	
Supercharging processes	425	
Exhaust-gas recirculation	428	
Reciprocating-piston engine	430	
Components	430	
Reciprocating-piston engine types	444	
Crankshaft-assembly design	445	
Tribology and friction	453	
Empirical values and data for calculation	457	
Engine cooling	468	
Air cooling	468	
Water cooling	469	
Intercooling (charge-air cooling)	475	
Exhaust-gas cooling	476	
Oil and fuel cooling	477	
Modularization	479	
Intelligent thermal management	481	
Engine lubrication	482	
Force-feed lubrication system	482	
Components	482	
Air-intake systems and intake manifolds	486	
Overview	486	
Passenger-car air-intake system	487	
Passenger-car intake manifolds	495	
Commercial-vehicle air-intake system	500	
Commercial-vehicle intake manifolds	503	
Turbochargers and superchargers	504	
Superchargers (mechanically driven)	504	
Pressure-wave superchargers	507	
Exhaust-gas turbochargers	509	
Complex supercharging systems	517	
Exhaust-gas system	522	
Purpose and design	522	
Exhaust manifold	524	
Catalytic converter	524	
Particulate filter	525	
Mufflers	526	
Connecting elements	528	
Acoustic tuning devices	529	
Commercial-vehicle exhaust-gas systems	530	
<b>Emission-control and diagnosis legislation</b>		
Emission-control legislation	532	
Overview	532	
Emission-control legislation for passenger cars and light commercial vehicles	534	
Test cycles for passenger cars and light commercial vehicles	545	
Emission-control legislation for heavy commercial vehicles	548	
Test cycles for heavy commercial vehicles	552	
Exhaust-gas measuring techniques	556	
Emission testing	556	
Exhaust-gas measuring devices	559	
Diesel smoke-emission test	562	
Evaporative-emissions test	564	
Diagnostics	566	
Monitoring in driving mode	566	
On-Board Diagnostics (OBD)	568	
OBD functions	574	
OBD requirements for heavy commercial vehicles	577	
Workshop diagnostics	580	
ECU diagnostics and Service Information System	582	
<b>Management for spark-ignition engines</b>		
Management for spark-ignition engines	584	
Description of the engine management system	584	
System overview	585	
Versions of Motronic	589	
Cylinder charge	594	
Component parts	594	
Controlling the air charge	595	
Electronic throttle control (ETC) components	597	

Fuel supply	598	Time-controlled single-cylinder pump systems	698
Fuel supply and delivery with manifold injection	598	Unit-injector system for passenger cars	698
Fuel supply and delivery with gasoline direct injection	599	Unit-injector system for commercial vehicles	700
Evaporative-emissions control system	601	Unit-pump system for commercial vehicles	701
Fuel filter	602	Electronic control	701
Electric fuel pump	604	Diesel distributor injection pumps	702
High-pressure pumps for gasoline direct injection	607	Axial-piston distributor pumps	702
Fuel rail	611	Radial-piston distributor pumps	705
Fuel-pressure regulator	611	Fuel-injection system	707
Fuel-pressure attenuator	612	Start-assist systems for diesel engines	708
Mixture formation	614	Preheating systems for passenger cars and light utility vehicles	708
Basic principles	614	Flame start systems for commercial-vehicle diesel engines	711
Mixture-formation systems	616	Exhaust-gas treatment	716
Intake-manifold injection	617	Catalytic converters	716
Gasoline direct injection	619	Particulate filter	719
Fuel injectors	622		
Ignition	630	<b>Alternative drives</b>	
Basic principles	630	Hybrid drives	724
Moment of ignition	631	Features	724
Ignition systems	636	Functions	725
Ignition coil	638	Functional classification	726
Spark plug	641	Drive structures	727
Catalytic exhaust-gas treatment	646	Control of hybrid vehicles	733
Catalytic converter	646	Regenerative braking system	736
$\lambda$ control	651	Fuel cells for the vehicle drive	738
		Functioning principle	738
		Functioning principle of the fuel-cell system	740
		Functioning principle of the drivetrain	742
<b>Alternative gasoline-engine operation</b>		<b>Drivetrain</b>	
LPG operation	654	Drivetrain	744
Applications	654	Overview	744
Design	655	Drivetrain elements	746
LPG systems	657	Power take-up elements	747
Components	659	Multi-speed gearbox	749
Engines fueled by natural gas	662	Manually shifted transmissions	750
Applications	662	Automatic transmissions	752
Design	664	Continuously variable transmissions	758
Components	665	Final-drive units	759
		All-wheel drive and transfer case	762
<b>Management for diesel engines</b>			
Management for diesel engines	668		
Description of the engine management system	668		
Electronic Diesel Control	669		
Low-pressure fuel supply	672		
Fuel supply and delivery	672		
Fuel filter	678		
Common-rail injection system	680		
System overview	680		
Injectors	686		
High-pressure pumps	692		
Rail	697		

**Vehicle physics**

Basic terms of automotive engineering	764	Tires	880
Basic terms of vehicle handling	764	Function and requirements	880
Motor-vehicle dynamics	774	Tire construction	881
Dynamics of linear motion	774	Tire inflation pressure	883
Adhesion to road surface	779	Tire tread	884
Accelerating and braking	780	Force transmission	886
Actions: Reaction, braking and stopping	781	Tire grip	887
Passing (overtaking)	783	Rolling resistance	890
Fuel consumption	785	Tire designation	892
Dynamics of lateral motion	788	EU tire label	895
Special operating dynamics for commercial vehicles	794	Winter tires	896
Operating-dynamics test procedures as per ISO	798	Development aims	897
Vehicle aerodynamics	804	Tire tests	897
Aerodynamic forces	804	Tire-pressure monitoring system	898
Tasks of vehicle aerodynamics	807	Steering	900
Vehicle wind tunnels	812	Definitions for motor-vehicle steering systems	900
Vehicle acoustics	818	Steering-system requirements	900
Legal requirements	818	Types of steering box	902
Development work on vehicle acoustics	820	Power-assisted steering systems for passenger cars	903
Sources of noise	821	Power-assisted steering systems for commercial vehicles	909
Sound design	823	Brake systems	912
		Definitions and principles	912
		Legal regulations	917
		Structure and organization of brake systems	926
		Brake systems for passenger cars and light utility vehicles	928
		Subdivision of passenger-car brake systems	928
		Components of the passenger-car brake system	929
		Electrohydraulic brake	934
		Brake systems for commercial vehicles	938
		System overview	938
		Components of commercial-vehicle brake systems	941
		Electronically controlled brake system	948
		Continuous-operation brake systems	952
		Wheel brakes	956
		Disk brakes	956
		Drum brakes	960

**Chassis systems**

Chassis systems	826	Chassis control and active safety	964
Basic principles	826	Antilock braking system	964
Suspension	836	Function and requirements	964
Basic principles	836	Operating principle	964
Types of spring	839	ABS system variants	968
Suspension systems	844	ABS versions	970
Shock absorbers and vibration absorbers	848	Antilock braking system for commercial vehicles	972
Vibration absorbers	848	Traction control system	976
Vibration absorbers	855	Function and requirements	976
Wheel suspensions	856	TCS control loops	976
Basic principles	856	Driving-dynamics control system	980
Kinematics and elastokinematics	856	Function	980
Basic categories of wheel suspensions	858	Requirements	981
Wheels	864	Operating principle	982
Function and requirements	864	Typical driving maneuver	982
Structure	864	Structure of the overall system	983
Design criteria	869	System components	992
Designation for passenger-car wheels	869	Special Electronic Stability Program for commercial vehicles	995
Materials for wheels	870	Supplementary functions (automatic brake-system operations)	1000
Manufacturing processes	872	Integrated driving-dynamics control systems	1004
Wheel design variations	875	Overview	1004
Stress and testing of wheels	877	Functions	1004
		System architecture	1007

**Vehicle bodies**

Installation and regulations for signal lamps	1053
Technical design variations for lamps	1057
Headlight leveling control	1061
Headlamp adjustment	1062
Automotive glazing	1068
The material properties of glass	1068
Automotive windshield and window glass	1069
Functional design glazing	1070
Windshield, rear-window and headlamp cleaning systems	1074
Windshield wiper systems	1074
Rear-window wiper systems	1080
Windshield and rear-window washer systems	1081
Headlamp washer systems	1081

**Passive safety**

Occupant-protection systems	1082
Seat belts and seat-belt pretensioners	1082
Airbag	1085
Rollover protection systems	1088
Components	1088
Further developments	1090

**Vehicle security systems**

Locking systems	1092
Function	1092
Structure (side door as example)	1093
Double-locking functions	1095
Technology	1099
Theft-deterrent systems	1100
Regulations	1100
System design	1100

**Automotive electrics**

Conventional vehicle electrical systems	1102
Electrical power supply	1102
Electrical-system structures	1108
Electrical-system parameters	1109
Electrical energy management	1112
Vehicle electrical systems for hybrid and electric vehicles	1116
Vehicle electrical systems for mild and full hybrid vehicles	1116
Vehicle electrical systems for plug-in hybrid and electric vehicles	1119
Charging strategy	1120

Starter batteries	1122	<b>Automotive electronics</b>		Ultrasonic sensor	1351	Night-vision systems	1426
Requirements	1122	Electronic control unit (ECU)	1222	Radar sensors	1352	Applications	1426
Battery design	1124	Functions	1222	Lidar sensors	1356	Far-infrared systems	1426
Charging and discharging	1126	Requirements	1222	Video sensors	1359	Near-infrared systems	1427
Battery characteristics	1127	ECU components	1223	Mechatronics	1364	Parking and maneuvering systems	1430
Battery types	1128	Data processing	1229	Mechatronic systems and		Applications	1430
Using the battery	1131	Automotive software engineering	1232	components	1364	Ultrasonic parking aid	1430
Drive batteries	1134	Motivation	1232	Development methodology	1365	Ultrasonic parking assistant	1433
Requirements	1134	Design of software in motor		Outlook	1368	Video systems	1436
Storage technologies	1135	vehicles	1233			Adaptive Cruise Control	1438
Basic structure of a		Important standards for software				Function	1438
battery system	1136	in motor vehicles	1233	<b>Comfort and convenience</b>		Design and function	1438
