<i>Preface</i>	<i>ix</i>
<i>List of Acronyms and Abbreviations</i>	<i>xi</i>
1 Introduction	1
1.1 UAV Imaging: A Disruptive Innovation	1
1.2 Components of a UAV System	2
1.3 Size, Weight, Power, and Platform	3
1.4 Terminology and Acronyms	4
2 Radiometry of Targets: Emission and Reflection	9
2.1 Introduction	9
2.2 The Electromagnetic Spectrum	9
2.3 Emission and Reflection within Spectral Regions	10
2.3.1 Overview	10
2.3.2 Emission	11
2.3.2.1 The Planck function and blackbody radiation	11
2.3.2.2 The Wien displacement law	12
2.3.2.3 The Stefan–Boltzmann law	13
2.3.2.4 Emittance of a material	13
2.3.2.5 A practical application of Planck’s law	14
2.3.3 Reflection	15
2.3.3.1 Description and equations	15
2.3.3.2 Conservation of energy and Kirchoff’s law	16
2.3.3.3 Directional considerations and the Lambertian approximation	18
References	20
3 Radiometric Propagation Basics	23
3.1 Plane Angle and Instantaneous Field of View	23
3.2 Solid Angle and Projected Solid Angle	25
3.3 Radiometric Terms and Their Units	27
3.3.1 Radiance	27
3.3.1.1 Definition and invariance	27
3.3.1.2 Radiance and optical power transfer	28

3.3.2	Irradiance	31
3.3.3	Radiant exitance	32
3.3.4	Radiant intensity	33
3.3.5	Summary of radiometric terms and units	34
3.3.6	Summary of the terms, in photons	35
3.3.7	Imaging spectroscopy and wavenumber	35
3.4	Relationships Important to Propagation Calculations	36
3.4.1	The inverse square law of irradiance	36
3.4.2	Intensity and radiance relationship	36
3.4.3	Conclusion	37
	References	37
4	Imaging System Basics	39
4.1	Introduction	39
4.2	The Camera Equation and Image Plane Irradiance	39
4.3	Terms and Definitions Relating to Image Acquisition Geometry	41
4.3.1	Elevation angle	41
4.3.2	Sensor relative elevation angle	41
4.3.3	Sensor relative azimuth angle	41
4.3.4	Horizontal and vertical fields of view	42
4.3.5	Ground sample distance	43
4.3.6	Slant range	45
4.4	General Description of Optical Systems for UAV Imaging	45
4.5	Spectral Imaging	46
4.6	Calculating the Signal from the Focal Plane: A Multispectral-Channel Example	49
4.7	Noise Equivalent Power	53
4.8	Noise Equivalent Radiance	54
4.9	Noise Equivalent Irradiance	56
4.10	Noise Equivalent Reflectance Difference	58
4.11	Modulation Transfer Function	59
	References	61
5	Platforms, Sensors, and Applications	65
5.1	Introduction	65
5.2	Large Military Platforms	65
5.3	Small UAV Platforms	67
5.3.1	SWaP-C and sUAS	67
5.3.2	UAV swarm: the smallest platform/sensor subtype	67
5.3.3	Factors that influence platform selection	68
5.3.4	Pointing the payload	68
5.4	Platform and Application Examples	69
5.4.1	Distinguishing between two objects at UAV altitude	69
5.4.2	Near-infrared and SWIR imaging comparison	71

5.4.3	“Day/night” imager and covert illumination	72
5.4.4	Uncooled thermal microbolometer	73
5.5	Thermal Contrast	73
5.6	Noise Equivalent Temperature Difference	76
5.6.1	NETD expression for energy units	76
5.6.2	NETD in terms of photons	79
5.7	Minimum Resolvable Temperature Difference	81
	References	85
6	The Image Data Product and Quality Metrics	89
6.1	Introduction	89
6.2	Imagery Authentication	89
6.3	Metadata	89
6.4	Video, Motion Imagery, and Full Motion Video	91
6.5	Video Scan Types	92
6.6	Definition in Lines per Frame	93
6.7	Image Quality Scales	96
6.7.1	Introduction	96
6.7.2	Motion imagery: video NIIRS	96
6.7.3	Still imagery: NIIRS and IIRS	97
6.7.4	Predicting NIIRS: the general image quality equation	98
6.8	Probability of Discrimination	99
6.8.1	Johnson criteria and target transfer probability functions	99
6.8.2	Probability calculations	102
6.8.3	Comparison with the NIIRS criteria	103
6.9	Atmospheric Correction	104
6.9.1	Introduction	104
6.9.2	Atmospheric windows and narrow bands	106
	References	107
7	Detectors for UAV Imaging Systems	111
7.1	Introduction	111
7.2	Photon Detectors	111
7.3	CCD and CMOS	113
7.3.1	CCD basics	113
7.3.2	Color CCDs	115
7.3.3	CMOS basics	117
7.4	Thermal Detectors	118
7.4.1	Thermal detection basics	118
7.4.2	The microbolometer	120
7.4.2.1	General description	120
7.4.2.2	Common approaches to design	121
7.5	Detector Noise Sources	122
7.5.1	Johnson noise	122

7.5.2	Shot noise	122
7.5.3	Generation-recombination noise	123
7.5.4	Temperature fluctuation noise	123
7.5.5	1/f noise	123
7.5.6	Photon noise	123
7.5.7	Quantization noise	124
7.5.8	Additional detector noises	124
7.5.9	Noises in arrays	124
	References	125
8	Conclusion	127
	Appendix A SI Base Units and Derived Quantities	129
	Appendix B Concise Notation, Uncertainty Reporting, and CODATA 2014 Physical Constants	131
	B.1 Reporting Uncertainty	131
	B.2 Pending Changes in Values of “Constants”	132
	Appendix C Drones and the Law	133
	C.1 Commercial Use of Drones and FAA Regulations	133
	C.2 Security, Privacy, and Law Enforcement Issues	134
	Appendix D The Need for Standards in UAV Imagery Analysis	137
	D.1 Connecting the Dots	137
	D.2 Marking the Scorecard	138
	References	139
