iii	The author
1	<b>Chapter 1: Introduction – Executive Summary</b>
3	<b>Chapter 2: Evolution of the vehicle security market</b>
6	<b>Chapter 3: The market</b>
6	3.1: Supply structure - introduction
9	3.2: Changes in vehicle security features and latch design since the late 1980s
9	3.2.1: Double locking – not a success, but a catalyst for change nonetheless
10	3.2.2: Corporate latches – a means to save costs
11	3.2.3: Supplier loyalty lower in Europe than in Japan
12	3.2.4: Volkswagen the leader in corporate latches
12	3.2.5: The ideal solution was not without its problems
13	3.2.6: CAD systems ease the trend to corporate latches
14	3.2.7: Applying electronics to vehicle security systems – the fully electronic latch?
15	3.2.8: Despite problems, ArvinMeritor is continuing with electronic latches
15	3.2.9: Electronic applications continue to grow despite the ‘failure’ of the electronic latch
16	3.2.10: Power management and system wake-up = major challenges
16	3.2.11: Renault’s solution has widespread appeal and application
17	3.3: Passive entry – a high tech feature with entry level application
17	3.3.1: Why has passive entry met with consumer resistance?
18	3.3.2: The commercial vehicle market – a major opportunity?
21	3.3.3: The future of passive entry
21	3.3.4: Passive entry did not follow traditional fitment pattern
22	3.3.5: Current and future take-up of passive entry
22	3.4: Recent specific developments in key technology and capability
22	3.4.1: Ford North America – opening the door via a keypad
24	3.4.2: GM USA – the key fob as an information centre
24	3.4.3: Nissan Japan – using mobile phones to unlock cars
24	3.4.4: Tesla – a sports car with extra security
25	<b>Chapter 4: Supplier review</b>
25	4.1: Introduction
25	4.2: Categorising the suppliers
30	<b>Chapter 5: Future developments</b>
30	5.1.1: Emerging markets
30	5.1.2: Safety
31	5.1.3: Low-effort latches

31	5.1.4: Weight reduction
31	5.2: Winners and Losers

**List of tables:**

Table 1:	European and North American passive entry OE fitment (%)
Table 2:	Summary of suppliers' core business
Table 3:	Lock and latch supply patterns
Table 4:	Keyless entry supply patterns
Table 5:	Keyless entry/keyless start and other door related systems availability (Premium brands)

**List of figures:**

Figure 1:	Automotive latches and lock cylinder market shares: Europe (2009)
Figure 2:	Automotive latches and lock cylinder market shares: North America (2009)
Figure 3:	Automotive latches and lock cylinder market shares: Japan (2009)
Figure 4:	Automotive passive entry systems market shares: Europe (2009)
Figure 5:	Automotive passive entry systems market shares: North America (2009)
Figure 6:	Automotive passive entry systems market shares: Japan (2009)
Figure 7:	The keypad on the Lincoln MKS and the Ford Flex

**Case studies**

- 1: The Kiekert modular latch
- 2: Passive entry: Mercedes-Benz Sprinter
- 3: Passive entry: BMW – Comfort Access on the 1-series
- 4: The Audi A4 – Advanced key from Marquardt
