xi	The author
<b>1</b>	<b>Chapter 1: Introduction</b>
<b>3</b>	<b>Chapter 2: The problem</b>
3	2.1: Climate change
6	2.2: Peak oil
6	- what is peak oil?
6	- peak oil 'deniers'
6	- not on the agenda of the financial world
7	- peak oil 'believers'
8	2.3: Peak oil and climate change together
<b>9</b>	<b>Chapter 3: The pressure for a solution</b>
9	- Best corporate practice
10	- Automotive industry opportunities
10	- Technology solutions
11	- Growing pressure to act
<b>12</b>	<b>Chapter 4: The competitive issue</b>
13	4.1: Corporate Social Responsibility (CSR)
15	- What do other people think? – CSR Ratings
16	- FTSE4Good
16	- Accountability Rating
17	- Sustainable Asset Management (SAM)
18	- Oekom Research
18	- Vigeo
18	- PSI Sector reports
19	4.2: Greenhouse gas (GHG) targets
21	4.3: Product
24	- Sales mix
26	4.4: Future product technologies
27	- Alternative fuels
29	4.5: Lifecycle analysis
30	- What percentage of greenhouse gas emissions come from manufacturing?
31	- Vehicle disposal
33	4.6: Manufacturers and buildings
33	- Natural gas
33	- CHP
34	- Heat recovery
34	- Biomass
34	- Wind
34	- Solar
35	- Geothermal
35	- Other
36	- Green buildings
37	- Waste management

37	4.7: Logistics
38	4.8: Supply chain
40	4.9: Distribution/dealerships
41	4.10: Customer interface
42	- Brands
43	- Advertising
43	- The future
45	<b>Chapter 5: The Ranking</b>
45	- Overall
46	- Toyota ranks top
47	- Honda scores well, but lacks transparency
47	- BMW, GM and Volkswagen rank middle of the table
48	- Renault 9 <sup>th</sup> , ahead of Daimler
48	- Hyundai and Fiat are bottom of the pile
48	- CSR/Climate change strategy
50	- GHG targets
50	- Product
51	- Business areas
52	<b>Chapter 6: Vehicle manufacturer profiles, SWOT analyses and green audits</b>
52	<b>6.1: Toyota Motor Company</b>
53	6.1.1: Summary and recent developments
53	6.1.2: CSR/climate change strategies
53	- Climate change strategy
54	- Recycling-oriented society
54	- Greenhouse gas targets
55	- Management structures and reporting on environmental issues
55	- CSR/sustainability activities and indices
55	6.1.3: Product
56	6.1.4: Future technology strategies
57	- Conventional engines
58	- Biofuels
58	- Hybrids
58	- Plug-in hybrids
58	- Fuel cells
60	6.1.5: Closing the loop – lifecycle analysis
60	- Recycling
61	- Use of recycled/renewable materials
61	6.1.6: Manufacturing
61	- Energy efficiency
62	- Use of renewable energy
62	- Environmental management systems
62	- Zero landfill
62	- Green buildings
63	6.1.7: Logistics
63	6.1.8: Supply chain
63	6.1.9: Distribution/dealerships
64	6.1.10: Consumer influence
65	<b>6.2: Ford Motor Company</b>
66	6.2.1: Summary and recent developments
66	6.2.2: CSR/climate change strategies
66	- Strategy
66	- Blueprint for sustainability

67	- Climate change task force
67	- Management structures and reporting on climate change
68	- Greenhouse gas emissions
69	- Greenhouse gas targets
69	- CSR activities/engagement with outside agencies
70	6.2.3: Product
71	6.2.4: Future technology strategies
71	- Conventional engine technologies
71	- Transmissions
72	- Weight reduction
72	- Biofuels
72	- Hybrids
73	- Plug-in hybrids
73	- Hydrogen
73	6.2.5: Closing the loop – lifecycle analysis
74	- Recycling
74	- Using recycled materials
74	- Energy use
74	6.2.6: Manufacturing
75	- Renewable energy
75	- Fumes-to-fuel
76	- Geothermal energy
77	- Waste management
77	- Environmental management
78	6.2.7: Logistics
78	6.2.8: Supply chain
78	6.2.9: Distribution/dealerships
79	6.2.10: Customer interface
79	- Eco-driving
79	- Carbon offsetting
79	- Branding
80	<b>6.3: PSA Peugeot Citroën</b>
80	6.3.1: Summary and recent developments
81	6.3.2: CSR/climate change strategies
81	- PSA downplays the contribution of cars to climate change
82	- Carbon neutral manufacturing?
82	- Greenhouse gas targets
83	- Low CO <sub>2</sub> car targets not very aggressive
83	- Management structures and reporting on climate change
84	- CSR/sustainability activities and indices
84	- Partnerships
84	6.3.3: Product
84	- Segmentation/sales figures
85	6.3.4: Future technology strategies
86	- Diesels
86	- Gasoline
86	- Automated gearboxes
86	- CNG
86	- Biofuels
86	- Hybrids
87	- Fuel cells
87	6.3.5: Closing the loop – lifecycle analysis
88	6.3.6: Manufacturing
88	- Energy efficiency
88	- Energy descent target
88	- Heat recovery
88	- Energy costs

89	6.3.7: Logistics
89	6.3.8: Suppliers
90	6.3.9: Consumer influence
90	- Branding
90	- Image/awards
91	<b>6.4: Honda</b>
91	6.4.1: Summary and recent developments
92	6.4.2: CSR/climate change strategies
92	- Management structures and reporting on climate change
93	- Greenhouse gas targets
93	- Products
94	6.4.3: Future technology strategies
94	- Gasoline engines
94	- Diesel engines
94	- Transmissions
95	- Hybrids
95	- Electric
95	- Natural gas
95	- Biofuels
96	- Fuel cells
96	- Solar power
97	6.4.4: Closing the loop – lifecycle analysis
97	- Recycling
97	- Using recycled materials
98	6.4.5: Manufacturing
98	- Energy use
99	- Waste management
100	6.4.6: Logistics
100	6.4.7: Supply chain
100	6.4.8: Distribution/dealerships
101	6.4.9: Customer influence
101	- Car sharing
101	- Eco-driving
101	- Awards
102	<b>6.5: Nissan</b>
102	6.5.1: Summary and recent developments
104	6.5.2: CSR/climate change strategies
104	- Ghosn welcomes ‘greening’ of consumer demand
104	- Management structure and reporting on climate change
105	- CO <sub>2</sub> emissions targets
106	6.5.3 Product
106	6.5.4 Future technology strategies
106	- Diesels
107	- Continuously Variable Transmission (CVT)
107	- Natural gas
107	- Hybrids
107	- Biofuels
107	- Fuel cells
107	- Electric vehicles
108	6.5.5: Closing the loop – lifecycle analysis
108	- Eco pedal
108	- Recycling
109	6.5.6: Manufacturing
109	- Environmental management
109	- Energy use
110	- Waste management

111	6.5.7: Logistics
112	- Modal shift
112	6.5.8: Supply chain
112	6.5.9: Distribution/dealerships
113	<b>6.6: BMW</b>
114	6.6.1: Summary and recent developments
114	6.6.2: CSR/climate change strategies
114	- Management structures and reporting on climate change
115	- Strategy
115	- CO <sub>2</sub> targets
116	- CSR/sustainability rating indices
116	- Commitments/partnerships
116	- Negative press
116	6.6.3: Products
117	6.6.4: Future technology strategies
117	- Efficient dynamics
118	- Dieselisation
118	- Hybrids
119	- Electric
119	- Thermo-electric generation
119	- Hydrogen
120	6.6.5: Closing the loop – lifecycle analysis
120	- Use of raw materials
120	- Recycling
121	6.6.6: Manufacturing
121	- Energy use
121	- Renewable energy use
122	6.6.7: Logistics
122	6.6.8: Supply chain
123	6.6.9: Distribution/dealerships
123	6.6.10: Customer interface
123	- Eco-driving
123	- Awards
123	- Brands
124	<b>6.7: GM</b>
125	6.7.1: Summary and recent developments
125	6.7.2: CSR/climate change strategies
125	- Strategy
126	- Climate strategy
126	- Management structures and reporting on climate change
127	- Reporting
127	- Greenhouse gas emissions reduction
128	- CSR/sustainability indices and partnerships
128	6.7.3: Products
129	6.7.4: Future technology strategies
130	- Conventional engines
130	- Diesels
130	- Thermo-electrics
130	- CNG and LPG
131	- Biofuels
131	- Second generation biofuels
131	- Hybrids
132	- Electric/plug-in hybrids
132	- New engineering organisation
132	- Fuel cells

133	6.7.5: Closing the loop – lifecycle analysis
133	- Recycling
134	- Using recycled materials
134	6.7.6: Manufacturing
134	- Energy efficiency
135	- Energy efficient buildings
135	- Renewable energy use
136	- Waste management
136	- Green buildings
136	6.7.7: Logistics
136	6.7.8: Supply chain
138	6.7.9: Consumer influence
139	<b>6.8: VW</b>
140	6.8.1: Summary and recent developments
141	6.8.2: CSR/climate change strategies
141	- Lack of environment-related reporting
142	- Lack of reporting due to lack of good news
142	- Greenhouse gas reduction goals
143	- High level commitments
143	- CSR/sustainable activities and indices
144	- Other activities
144	6.8.3: Products
145	6.8.4: Future technology strategies
145	- Hybrids
145	- Biofuels
146	- Electric
146	- Fuel cells
146	6.8.5: Closing the loop – lifecycle analysis
146	- End-of-life vehicle recycling
147	- Material use
147	6.8.6: Manufacturing
147	- Energy sources
147	- Seat invests in solar
148	- Energy use
148	6.8.7: Logistics
149	6.8.8: Supply chain
149	6.8.9: Consumer influence
149	- Eco-driving
149	- Eco-brands
150	- Offset programme
150	- Consumer awards
151	<b>6.9: Renault</b>
151	6.9.1: Summary and recent developments
152	6.9.2: CSR/climate change strategies
152	- Strategy
152	- Management structures and reporting on climate change
153	- CSR/sustainability rating indices
153	- Commitments/partnerships
154	6.9.3: Products
154	6.9.4: Future technologies
154	- Optimising conventional engines
155	- CNG
155	- Biofuels
155	- Hybrids
155	- Electric vehicles

155	- Fuel cells
156	6.9.5: Closing the loop – lifecycle analysis
156	- End-of-life recycling
156	- Using recycled materials
157	6.9.6: Manufacturing
157	- Energy use
157	- Cogeneration
157	- Waste management
158	- Water treatment
158	6.9.7: Logistics
159	6.9.8: Supply chain
159	6.9.9: Distribution/dealerships
159	6.9.10: Consumer influence
161	<b>6.10: Daimler</b>
161	6.10.1: Summary and recent developments
161	6.10.2: CSR/climate change strategies
161	- Management structures and reporting on climate change
162	- Strategy
163	- Future goals
163	- CSR/sustainability rating indices
163	- Partnerships/commitments
163	6.10.3: Products
164	6.10.4: Future technology strategies
164	- IC engines with gasoline and diesel
164	- Natural gas
165	- Biofuels
165	- Hybrids
166	- Fuel cells
167	6.10.5: Closing the loop – lifecycle analysis
167	- Using recycled materials
168	- Recycling
168	6.10.6: Manufacturing
168	- Energy use and efficiency
169	- Employee training
169	6.10.7: Logistics
169	6.10.8: Supply chain
170	6.10.9: Distribution/dealerships
170	6.10.10: Customer interface
170	- Eco-driving
170	- Brands
171	<b>6.11: Hyundai-Kia</b>
171	6.11.1: Summary and recent developments
172	6.11.2: CSR/climate change strategies
172	- Management structures
173	- Reporting on climate change
174	- CSR
174	- Products
174	6.11.3: Product: future technology strategies
174	- Conventional engines
174	- Natural gas
174	- Biofuels
175	- Hybrid vehicles
175	- Fuel cells
175	6.11.4: Closing the loop – lifecycle analysis
175	6.11.5: Manufacturing

176	6.11.6: Supply chain
177	<b>6.12: Fiat</b>
178	6.12.1: Summary and recent developments
178	6.12.2: CSR/climate change strategies
178	- Management structures and reporting on climate change
179	- CSR ratings
179	6.12.3: Products
180	6.12.4: Future technology strategies
180	- Gasoline and diesel engines
180	- Natural gas
180	- Biofuels
181	- Hybrids
181	- Fuel cells and hydrogen
181	6.12.5: Closing the loop – lifecycle analysis
181	6.12.6: Manufacturing
181	- Environmental management
181	- Energy efficiency
181	- Waste management
182	6.12.7: Supply chain
182	6.12.8: Customer interface
182	- Public transport
182	- EcoDrive

## Bibliography

### List of figures:

- Figure 1: Greenhouse gas emissions in 2000, by source
- Figure 2: CO<sub>2</sub> emission sources in the EU-15 nations (2004)
- Figure 3: Annual greenhouse gas emissions by sector (2000)
- Figure 4: Company PSI rankings
- Figure 5: Toyota: Toward the ultimate eco-car
- Figure 6: Toyota: New engine technologies
- Figure 7: Toyota: Technologies incorporated into new engine series
- Figure 8: Toyota: Well-to-wheel CO<sub>2</sub> output
- Figure 9: Overall (well-to-wheel) efficiency of the Toyota FCHV
- Figure 10: Estimate of Ford's climate change emissions
- Figure 11: PSA's European sales mix by segment, 2006
- Figure 12: Relationship between fuel consumption and cost of vehicle technologies
- Figure 13: Consumption of energy during manufacture of PSA vehicles
- Figure 14: Honda: Organization for worldwide environmental activities
- Figure 15: Nissan's long-term goal for reducing CO<sub>2</sub>
- Figure 16: Nissan's roadmap for reducing the CO<sub>2</sub> from its vehicles
- Figure 17: Nissan's global environment management organization
- Figure 18: Major steps taken by Nissan to improve vehicle fuel economy
- Figure 19: Nissan's overview of recycling performance (Apr 2006 – Mar 2007)
- Figure 20: Nissan's waste disposal (directly to landfill)
- Figure 21: Nissan's in-house incineration volume
- Figure 22: Nissan's CO<sub>2</sub> emissions from logistics (1,000t CO<sub>2</sub>)
- Figure 23: BMW's CO<sub>2</sub> emissions per unit produced
- Figure 24: BMW's European sales mix by segment, 2006
- Figure 25: The BMW EfficientDynamics measures – an overview
- Figure 26: Roadmap of the BMW Group for sustainable mobility
- Figure 27: BMW's waste per unit produced
- Figure 28: GM's Advanced Propulsion Technology Strategy
- Figure 29: GMNA Renewable Energy Portfolio
- Figure 30: VW's European sales mix by segment, 2006
- Figure 31: Renault's European sales mix by segment, 2006

- Figure 32: Renault's recycled plastics, by model  
 Figure 33: Changes in the weight of packaging per vehicle (1996 – 2006)  
 Figure 34: Drive technologies from Daimler  
 Figure 35: The DaimlerChrysler fuel road map  
 Figure 36: Material composition of the Mercedes-Benz C-Class  
 Figure 37: Hyundai's environmental management strategy  
 Figure 38: Fiat's European sales mix by segment, 2006

### List of tables:

- Table 1: Comparison of environmental/sustainability reports and responses to Carbon Disclosure Project  
 Table 2: Management structures: Board level representation?  
 Table 3: Vehicle manufacturer attitudes in a nutshell  
 Table 4: CSR/Sustainability Rankings  
 Table 5: Vehicle manufacturer greenhouse gas emissions (CO<sub>2</sub> eq) 2005 and 2006, actual and per vehicle  
 Table 6: Sales-weighted average CO<sub>2</sub> emissions (g/km)  
 Table 7: Western Europe: Top Ten Brands volume-weighted average CO<sub>2</sub> emissions, g/km, 2007  
 Table 8: UK fleet average CO<sub>2</sub> by brand, 2007 compared to 2006  
 Table 9: US: Fleet average CO<sub>2</sub> emissions by vehicle manufacturer, MY 2005  
 Table 10: Vehicle manufacturers downsizing in Europe  
 Table 11: Percent range of MPG improvement estimates per improved automobile technology  
 Table 12: Comparison of vehicle manufacturers' activities in the main technology areas  
 Table 13: Vehicle manufacturer life cycle analysis and notable achievements  
 Table 14: How the manufacturers compare on what they say about recycling  
 Table 15: Investing in renewables – who's using what  
 Table 16: Which vehicle manufacturers report CO<sub>2</sub> emissions from logistics operations?  
 Table 17: Vehicle manufacturers' green supplier programmes  
 Table 18: Vehicle manufacturers' green dealer programmes  
 Table 19: Vehicle manufacturers' 'green' badges  
 Table 20: The Ranking: Vehicle manufacturers in the race for environmental success  
 Table 21: Detailed chart of vehicle manufacturers and their scores  
 Table 22: SWOT of Toyota in the race for environmental success  
 Table 23: 2010 CO<sub>2</sub> reduction goals: Toyota Motor Company  
 Table 24: SWOT of Ford in the race for environmental success  
 Table 25: Life cycle CO<sub>2</sub> impact for typical vehicles: Ford Motor Company  
 Table 26: SWOT of PSA in the race for environmental success  
 Table 27: PSA greenhouse gas emissions, 1995 and 2002 – 2006  
 Table 28: PSA CO<sub>2</sub> emissions (per vehicle) 1995 – 2006  
 Table 29: Most fuel efficient diesel/gasoline vehicles on sale in France, 2006  
 Table 30: SWOT of Honda in the race for environmental success  
 Table 31: Honda's environment statement  
 Table 32: SWOT of Nissan in the race for environmental success  
 Table 33: CO<sub>2</sub> emissions of Nissan's major global production sites  
 Table 34: SWOT of BMW in the race for environmental success  
 Table 35: SWOT of GM in the race for environmental success  
 Table 36: GM's Environmental Principles  
 Table 37: Greening of the Supply Chain Project in China  
 Table 38: SWOT of VW in the race for environmental success  
 Table 39: SWOT of Renault in the race for environmental success
