ABOUT Automotive

The Global Market for Automotive Turbochargers: 2015 edition

FORECASTS AND TRENDS FOR PASSENGER CARS AND COMMERCIAL
VEHICLES TO 2020

OCTOBER 2015
BY JOHNERIC LEACH

ABOUT
Publishing Group

SUMMARY

CHAPTER 1 INTRODUCTION

1.1 Report coverage

CHAPTER 2 TECHNICAL CONSIDERATIONS AND TRENDS

2.1 Introduction

2.1.1 Hybrid turbochargers

2.1.2 Superchargers

2.2 Operating constraints

2.3 Forced Induction Devices

2.3.1 Turbocharging

2.3.2 Advanced turbocharger technologies

2.4 Heavy vehicle turbocharger technologies

2.5 Advanced turbocharger materials and design capability

2.6 Mechanical supercharging

2.7 Technical considerations and trends

CHAPTER 3 THE GLOBAL MARKET

3.1 Market trends

3.1.1 Regulatory drivers: Emissions regulations and the drive for fuel efficiency

3.1.2 U.S. current and planned regulation

3.1.2.1 Going forward – Volkswagen and the U.S. market

3.1.3 European current and planned regulation

3.1.3.1 Implications – Volkswagen and the market in Europe

3.1.4 Asian current and planned regulation

3.1.5 Additional notes and requirements

3.1.5.1 Tightening emissions standards for commercial vehicles

3.2 Major vehicle production trends

3.3 The downsizing trend

3.4 Diesel market growth

3.5 The heavy-duty sector

3.5.1 Challenges to the diesel engine in the heavy-duty sector

3.6 Market size

3.6.1 The light-duty sector

3.6.1.1 Europe

3.6.1.2 China

3.6.1.3 North America

3.6.1.4 Japan

3.6.1.5 India

- 3.6.1.6 Rest of the world
- 3.7 The heavy-duty sector**
- 3.8 Market values**
- 3.8.1 Light-duty sector
- 3.8.2 Heavy-duty sector
- 3.9 Market shares**
- 3.9.1 Worldwide market – passenger car applications

CHAPTER 4 MANUFACTURERS

- 4.1 Introduction**
- 4.2 Honeywell Turbo Technologies**
- 4.3 BorgWarner**
- 4.4 Ishikawajima-Harima Heavy Industries (IHI)**
- 4.5 Mitsubishi Heavy Industries (MHI)**
- 4.6 Bosch Mahle Turbo Systems**
- 4.7 Continental Schaeffler**
- 4.8 Eaton**
- 4.9 Cummins Turbo Technologies**
- 4.10 Domestic Chinese turbocharger manufacturers**

List of tables

- TABLE 1 Projected fleet-wide emissions compliance levels under the footprint-based CO₂ standards (g/mi) and corresponding fuel economy (mpg)
- TABLE 2 EU emission standards for passenger cars (category M₁)
- TABLE 3 CO₂ emissions and weight in 2011 by manufacturer with 2015 and 2020 CO₂ targets (passenger vehicles only)
- TABLE 4 China emission limits for China III, IV and 5
- TABLE 5 Emission standards for light commercial vehicles
- TABLE 6 EU emissions standards for heavy-duty diesel engines: grams per kilowatt/hour (g/kWh)
- TABLE 7 EU emissions standards for heavy goods vehicles: Grams per kilowatt/hour (g/kWh)
- TABLE 8 Comparison of turbo diesel vs non-turbo petrol
- TABLE 9 Comparison of petrol vs non-turbo petrol
- TABLE 10 Light vehicle engine production by region to 2020 (million units)

TABLE 11	Turbocharger demand to 2020 (million units)
TABLE 12	Turbocharger market, medium- and heavy-duty vehicles by region to 2020 (thousand units)
TABLE 13	Light vehicle turbocharger market value by region to 2020 (million USD)
TABLE 14	Commercial vehicle turbocharger market value by region to 2020 (million USD)

List of figures

FIGURE 1	Aeristech electric compressor prototype
FIGURE 2	Centrifugal supercharger
FIGURE 3	Valeo electric supercharger
FIGURE 4	Whipple-type supercharger
FIGURE 5	Roots-type supercharger
FIGURE 6	Passenger car CO ₂ emissions and fuel consumption, normalised to NEDC
FIGURE 7	Europe turbocharger demand to 2020: Gasoline & Diesel (million units)
FIGURE 8	China turbocharger demand to 2020: Gasoline & Diesel (million units)
FIGURE 9	North America turbocharger demand to 2020: Gasoline & Diesel (million units)
FIGURE 10	Japan turbocharger demand to 2020: Gasoline & Diesel (million units)
FIGURE 11	India turbocharger demand to 2020: Gasoline & Diesel (million units)
FIGURE 12	Rest of the world turbocharger demand to 2020: Gasoline & Diesel (million units)
FIGURE 13	Global market shares for OEM engine turbochargers for passenger car diesel and gasoline engines, 2015 (% volume)
