

Electric Vehicle Charging Infrastructure 2012-2022: Forecasts, Technologies, Players

The full picture and opportunity assessment of how electric vehicles for land, water and air will be charged

By Dr Peter Harrop

Contents

Page

1.	EXECUTIVE SUMMARY AND CONCLUSIONS	1
1.1.	Electrical categories	3
1.2.	Physical categories – Mode, Case and Type	4
1.3.	The most popular level of charging	6
1.4.	Ten year forecasts	7
1.5.	Relative sales by Level	13
1.6.	Charging station sales exceed pure electric cars sales	13
1.7.	Price trends	14
1.8.	A vision for ubiquitous fast charging	15
1.9.	Major impediments to the Level 3 people really want	16
1.10.	Actual charger pricing	18
1.11.	Price sensitivity and opportunity for cost reduction	18
1.12.	Geographical trends	19
1.13.	Primary market	20
1.14.	Favoured locations	20
1.15.	Alternative technologies	22
1.16.	Market leaders	23
1.17.	Market beyond cars	23
1.18.	Vehicle projections by type	23
1.19.	Charging infrastructure situation by category	25
2.	INTRODUCTION	27
2.1.	Electric vehicle business by value	27
2.2.	The car manufacturers' dilemma	29
2.2.1.	Charging off-road land vehicles is usually easy	29
2.2.2.	On road vehicles are troublesome	30
2.2.3.	Many organisations interested	31
2.3.	Potential setbacks and uncertainty	31
2.4.	Some certainties	32
2.5.	How many charging points are needed?	34
2.6.	Will there be enough charging points?	34
2.6.1.	Flexibility	36
2.6.2.	Part of a coordinated effort	36
2.7.	Can the grid cope?	39
2.8.	Coping with local grid inadequacies - transportable, autonomous charging	40
2.9.	Metering in the vehicle or cable	45
2.10.	In-vehicle inverters become more capable	46

3.	STANDARDS	49
3.1.	Global standards setting in this field	49
3.1.1.	Society of Automotive Engineers (SAE)	49
3.1.2.	International Electrotechnical Commission (IEC)	50
3.1.3.	International Organisation for Standardisation (ISO)	51
3.1.4.	Japan	51
3.1.5.	Level 1,2,3	51
3.1.6.	HomePlug Green Phy	53
3.2.	China	54
3.3.	Europe	54
3.3.1.	Code of practice	57
3.4.	Technical differences between countries	58
3.5.	International strategies	62
3.5.1.	Japan	62
3.5.2.	Korea	64
3.5.3.	North America	64
4.	BATTERY SWAPPING	67
4.1.	Fastest form of recharging	67
4.2.	Battery swapping trials – China, Denmark, Israel, Japan, South Korea	68
4.3.	20,000 EVs in a smart grid	69
4.4.	Battery swapping alternatives	70
5.	ENERGY HARVESTING AND WIRELESS CHARGING	73
5.1.	Energy harvesting	73
5.1.1.	Solar powered charging stations	74
5.1.2.	Alpha Energy USA	75
5.1.3.	Beautiful Earth USA	76
5.1.4.	E-Move Denmark	77
5.1.5.	Envision Solar International USA	77
5.1.6.	EVFuture India	78
5.1.7.	Flight of the Century	79
5.1.8.	Pininfarina Italy	81
5.1.9.	RRC Germany	81
5.1.10.	Sanyo Japan	82
5.1.11.	Solar Bullet train	84
5.1.12.	Solar Unity Company USA	86
5.1.13.	SunPods USA	86
5.1.14.	Toyota Japan	87
5.1.15.	ULVAC	89
5.2.	Electricity from the road	89
5.2.1.	James Dyson Award UK	90
5.2.2.	Innowattech Israel	91

5.3.	Wireless charging	92
5.3.1.	Conductix-Wampfler Italy	95
5.3.2.	Energy Dynamics Laboratory USA	96
5.3.3.	Evatran USA	96
5.3.4.	Korea Advanced Institute of Technology	99
5.3.5.	Nissan Japan	100
5.3.6.	Presidio Graduate School USA	100
5.3.7.	Qualcomm (HalolPT) New Zealand	100
5.3.8.	Siemens-BMW	104
5.3.9.	Singapore A*STAR	105
5.3.10.	Volvo and Flanders Drive Sweden, Belgium	105
5.3.11.	WiTricity and Partners USA	107
6.	RECENT PROGRESS BY COMPANY AND COUNTRY, FUTURE ISSUES	109
6.1.	ABB Switzerland	109
6.2.	AeroVironment USA	113
6.3.	APplugs Belgium	115
6.4.	Better Place Israel / USA	115
6.5.	Chargemaster UK	117
6.6.	Circontrol Spain	119
6.7.	Coulomb Technologies USA	119
6.8.	CT&T USA	121
6.9.	Diamond Aircraft, Siemens, EADS	122
6.10.	Eaton Corporation USA	124
6.11.	ECotality USA	125
6.12.	Elektromotive UK	127
6.13.	Epyon Netherlands	128
6.14.	GE USA	130
6.15.	Green Charge Networks USA	132
6.16.	Hasetec Japan	133
6.17.	Ingeteam Spain	134
6.18.	JFE Engineering Corporation USA	134
6.19.	Leviton USA	135
6.20.	Liberty PlugIns USA	136
6.21.	Mitsubishi Japan	137
6.22.	Nation-E Switzerland	138
6.23.	NEC Takasago Japan	140
6.24.	Nexco Japan	141
6.25.	Nissan Japan	143
6.26.	PEP Stations USA	146
6.27.	Robert Bosch Germany	146
6.28.	Schneider Electric France	148
6.29.	Siemens Germany	152

6.30.	SwapPack USA	154
6.31.	Tokyo Electric Power Company	154
6.32.	Toyota Japan	155
6.33.	Voltec USA	157
7.	EXAMPLES OF INFRASTRUCTURE INSTALLATION BY COUNTRY	159
7.1.	Austria	159
7.2.	China	160
7.3.	France	161
7.4.	Germany	161
7.5.	Japan	164
7.6.	Portugal	165
7.7.	Republic of Ireland	165
7.8.	Spain	166
7.9.	Sweden	167
7.10.	United Kingdom	167
7.11.	USA	170
7.11.1.	California	171
7.11.2.	North Carolina	172
7.11.3.	Oregon	174
7.12.	Fear of grid overload	175
7.13.	Electric vehicles and the smart grid	179
7.13.1.	Colliding with the needs of electric vehicles?	180
7.13.2.	Opportunities	181
	APPENDIX 1: IDTECHEX PUBLICATIONS AND CONSULTANCY	187
	APPENDIX 2: LATEST PROGRESS WITH LITHIUM-ION TRACTION BATTERIES.	205

Tables
