1.	EXECUTIVE SUMMARY AND CONCLUSIONS	1
1.1.	What is energy harvesting?	1
1.2.	Choices of harvesting	5
1.3.	Opportunities for energy harvesting in cars	8
1.4.	Market size of EV energy harvesting 2014-2025	13
1.5.	Largest sectors	14
1.6.	Regenerative braking	19
1.7.	Large UK Government grants for KERS harvesting	20
1.8.	Energy harvesting for racing cars shows the way	24
2.	INTRODUCTION	27
2.1.	Energy harvesting	27
2.1.1.	Textron Bell helicopter sensing	27
2.1.2.	Train brakes	29
2.1.3.	MEMS	30
2.2.	Electric vehicle	30
2.3.	Needs	31
2.3.1.	Range and cost	31
2.3.2.	Hybrid vs pure electric	32
2.3.3.	Biomimetics	32
2.4.	Options and examples	34
2.4.1.	ETH, QinetiQ solar plane	34
2.4.2.	Amerigon thermoelectrics for cars, etc	35
2.4.3.	Military land vehicles	37
2.4.4.	NASA on Mars- planetary exploration vehicles	38
2.5.	Bluecar	38
2.6.	Nissan Capacitor Hybrid truck, forklift	40
2.7.	Toyota Prius	41
2.8.	Multi-mode harvesting	43
2.8.1.	Alongside	43
2.8.2.	Smart skin	45
2.8.3.	EH in tire pressure monitoring	47
2.8.4.	Issues with TPMSs using batteries	47
2.8.5.	Energy harvesters for TPMS	48
2.9.	Microhybrids	49
3.	TECHNOLOGY TRENDS	51
3.1.	Photovoltaic	51

3.1.1.	Flexible, conformal	51
3.1.2.	Technological options	52
3.1.3.	Principles of operation	53
3.1.4.	Options for flexible PV	54
3.1.5.	Many types of photovoltaics needed for harvesting	56
3.2.	Limits of cSi and aSi technologies	56
3.3.	Limits of CdTe	57
3.4.	GaAs-Ge multilayers	57
3.5.	DSSC	58
3.6.	CIGS	60
3.7.	Organic	61
3.8.	Nanosilicon ink	65
3.9.	Nantenna – diode PV	65
3.9.1.	Nanowire solar cells	66
3.9.2.	UV, visible, IR	67
3.10.	Technology trends – electrodynamic	68
3.11.	Vibration harvesting	69
3.12.	Movement harvesting options	69
3.12.1.	Piezoelectric – conventional, ZnO and polymer	69
3.12.2.	Electrostatic	73
3.12.3.	Magnetostrictive	74
3.12.4.	Energy harvesting electronics	74
3.13.	Electroactive polymers	75
3.14.	Electrodynamic	78
3.14.1.	Generation of electricity	78
3.14.2.	Regenerative braking	78
3.14.3.	Energy harvesting shock absorbers	78
3.14.4.	Regenerative soaring	80
3.15.	Thermoelectrics	81
3.15.1.	Great increase in interest in 2014	82
3.15.2.	Thermoelectric construction	83
3.15.3.	Advantages of thermoelectrics	85
3.15.4.	Automotive Thermoelectric Generation (ATEG)	86
3.15.5.	Heat pumps	89
3.15.6.	Thermoelectric Energy Harvesting in Japan	90
3.15.7.	Ford, Volvo, Renault	95
3.16.	Flywheels	97
3.17.	Electromagnetic field harnessing	102
3.18.	Microbial and other fuel cells	103
3.19.	Other harvesting options	103
4.	EH FOR LAND VEHICLES	105
4.1.	Solar Prius	105

4.2.	Webasto pioneers see-through solar car	105
4.3.	Pure EV motive power	108
4.4.	EH shock absorbers in trucks, buses, cars	112
4.4.1.	Levant Power	112
4.4.2.	Wattshocks	118
4.5.	Regenerative braking	122
4.6.	Electricity from engine and exhaust heat	123
4.6.1.	Copenhagen bicycle	125
4.6.2.	Volvo hybrid bus	128
4.6.3.	Fisker Karma car	128
4.6.4.	Tesla car	130
4.7.	Cruise car solar golf cars	131
4.8.	Ford unveils solar powered car with new system that tracks the sun	132
4.9.	Vibration harvesting ATV in India	133
4.10.	Piezoelectric roads for California?	134
4.11.	Award for railroad energy harvesting	134
5.	EH FOR VEHICLES ON WATER	137
5.1.1.	Example of US navy unmanned surface vehicles	137
5.1.2.	Tamarack Lake foldable inland boat USA	139
5.1.3.	Kitegen seagoing kite boats Italy and Sauter UK	140
5.1.4.	Larger solar lake boats Switzerland	144
5.1.5.	SCOD / Atlantic Motors high performance cabin cruiser USA	144
5.1.6.	MW Line solar seagoing boat Switzerland	145
5.1.7.	Unmanned boat gathering oil USA	145
5.1.8.	Seagoing yachts France	147
5.1.9.	Tag plug in hybrid large sail boat South Africa, New Zealand	148
5.1.10.	Türanor PlanetSolar solar catamaran Germany	153
5.1.11.	Energy harvesting superyacht UK	156
6.	EH FOR UNDERWATER CRAFT	159
6.1.	Swimmers vs gliders	160
6.2.	Wave and sun powered sea gliders	161
6.2.1.	Virginia Institute of Marine Science USA	162
6.2.2.	Falmouth Scientific Inc USA	162
6.2.3.	Liquid Robotics USA	163
6.3.	Robot jellyfish USA and Germany	165
6.4.	Wind + Solar for ships	169
7.	EH FOR AIRCRAFT	171
7.1.	Energy harvesting	171
7.1.1.	Multiple forms of energy to be managed	171

7.1.2.	AeroVironment / NASA USA	173
7.1.3.	Boeing USA	174
7.1.4.	École Polytechnique Fédérale de Lausanne Switzerland	175
7.1.5.	ETH Zurich Switzerland	178
7.1.6.	Green Pioneer China	179
7.1.7.	Gossamer Penguin USA	179
7.1.8.	Néphélios France	180
7.1.9.	QinetiQ UK	180
7.1.10.	Soaring China	181
7.1.11.	Solair Germany	182
7.1.12.	Solar Flight USA	182
7.1.13.	Sunseeker USA	183
7.1.14.	University of Applied Sciences Schwäbisch Gmünd Germany	183
7.1.15.	US Air Force	183
7.1.16.	Northrop Grumman USA	184
7.2.	Beamed energy	185
8.	EV CHARGING STATIONS WITH HARVESTING	189
8.1.	Energy harvesting	189
8.1.1.	Solar powered charging stations	190
8.1.2.	Alpha Energy USA	191
8.1.3.	Beautiful Earth USA	192
8.1.4.	Envision Solar International USA	193
8.1.5.	E-Move Denmark	193
8.1.6.	EVFuture India	194
8.1.7.	Sanyo Japan	195
8.1.8.	Solar Bullet train	197
8.1.9.	Solar Unity Company USA	199
8.1.10.	SunPods USA	199
8.1.11.	Toyota Japan	200
8.1.12.	Innowattech Israel	203
9.	MARKET FORECASTS 2013-2024	207
9.1.	Largest sectors	208
9.2.	Numbers of manufacturers	216
	APPENDIX 1: WIRELESS CHARGING	221
	IDTECHEX RESEARCH REPORTS	231
	IDTECHEX CONSULTANCY	232
