

Hybrid and Electric Buses and Taxis 2013-2023: Forecasts, Opportunities, Players

With suppliers, manufacturers and
technology appraisal

Contents

Page

1.	EXECUTIVE SUMMARY AND CONCLUSIONS	1
1.1.	Definitions	1
1.2.	Manufacturing buses and taxis	2
1.3.	Hybrids are key for now	3
1.4.	Advantages of electric buses	9
1.5.	Basis for forecasting global bus sales by region	15
1.6.	Demand and production in China	17
1.7.	Adoption of electric buses vs electric cars	18
1.8.	Taxis	25
1.9.	Electric bus design is ahead of cars	36
1.10.	Radically different bus powertrains	39
1.11.	ABB intermittent overhead charging	41
1.12.	Bus statistics	47
1.12.1.	e-Bus and bus backup information	47
1.12.2.	Preference for hybrid	47
1.12.3.	Total bus sales	48
1.12.4.	Production and Sales of China Light Bus Market in November 2013	49
1.12.5.	Production and Sales of China Medium Bus Market in November 2013	50
1.12.6.	Production and Sales of China Large Bus Market in November 2013	51
2.	INTRODUCTION	53
2.1.	Electric vehicles in general	53
2.2.	Advantages of electric buses	54
2.3.	Highlights 2011-2021	57
2.4.	Definitions and trends	57
2.5.	Modest success of electric minibuses	59
2.6.	Convergence of hybrid and pure electric buses.	67
2.7.	Convergence of trolley buses and free running electric buses	68
2.8.	CNG Preferred for Los Angeles Buses	76
3.	ELECTRIC BUS MANUFACTURERS AND TECHNOLOGIES	77
3.1.	History of electric buses	77
3.2.	Main components of hybrid bus power trains	97
3.3.	Superbus	108
3.4.	Fuel cells rescued by batteries	109
3.5.	OLEV technology for Korean buses in 2013	113
3.6.	New pure electric school bus in USA	114

4.	PROFILES OF SOME INTERESTING SUPPLIERS	115
4.1.	Alexander Dennis UK	115
4.2.	Anhui Ankai Automobile Company China	116
4.3.	BredaMenarinibus Vivacity Italy	118
4.4.	BYD China	118
4.5.	Daimler Germany	119
4.6.	Hino Motors and parent company, Toyota Japan	122
4.7.	IVECO Italy	123
4.8.	ISE Corp, USA	124
4.9.	MAN hybrid bus Germany: supercapacitor not battery	125
4.10.	Navistar USA	126
4.11.	New Flyer Industries Canada	126
4.12.	Nova Bus Canada	127
4.13.	Optare UK	128
4.14.	Proterra	129
4.15.	Ryobi Bus Japan	130
4.16.	TATA India	130
4.17.	Volvo Sweden	132
4.18.	Wrightbus UK	134
4.19.	Yutong Group	134
4.20.	Zhongtong Bus Holding Co., Ltd, China	137
5.	BUS DRIVE TRAINS	139
5.1.	Acura Systems USA	139
5.2.	Allison Transmission USA	140
5.3.	Azure Dynamics USA	143
5.4.	BAE Systems UK, USA	143
5.5.	BLK China	145
5.6.	Eaton USA	146
5.7.	ISE Corporation	146
5.8.	SIM Drive Corporation Japan	147
5.9.	SR Drives UK, Green Propulsion Belgium	148
5.10.	ThunderVolt USA	150
6.	ELECTRIC TAXI MANUFACTURERS AND TECHNOLOGIES	151
6.1.	Electric taxi projects in US, UK, Europe, China, Japan and Mexico	152
6.1.1.	China	152
6.1.2.	Mexico	155
6.1.3.	USA	159
6.2.	Mitsubishi taxi rollout in Japan	159
6.2.1.	Mitsubishi MiEV taxi	160
6.3.	Beijing China	161
6.4.	Changsha China	161

6.5.	Changping District in Beijing China	161
6.6.	Dalian China	162
6.7.	Langfeng, Hebei China	162
6.8.	Huge order in the Philippines in 2013	162
6.9.	Range-extended electric London cabs to be trialled in 2014	165
7.	TRACTION BATTERIES, FUEL CELLS, RANGE EXTENDERS	169
7.1.	Traction batteries	169
7.2.	Who is winning in traction batteries and why	171
7.2.1.	The needs have radically changed	171
7.2.2.	It started with cobalt	176
7.2.3.	Great variety of recipes	176
7.2.4.	Other factors	177
7.2.5.	Check with reality	177
7.2.6.	Lithium winners today and soon	177
7.2.7.	Reasons for winning	178
7.2.8.	Lithium polymer electrolyte now important	178
7.2.9.	Winning chemistry	179
7.2.10.	Titanate establishes a place	179
7.2.11.	Laminar structure	180
7.2.12.	Niche winners	180
7.2.13.	Fluid situation	180
8.	FUEL CELLS	187
8.1.	Trials of fuel cell powered vehicles	187
8.2.	Fuel cell 2000 summary of fuel cell bus trials to 2010	191
8.3.	Range extenders	199
8.4.	US DOE Grant Sept 2013	199
9.	MARKET STATISTICS AND FORECASTS	201
9.1.	Past trends	201
9.1.1.	Commercial vehicles	201
9.2.	Buses – historical trends	202
9.3.	School buses – North America	205
9.4.	Past trend in bus production by country	206
9.5.	US population of buses by type	207
9.6.	Transport modes in India	209
9.7.	Motor vehicle production by leading producers	209
9.8.	Global electric bus deliveries to start of 2011	214
9.9.	Forecasts to 2023	214
9.9.1.	Global demand for electric buses and taxis	214
9.9.2.	Manufacturing buses and taxis	214

9.10.	Technology future	215
9.10.1.	Hybrids are key for now	215
9.11.	Future leading manufacturers	217
9.11.1.	Today's leading electric bus manufacturer	217
9.11.2.	Future leading user nation	217
9.11.3.	Buses and taxis a good launch pad for new technologies	218
9.11.4.	Global conventional and electric bus demand 2010-2021	218
9.11.5.	Advantages of electric buses	221
9.12.	Decade of the hybrid	222
9.13.	Liberty Electric Cars	227
9.14.	Basis for forecasting global bus sales by region	229
9.15.	Conventional and electric bus demand and production in China	230
9.16.	Adoption of electric buses vs electric cars	231
9.17.	Global electric vehicle manufacturers by application	232
9.18.	Chinese manufacturers of electric vehicles by application	233
9.18.1.	Taxis	237
9.19.	Adoption of green taxis	245
9.20.	Electric vehicles in East Asia	248
9.21.	Total change	249
	APPENDIX 1: IDTECHEX PUBLICATIONS AND CONSULTANCY	253
	APPENDIX 2: INTRODUCTION TO ELECTRIC VEHICLES	271
