Active Safety and the Mobility Industry

Edited by Dr. Andrew Brown, Jr.

Safety is a key element in new vehicle design and active safety, together with driver distraction prevention, has become one of the most talked about issues in the mobility industry.

Active Safety and the Mobility Industry features 20 SAE technical papers, originally published in 2009 and 2010, which showcase how the mobility industry is considering all aspects of safety in designing and producing safer vehicles. The papers were selected by SAE International’s 2010 President, Dr. Andrew Brown Jr., Executive Director and Chief Technologist for Delphi Corporation.

The contents of this book explore a variety of safety issues in the areas of market and consumer preferences, driver assistance and modeling, active safety systems, crash sensing and sensor fusion, communications, and road safety. The publication also includes a number of articles authored by renowned experts in the field of active safety.

Not only invaluable for those directly working in the field, Active Safety and the Mobility Industry will also be of interest to researchers and students, as well as those in government agencies tasked with defining and implementing public policies in the mobility safety arena.

About the editor

Dr. Andrew Brown, Jr. is the Executive Director & Chief Technologist for Delphi Corporation, where he provides leadership on corporate innovation and technology issues to help achieve profitable competitive advantage. He also represents Delphi globally in outside forums on matters of innovation and technology, including government and regulatory agencies, customers, alliance partners, vendors, contracting agencies and academia. In April of 2009, SAE International’s Executive Nominating Committee named Dr. Andrew Brown, Jr., as its candidate for the 2010 SAE International presidency. He was elected in November of 2009, and sworn into office in January of 2010 for a one-year tenure.

# TABLE OF CONTENTS

## Introduction

**Active Safety and the Mobility Industry**

Dr. Andrew Brown, Jr., P.E., FESD, NAE – President, SAE International, 2010

## Special Contributions

**Advancing Safety in the Future: The Role of Technologies, the Government, and the Industry**

Dr. Joseph N. Kanianthra, President of Active Safety Engineering LLC

**Road Safety – A Better Way Forward**

Patrick Lepercq, Michelin – Corporate Vice President Public Affairs and Chairman of the Global Road Safety Partnership

**Traffic Safety: International Status and Active Technologies for the Future**

Dr. Dinesh Mohan, Volvo Chair Professor for Biomechanics and Transportation Safety at the Transportation Research and Injury Prevention Programme of the Indian Institute of Technology, Delhi

**Addressing the Deployment Issues of Intelligent Cooperative Systems**

Richard Harris, Director of Intelligent Transport Systems at Logica plc, English Language Secretary of the World Road Association (PIARC) Technical Committee Network Operations, and Technical Secretary of the PIARC/FISITA Joint Task Force on Intelligent Cooperative Systems

## Active Safety Systems, Crash Sensing and Sensor Fusion

**Developing Integrated Vision Applications for Active Safety Systems**

Adam Prengler – NEC Electronics America, Inc.

**Successive Categorization of Perceived Urgency in Dynamic Driving Situations**

Gerald J. Schmidt, Ali Khanafer and Dirk Balzer – Opel GmbH

**Estimation of Vehicle Roll Angle and Side Slip for Crash Sensing**

Aleksander Hac, David Nichols and Daniel Sygnarowicz – Delphi Corporation

**Sensor Data Fusion for Active Safety Systems**

Jorge Sans Sangorrin, Jan Sparbert, Ulrike Ahlrichs and Wolfgang Branz – Robert Bosch GmbH

**Frontal Crash Testing and Vehicle Safety Designs: A Historical Perspective Based on Crash Test Studies**

Michaela Authaler
**Road Safety**

*Synthesizing a System for Improving Road Safety in China (2009-01-0592)* ............................................. 107  
Hongtao Yu, Jiahe Zhang, Yuankui Meng and Shili Ni – CATARC Shanghai Operation  
Weijian Han – Ford Motor Company  
Peng Ren – Clemson University

*Structural Improvement for the Crash Safety of Commercial Vehicle (2009-01-2917)* ............................................. 115  
Libo Cao, Zhonghao Bai, Jun Wu, Chongzhen Cui and Zhenfeng Niu  
The State Key Laboratory of Advanced Design and Manufacturing for Vehicle Body

*Innovative Concepts for Smart Road Restraint Systems to Provide Greater Safety for Vulnerable Users – Smart RRS (2010-36-0034)* ........................ 121  
Arturo Davila and Mario Nombela – IDIADA Automotive Technology  
Juan José Alba – Universidad de Zaragoza  
Juan Luis De Miguel – Centro Zaragoza

**Driver Assistance and Modeling**

*Calibration and Verification of Driver Assistance and Vehicle Safety Communications Systems (2010-01-0664)* ............................................. 139  
Mohammad Naserian and Kurt Krueger – Vector North America

*Driver Alcohol Detection System for Safety (DADSS). Background and Rationale for Technology Approaches (2010-01-1580)* ............................................. 147  
Susan A. Ferguson – Ferguson International LLC  
Abdullatif (Bud) Zaouk and Clair Strohl – QinetiQ North America

*Drowsiness Detection Using Facial Expression Features (2010-01-0466)* ............................................. 159  
Satori Hachisuka, Teiyuu Kimura, Kenji Ishida, Hiroto Nakatani and Noriyuki Ozaki  
– Denso Corporation

*Modeling of Individualized Human Driver Model for Automated Personalized Supervision (2010-01-0458)* ............................................. 169  
Xingguang Fu and Dirk Söffker – University of Duisburg-Essen

*Designing Reusable and Scalable Software Architectures for Automotive Embedded Systems in Driver Assistance (2010-01-0942)* ............................................. 179  
Dirk Ahrens, Andreas Frey and Andreas Pfeiffer – BMW Group, Munich, Driving Dynamics  
Torsten Bertram – Technische Universität Dortmund
Communications

Integration of Car-to-Car Communication into IAV (2009-01-1479) ................................................................. 195
Tae-Kyung Moon, Jun-Nam Oh, Hyuck-Min Na and Pal-Joo Yoon – MANDO Corporation

Enabling Safety and Mobility through Connectivity (2010-01-2318) ................................................................. 201
Chris Domin – Ricardo Inc.

Time Determinism and Semantics Preservation in the Implementation of Distributed Functions over FlexRay (2010-01-0452) ........................................................................................................... 211
Marco Di Natale, Scuola S. Anna and Haibo Zeng – General Motors

Exploring Application Level Timing Assessment in FlexRay based Systems (2010-01-0456) ........................................... 221
Sandeep U. Menon – Electrical & Controls Integration Lab, General Motors R&D

Market and Consumer Preferences

Driver’s Attitudes Toward the Safety of In-Vehicle Navigation Systems (2009-01-0784) .................................................. 233
Andrew Varden and Jonathan Haber – University of Guelph

Consumer Attitudes and Perceptions about Safety and Their Preferences and Willingness to Pay for Safety (2010-01-2336) ................................................................. 241
Veerender Kaul, Sarwant Singh, Krishnasami Rajagopalan and Michael Coury – Frost & Sullivan

Commercial Business Viability of IntelliDriveSM Safety Applications (2010-01-2313) .............................................................. 251
Robert White, Tao Zhang, Paul Tukey and Kevin Lu – Telcordia Technologies
David McNamara – MTS LLC
