

Table of Contents

Introduction	1
Integration and Lightweight Design in Automotive Doors (2015-26-0242)	5
Rolf Bücken, Brose Fahrzeugteile GmbH & Co. KG	
Optimization of High-Volume Warm Forming for Lightweight Sheet (2013-01-1170).....	11
Nia R. Harrison, Andrey Ilinich, and Peter A. Friedman, Ford Motor Company; Jugraj Singh, Chrysler Group LLC; Ravi Verma, General Motors Company	
Simulation of Galvanic Corrosion of Aluminum Materials for Vehicles (2010-01-0724)	23
Takahiro Mizukami, Honda	
Structure to Assist in Prevention of Bimetallic Corrosion of Hybrid Doors (2013-01-0386)	35
Shoji Kimura, Honda R&D Co., Ltd.	
Evaluation of Constitutive Behavior of Aluminum Extrusions and Their GMAW Welds (2013-01-0384)	41
Jidong Kang, CanmetMATERIALS; Kevin Gong, Constellium; Guowu Shen, Jie Liang, and James Chen, CanmetMATERIALS	
Application of an FSW Continuous Welding Technology for Steel and Aluminum to an Automotive Subframe (2013-01-0372)	47
Shosuke Ohhama and Tsunehisa Hata, Honda R&D Co., Ltd. Automobile R&D; Takanori Yahaba, Honda Motor Co., Ltd. Suzuka Factory; Tsutomu Kobayashi, Tetsuya Miyahara, and Mitsuru Sayama, Honda R&D Co., Ltd. Automobile R&D	
Characterization of Flow Drill Screwdriving Process Parameters on Joint Quality (2014-01-2241)	55
Jamie Skovron, Laine Mears, and Durul Ulutan, Clemson University; Duane Detwiler and Daniel Paolini, Honda R & D Americas Inc.; Boris Baeumler, DEPRAG Inc.; Laurence Claus, EJOT GmbH	

New Adhesive Bonding Surface Treatment Technologies for Lightweight Aluminum-Polypropylene Hybrid Joints in Semi-Structural Applications (2011-01-0217)..... 65

Danick Gallant and Véronique Savard, Aluminium Technology Centre

Sandwich Panels with Corrugated Core - A Lightweighting Concept with Improved Stiffness (2014-01-0808) 79

Pankaj K. Mallick and Rajesh Boorle, University of Michigan
