

Table of Contents

Introduction	1
Efficient Reliability and Safety Analysis for Mixed-Criticality Embedded Systems (2011-01-0445)	3
Maurice Sebastian, Philip Axer, and Rolf Ernst, Technische Universität Braunschweig; Nico Feiertag and Marek Jersak, Syntavision GmbH	
CAN Security: Cost-Effective Intrusion Detection for Real-Time Control Systems (2014-01-0340)	21
Satoshi Otsuka and Tasuku Ishigooka, Hitachi, Ltd.; Yukihiro Oishi and Kazuyoshi Sasazawa, Hitachi Automotive Systems, Ltd.	
An AUTOSAR-Compliant Automotive Platform for Meeting Reliability and Timing Constraints (2011-01-0448)	33
Junsung Kim, Gaurav Bhatia, and Rangunathan Rajkumar, Carnegie Mellon Univ.; Markus Jochim, General Motors Research	
Design for Reliability: Overview of the Systemic Approach for Failure Analysis in Electronics (2011-36-0056)	49
Mauro C. Andreassa and João Ricardo Tiusso, Ford Motor Company Brazil	
About Trends in the Strategy of Development Accelerated Reliability and Durability Testing Technology (2012-01-0206).....	57
Lev Klyatis, Sohar Inc.	
Reliability of Multi-Sensor Fusion for Next Generation Cars and Trucks (2014-01-0718)	65
Venkatesh Agaram, PTC Inc.	
Techniques and Measures for Improving Domain Controller Availability while Maintaining Functional Safety in Mixed Criticality Automotive Safety Systems (2013-01-0198)	73
Swapnil Gandhi, Delphi Deutschland GmbH; Simon P. Brewerton, Infineon Technologies UK Ltd.
