Introduction	<u>xiii</u>
--------------	-------------

CHAPTER 1

A Video Tracking Photogrammetry Technique to Survey Roadways for Accident Reconstruction 1

Background	<u>1</u>
Introduction	<u>2</u>
Video Tracking Photogrammetry	<u>4</u>
Scene Surveying	<u>4</u>
Setting Up the Video Take	<u>5</u>
Taking the Video	<u>5</u>
Tips	<u>5</u>
Processing the Data	<u>6</u>
Case Studies	<u>7</u>
Flat Highway	<u>7</u>
Road Signs and Telephone Poles	<u>7</u>
Rolling Highway	<u>9</u>
Comparison of Survey Accuracy for Road Curvature	<u>12</u>
Comparison of Survey Accuracy for Road Profile	<u>12</u>
Residential Roads	<u>12</u>
Future Development	<u>12</u>
Conclusion	<u>14</u>
References	<u>14</u>

CHAPTER 2

A Three-Dimensional Crush Measurement Methodology Using Two-Dimensional Photographs 15

Introduction	<u>15</u>
Previous Research Studies	<u>16</u>
Methodology	<u>17</u>

Procedure	<u>18</u>
Step One: Photograph Selection	<u>18</u>
Step Two (Part One): Wireframe Model Acquisition	<u>19</u>
Step Two (Part Two): Model/Photograph Alignment	<u>19</u>
Step Three: Vertices Displacement (“Deforming” The Model)	<u>20</u>
Selected Case Studies	<u>20</u>
Case Study No. 1	<u>20</u>
Methodology	<u>20</u>
Case Study No. 1 Results	<u>22</u>
Case Study No. 2	<u>22</u>
Methodology	<u>23</u>
Case Study No. 2 Results	<u>24</u>
Discussion	<u>24</u>
Conclusion	<u>25</u>
Acknowledgments	<u>25</u>
References	<u>26</u>
Appendix A. Case Study No. 1: Comparison of Crush Measurements Using Various Methodologies	<u>29</u>
Appendix B. Case Study No. 2: Comparison of Crush Measurements Using Various Methodologies	<u>30</u>

CHAPTER 3

Using Particle Image Velocimetry for Road Vehicle Tracking and Performance Monitoring **31**

Introduction	<u>32</u>
Purpose	<u>32</u>
Background	<u>32</u>
Literature Review	<u>33</u>
Overview	<u>34</u>
Mathematical Basis for DPIV	<u>34</u>
Description of Vehicle Kinematics	<u>36</u>
Preliminary Testing	<u>38</u>
Bounds of Performance	<u>39</u>
Experimental Procedures	<u>40</u>
Description of Systems	<u>40</u>
Calibration	<u>40</u>
Modifications to OpenPIV	<u>40</u>
Data Collection	<u>40</u>
Straight-Line Driving Test Results	<u>41</u>

Analysis of Data	<u>42</u>
Omission of Outliers	<u>42</u>
Least Squares Analysis	<u>43</u>
Comparison of Analysis Techniques	<u>44</u>
Sources of Uncertainty	<u>44</u>
Conclusions	<u>45</u>
References	<u>45</u>

CHAPTER 4

Benefits and Methodology for Dimensioning a Vehicle Using a 3D Scanner for Accident Reconstruction Purposes **47**

Introduction	<u>48</u>
Methodology for Dimensioning a Vehicle	<u>49</u>
Scanner Setup Prior to Inspection Trip	<u>49</u>
Scanner Setup at Inspection	<u>50</u>
Scanning a Vehicle	<u>51</u>
Post Processing the Scanner Data	<u>52</u>
Reconstruction Case Studies	<u>55</u>
Case 1: A Roof Deformation Case on a Small Sport Utility Vehicle	<u>55</u>
Case 2: Collision Between a Motorcycle and Towed Trailer	<u>56</u>
Case 3: Intersectional Collision Case Involving Two Vehicles	<u>57</u>
Case 4: Damage Documentation on a UTV	<u>59</u>
Case 5: Seat Belt and Seat Movement Investigation	<u>60</u>
Discussion	<u>60</u>
Conclusions	<u>61</u>
References	<u>62</u>
Acknowledgments	<u>62</u>

CHAPTER 5

The Accuracy of Photo-Based Three-Dimensional Scanning for Collision Reconstruction Using 123D Catch **63**

Introduction	<u>64</u>
Crush Jigs	<u>64</u>
Plumb Line Tracing	<u>64</u>

Total Station Survey	64
Laser Scanning	65
Coordinate Measuring Machines	65
Traditional Photogrammetry	65
Photo-Based 3D Scanning	66
Photo-Based 3D Scanning Theory	66
Photo-Based 3D Scanning Software	67
Purpose	67
Method	67
Vehicle Preparation	67
Total Station Measurements	69
Traditional Photogrammetry Measurements	69
Photo-Based 3D Scanning	70
Data Analysis	71
Results	72
Comparison between Total Station and Photo-Based 3D Scanning	72
Comparison between Traditional Photogrammetry and Photo-Based 3D Scanning	72
Discussion	73
Measurement Deviation	73
Strengths of Photo-Based 3D Scanning	73
Limitations of Photo-Based 3D Scanning	74
Summary/Conclusions	75
References	75

CHAPTER 6

Applying Camera Matching Methods to Laser-Scanned Three-Dimensional Scene Data with Comparisons to Other Methods

79

Introduction	80
Photogrammetry Methods Used	81
Photogrammetry Software	81
Photogrammetry Using Point Cloud Data	82
Photograph Rectification of Point Cloud Data	83
Camera Matching to Point Cloud Data	83
Photogrammetry Using 3D Scanner Data	84
The Method of Virtual Camera Matching to a Scene	84
Applying the Virtual Camera Matching Method to a Complex Crash on Sloped Terrain	87
Accuracy Comparison for the Staged Collision	89

Photograph Considerations for Camera Matching	
Photogrammetry	<u>93</u>
Summary/Conclusions	<u>94</u>
References	<u>95</u>
Acknowledgments	<u>95</u>
Appendix	<u>96</u>

CHAPTER 7

Assessment of the Accuracy of Google Earth Imagery for Use as a Tool in Accident Reconstruction	<u>107</u>
Introduction	<u>108</u>
Methodology	<u>109</u>
Results	<u>114</u>
Discussion	<u>116</u>
Summary/Conclusions	<u>117</u>
References	<u>118</u>
Acknowledgments	<u>118</u>
Appendix	<u>119</u>

CHAPTER 8

A Quantitative Method for Accurately Depicting Still Photographs or Video of a Nighttime Scene Utilizing Equivalent Contrast	<u>131</u>
Introduction	<u>132</u>
Contrast	<u>133</u>
Prior Methodologies	<u>133</u>
Methodology	<u>134</u>
Overview	<u>134</u>
Testing	<u>134</u>
Results	<u>136</u>
Calibrating for an Object that cannot be Seen	<u>136</u>
Calibrating for an Object that can be Seen	<u>137</u>
Discussion	<u>138</u>
Conclusions	<u>139</u>

References	<u>140</u>
Conflict of Interest Statement	<u>140</u>

CHAPTER 9

Evaluation of the Accuracy of Image-Based Scanning as a Basis for Photogrammetric Reconstruction of Physical Evidence 141

Introduction	<u>142</u>
Underlying Concepts—Image-Based Scanning	<u>143</u>
Advantages of Unmanned Aerial Vehicles	<u>144</u>
Methodology	<u>144</u>
Results	<u>147</u>
Discussion and Conclusions	<u>152</u>
References	<u>152</u>
Appendix	<u>154</u>
Appendix A—Images of Photogrammetric Process	<u>154</u>
Appendix B—Comparison of Individual Reconstructed Points to FARO Scan Data	<u>161</u>

CHAPTER 10

A Survey of Multiview Photogrammetry Software for Documenting Vehicle Crush 163

Introduction	<u>164</u>
Methodology	<u>165</u>
3D Scanner Documentation	<u>165</u>
Photograph and Video Documentation	<u>166</u>
Photogrammetry Software	<u>167</u>
3D Scan Data Processing	<u>168</u>
Photogrammetric Data Processing	<u>168</u>
Scaling and Comparing the Point Clouds	<u>169</u>
Results	<u>174</u>
Initial Software Evaluation	<u>174</u>
Camera Comparison	<u>176</u>
Photographs and Video Comparison	<u>179</u>
Software Evaluation Using Limited Photographs	<u>181</u>
Damaged and Undamaged Vehicle Comparison	<u>184</u>
Further Analysis: Photographs and Video Comparison	<u>187</u>

Summary/Conclusions	<u>189</u>
References	<u>191</u>
Acknowledgments	<u>193</u>
Appendix	<u>194</u>
Appendix A Complete Photograph Sets by Camera	<u>194</u>
Appendix B Histograms of Photogrammetry Software Data Distance from LiDAR Data	<u>202</u>
Appendix C Histograms of Camera-Specific Photogrammetry Software Data Distance from LiDAR Data	<u>204</u>
Appendix D Histograms of Video-Based Photogrammetry Software Data Distance from LiDAR Data	<u>206</u>
Appendix E Histograms of Specific Photograph Amounts— Photogrammetry Software Data Distance from LiDAR Data	<u>208</u>
