Chapter 1—Introduction
• The Purpose of Accelerated Testing
• Design Life
• Statistical Sample Size Determination
• Tolerances in Accelerated Testing
• Financial Considerations
• Summary

Chapter 2—Probability Fundamentals
• Sampling
• Probability Density Function
• Cumulative Distribution Function
• Reliability Function
• Hazard Function
• Expectation
• Summary

Chapter 3—Distributions
• Continuous Modeling Distributions
  • Weibull Distribution
  • Normal Distribution
  • Lognormal Distribution
  • Exponential Distribution
• Discrete Modeling Distributions
  • Poisson Distribution
  • Binomial Distribution
  • Hypergeometric Distribution
  • Geometric Distribution
  • Identifying the Correct Discrete Distribution
• Sampling Distributions
  • Chi-Square Distribution
  • t-Distribution
  • F-Distribution
• Bayes’ Theorem
• Summary

Chapter 4—Parameter Estimation
• Maximum Likelihood Estimation
• Probability Plotting
• Hazard Plotting
• Exponential Distribution
  • Maximum Likelihood Estimation
  • Hazard Plotting
  • Probability Plotting
• Normal Distribution
  • Maximum Likelihood Estimation
  • Hazard Plotting
  • Probability Plotting
• Lognormal Distribution
• Weibull Distribution
  • Maximum Likelihood Estimation
  • Hazard Plotting
  • Probability Plotting
• Nonparametric Confidence Intervals
• Summary

Chapter 5—Accelerated Test Plans
• Mean Time to Fail
• Test Plan Problems
• Zero-Failure Testing
  • Bogey Testing
  • Bayesian Testing
• Sequential Testing
  • Pass-Fail Testing
  • Exponential Distribution
  • Weibull Distribution
• Randomization of Load Cycles
• Reliability Growth
• Reliability Growth Process
• Reliability Growth Models
• Summary
Chapter 6—Accelerated Testing Models
• Linear Acceleration
• Field Correlation
• Arrhenius Model
• Eyring Model
• Voltage Models
• Mechanical Crack Growth
• Degradation Testing
• Qualitative Tests
  • Step-Stress Testing
  • Elephant Tests
  • HALT and HASS
• Summary

Chapter 7—Environmental Stress Screening
• Stress Screening Theory
  • The Product Reliability Equation
  • What Is ESS?
  • The Evolution of ESS
  • Misconceptions About ESS
  • Types of Environmental Stress
  • Advantages of Temperature Cycling
  • Levels of Screen Complexity
  • Failure Analysis
  • Case Histories
  • Implementing an ESS Program
  • Equipment
• Burn-In Optimization
• Summary

Chapter 8—Test Equipment Methods and Applications
• Simulation Versus Stimulation
  • Simulation
  • Stimulation
• Types of Stresses
  • Temperature
  • Vibration
  • Electrical Stress
• Combined Environments
• Other Types of Stress
• Summary

Appendix A—Statistical Tables
• Table A.1: The Gamma Function
• Table A.2: Standard Normal Cumulative Distribution Function
• Table A.3: Chi-Square Significance
• Table A.4: F Significance
• Table A.5: t Significance
• Table A.6: Poisson Cumulative Distribution Function

Appendix B—Government Documents

Appendix C—Glossary

Appendix D—List of Acronyms
