

# The Winning Solar Car

## A Design Guide for Solar Race Car Teams

### List of Chapters

#### Chapter 1

##### Introduction

- A. Identification of the Problem
- B. Solar Car Racing
- C. Energy Available and Distances Traveled in Solar Car Racing
- D. Homework Assignment
- E. References

#### Chapter 2

##### Energy Management Modeling of Solar Car Performance

- A. Purpose of Modeling
- B. Aerodynamics
- C. Rolling Resistance
- D. Homework Assignment
- E. Solar Array Power
- F. Battery Efficiency
- G. Motor-Drive System
- H. Parasitic Losses
- I. Gravitational Energy
- J. Kinetic Energy
- K. Modeling: Summary
- L. Homework Assignment
- M. Hilly, More Realistic Terrain
- N. Homework Assignment
- O. Extra Credit Homework: Milford Track Homework (Study of How Hills Affect Solar Car Efficiency)
- P. Extra Credit Homework: Heartland Park Track (Study of How Sharp Corners Affect Solar Car Efficiency)
- Q. References

#### Chapter 3

##### Design Methodology

- A. Introduction
- B. Time and Resources
- C. Study History
- D. Control Innovation
- E. Design Process
- F. Solar Car Design Process
- G. References

#### Chapter 4

##### Solar Array Design

- A. Solar Cell Fundamentals
- B. Open-Circuit Voltage
- C. Short-Circuit Current
- D. Solar Cell Efficiency—Solar Spectrum
- E. Solar Cell Model
- F. Illumination Level  $I_L$
- G. Temperature
- H. Coatings
- I. Wiring the Solar Array
- J. Shading of the Array
- K. Cell Matching
- L. Angling of Cells in a String
- M. Shingling of Cells
- N. Series-Paralleling of Cells
- O. Bypass Diodes
- P. Array Diagnosis and Repair
- Q. Matching Array Voltage with Battery Voltage
- R. Power Point Trackers
- S. Extreme Low-Light/No-Light OFF Switch
- T. Homework
- U. References

#### Chapter 5

##### Aerodynamics of Solar Cars

- A. Fundamentals
- B. Car Body Shape
- C. Camber
- D. Reynolds Number
- E. Body Drag Area Calculations
- F. Body Drag Introduction
- G. Canopy Drag
- H. Other Shapes Protruding into the Airstream
- I. Drag Caused by the Wheels
- J. Ventilation
- K. Wingtip Drag
- L. Induced Drag
- M. Summary
- N. Side Winds
- O. Computational Fluid Mechanics (CFM)
- P. Wind Tunnel Testing
- Q. References

# The Winning Solar Car

## A Design Guide for Solar Race Car Teams

### Chapter 6

#### Composite Materials

- A. Body Structure
- B. Body Strength Requirement
- C. Attachment Points
- D. Body Support Plates or Angles
- E. Quality of Lay-Up
- F. Box Beam Construction
- G. Mold and Body Construction
- H. Strength and Stiffness of Honeycomb and Foam Core Composites
- I. Composites Assignment
- J. References

### Chapter 7

#### Car Balance and Spring Rates

- A. Car Balance and Moment of Inertia
- B. Selecting Spring Rates
- C. Homework
- D. References

### Chapter 8

#### Tires and Rolling Resistance

- A. Tire Selection
- B. Rolling Resistance Phenomenon
- C. Energy Loss Model for Tire Misalignment
- D. References

### Chapter 9

#### Front Suspension Design

- A. Wheel Selection
- B. Brake Design
- C. Homework for Brakes
- D. Hub and Spindle
- E. Suspension and Chassis Design Philosophy
- F. Front-End Geometry and Steering
- G. Homework for Front Suspension Geometry
- H. References

### Chapter 10

#### Rear Suspension, Drive, and Chassis Structure

- A. Rear Suspension and Drive Design
- B. Drivetrain
- C. Electric Motors
- D. Chassis Structure
- E. References

### Chapter 11

#### Battery Systems

- A. Battery Fundamentals
- B. Fundamentals of Battery Chemistry
- C. Lead-Acid Batteries
- D. Silver-Zinc Batteries
- E. Nickel-Cadmium (NiCd) Batteries
- F. Nickel-Hydrogen and Nickel-Metal-Hydride (NMH) Batteries
- G. Lithium-Ion and Lithium-Polymer Batteries
- H. Charge-Discharge Curves
- I. Battery Modeling
- J. Battery Pack Modeling
- K. Wiring of the Battery Box
- L. Battery Safety
- M. References

### Chapter 12

#### Electrical Systems

- A. Introduction
- B. Wiring Diagram
- C. Fuses
- D. Wire Sizing
- E. Connectors and Switches
- F. Electrical Subsystems
